RADIO AND TELEVISION INTERFERENCE

WARNING — This equipment has been verified to comply with the limits for a Class B computing device, pursuant to Subpart J, of Part 15, of FCC rules. Operation with non-certified or non-verified equipment is likely to result in interference to radio and TV reception.

The equipment described in this manual generates and uses radio frequency energy. If it is not installed and used properly, that is, in strict accordance with our instructions, it may cause interference with radio and television reception. This equipment has been tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J, of Part 15, of FCC Rules. These rules are designed to provide reasonable protection against such a interference in a rasidential installation. However, there is no guarantee that the interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to try to correct the interference by the following measure:

- Disconnect other devices and their input/output cables one at a time. If the interference stops, it is caused by either the other device or its I/O cable. These devices usually require Roland designated shielded I/O cables. For Roland devices, you can obtain the proper shielded cable from your dealer. For non Roland devices, contact the manufacturer or dealer for assistance.
  If your equipment does cause interference to radio or television reception, you can try to correct the interference by using one or more of the following measures.
- Turn the TV or radio antenna until the interference stops.
- Move the equipment to one side or the other of the TV or radio.
- Move the equipment farther away from the TV or radio.
- Plug the equipment into an outlet that is on a different circuit than the TV or radio. (That is, make certain the equipment and the radio or television set are on circuits controlled by different circuit breakers or fuses.)
- Consider installing a rooftop television antenna with coaxial cable lead-in between the antenna and TV. If necessary, you should consult your dealer or an experienced radio/television technician for additional suggestions. You may find helpful the following booklet prepared by the Federal Communications Commission:
  "How to Identify and Resolve Radio — TV Interference Problems"
  This booklet is available from the U.S. Government Printing Office, Washington, D.C., 20402, Stock No. 004-000-00345-4.

For Canada

CLASS B **NOTICE**

This digital apparatus does not exceed the Class B limits for radio noise emissions set out in the Radio Interference Regulations of the Canadian Department of Communications.

CLASSE B **AVIS**

Cet appareil numérique ne dépasse pas les limites de la classe B au niveau des émissions de bruits radioélectriques fixés dans le Réglement des signaux parasites par le ministère canadien des Communications.

REALTIME
ARRANGER

RA-50

OWNER'S MANUAL

Thank you for purchasing the Roland Real-time Arranger RA-50. This is a completely new type device that uses high digital technology and Roland's technique for musical instruments. It will give you high quality synthesizer sounds, reverb sounds, automatic accompaniment performance, etc., resulting in a powerful one-man band system. It is designed compactly, but features excellent functions and therefore can be used by inexperienced and professional keyboard players. To make the RA-50 a long and helpful partner, read this owner's manual carefully.

■ HOW TO READ THIS OWNER'S MANUAL

This owner's manual consists of six chapters. The first chapter includes how to set up the RA-50, play the preprogrammed performance data and use the main functions.
The second chapter includes notes on handling the RA-50 and the outline.
The third chapter explains the basic functions of the RA-50.
The fourth chapter explains the more sophisticated functions of the RA-50.
The fifth chapter explains how to use a sequencer and computer with the RA-50.
The final chapter contains references (appendix); what you should do when you make a mistake, panel setting memo, MIDI implementation, index, etc.

First, read the first chapter, then the second. After that, you may go to any following chapter. When you use the RA-50 with a Roland piano (or MIDI keyboard), you do not need to read the fifth chapter.

CONTENTS

1 RA-50 ENTERTAINMENT

2 BEFORE PLAYING THE RA-50

3 BASIC PROCEDURE

5 ADVANCED PROCEDURE

6 APPENDIX (References)

1

RA-50 ENTERTAINMENT

FIRST OF ALL, EXPLORE THE RA-50.

1
Preparation for playing the RA-50

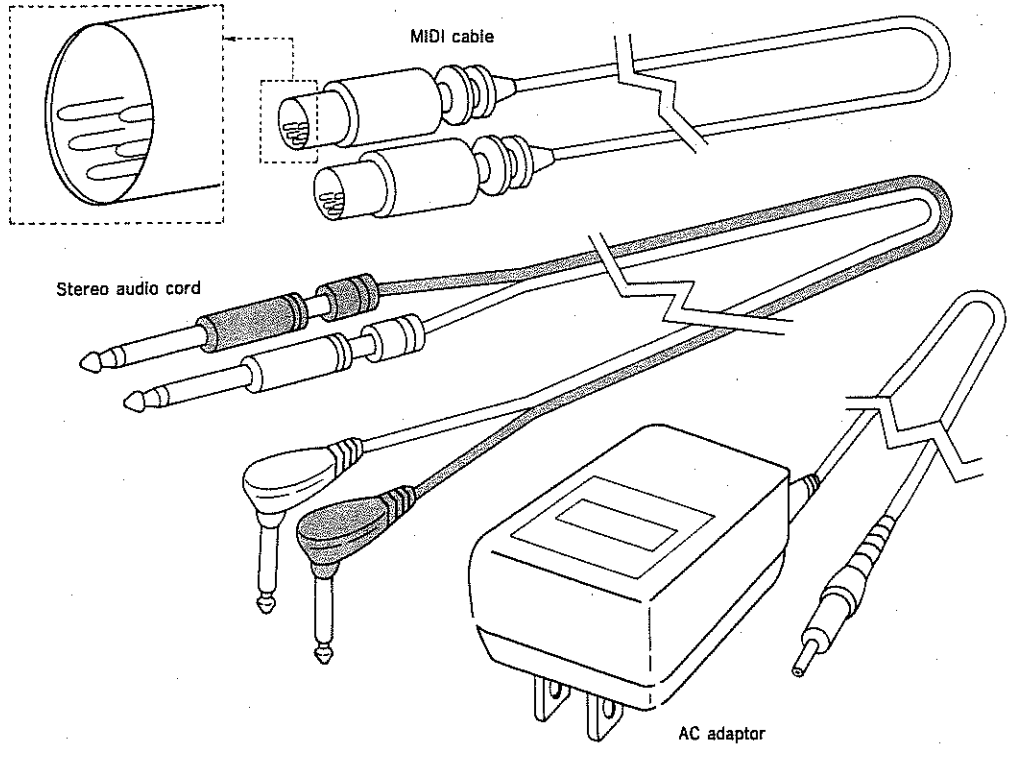
To play the RA-50, you should connect a Roland piano (or a MIDI piano or keyboard) to the RA-50 using connection cords and MIDI cables. If the keyboard does not feature input sockets or speaker, you will need an amplifier. Make connections as follows.

(1) Connection cords and cables

The following are required for setting up the RA-50 with a Roland piano.

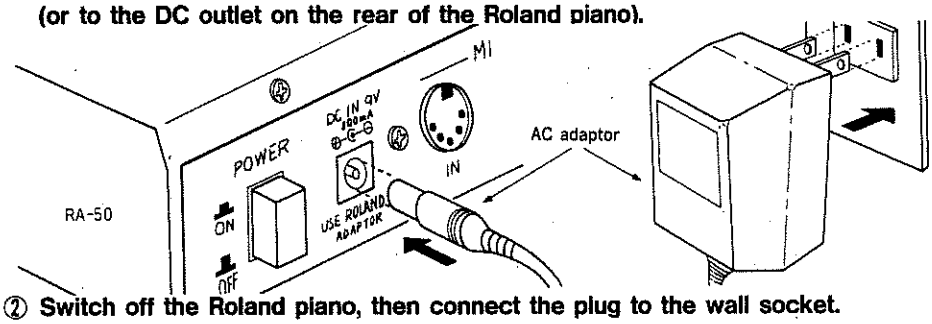
1. MIDI Cable × 2
2. Stereo Audio Cord × 1
3. AC Adaptor × 1

〈 When using a Roland piano featuring the DC outlet, prepare a DC - DC plug (PCS-25). 〉

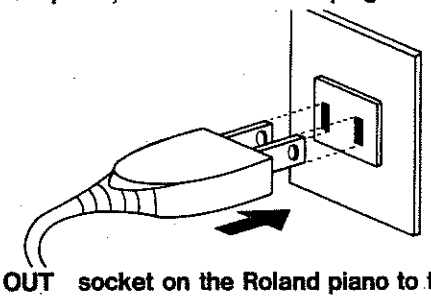


(2) Connecting the RA-50 to a Roland Piano

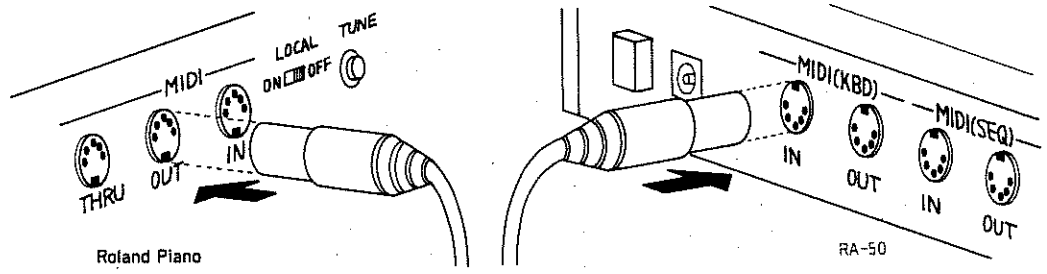
① Connect an AC adaptor (or a DC - DC plug) to the DC IN socket on the rear of the RA-50, set the power switch on the RA-50 to OFF, then insert the plug to the wall sockets (or to the DC outlet on the rear of the Roland piano).



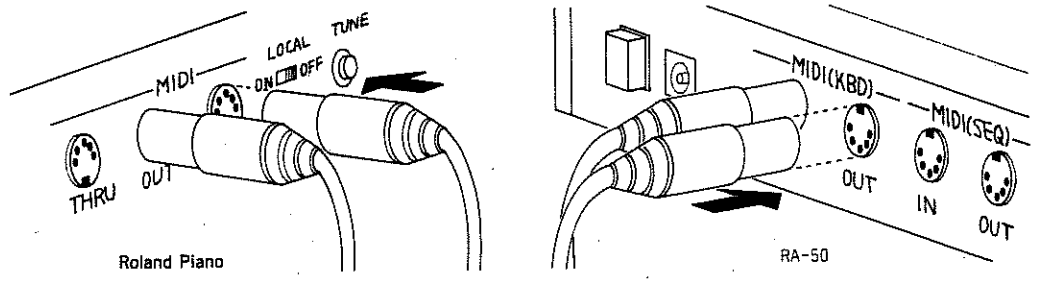
② Switch off the Roland piano, then connect the plug to the wall socket.



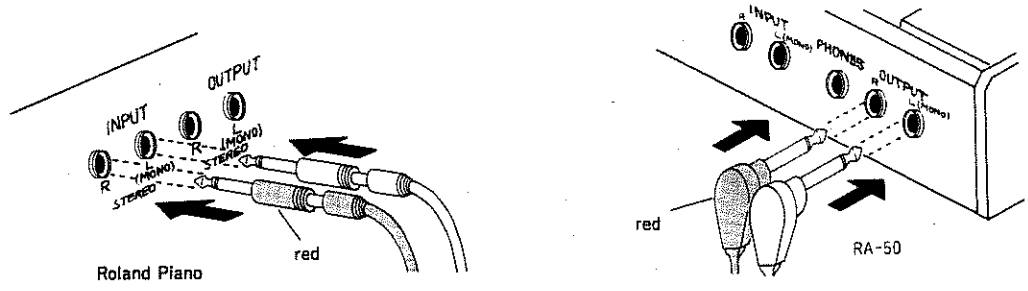
③ Connect the MIDI OUT socket on the Roland piano to the MIDI (KBD) IN socket on the RA-50 using a MIDI cable.



④ Connect the MIDI (KBD) OUT socket on the RA-50 to the MIDI IN on the Roland piano using a MIDI cable.

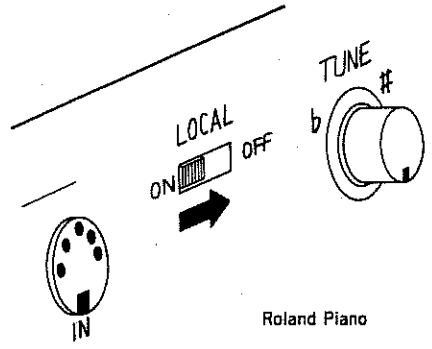


⑤ Connect the OUTPUT sockets on the RA-50 to the INPUT sockets on the Roland piano using STEREO audio cord. (Connect L to L and R to R.)

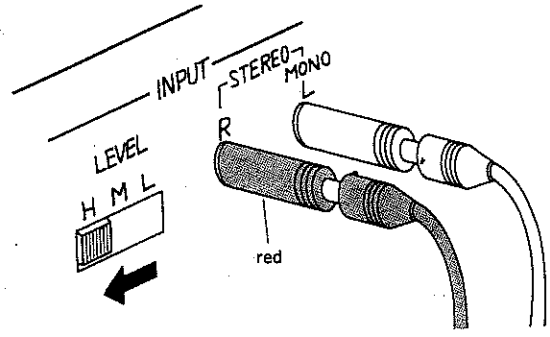


(3) Preparation on the Roland Piano (Local OFF)

① Set the Local Switch (·□:) on the Roland piano to the OFF (:) position.

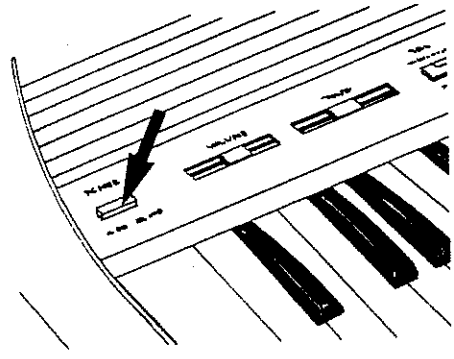


② If the piano features the INPUT LEVEL SWITCH, set it to the "H" position.

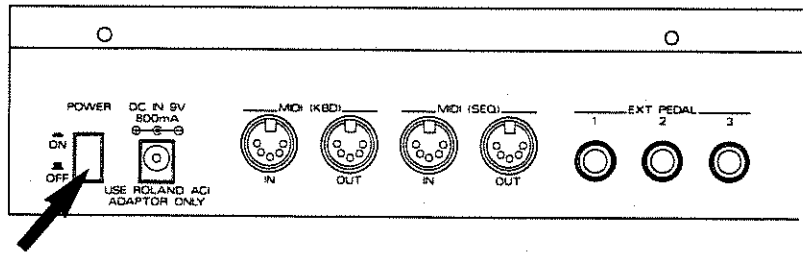


(4) Power-on

① Switch the Roland piano on.



② Set the MASTER VOLUME knob on the RA-50 to the MIN position, then switch the RA-50 on.

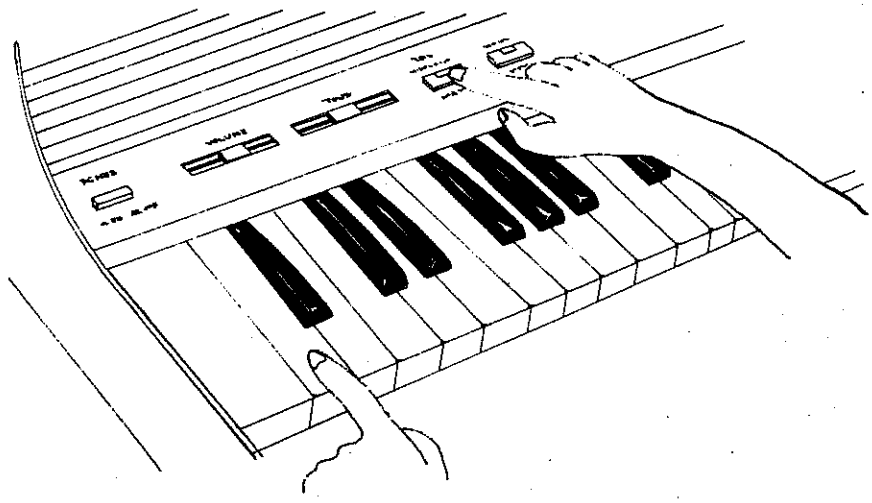


③ If you use an amplifier, switch it on.

(5) MIDI Channel Setting

The RA-50's MIDI receive channel is set to 1 from the manufacturer. Normally, a Roland piano is default to MIDI channel 1, so that you do not need to change MIDI channels. However, if the MIDI channel on the Roland piano is set to a different number, change it to 1 as follows.

●Press the far-left key on the keyboard while holding down KEY TRANSPOSE / MIDI on the Roland piano.

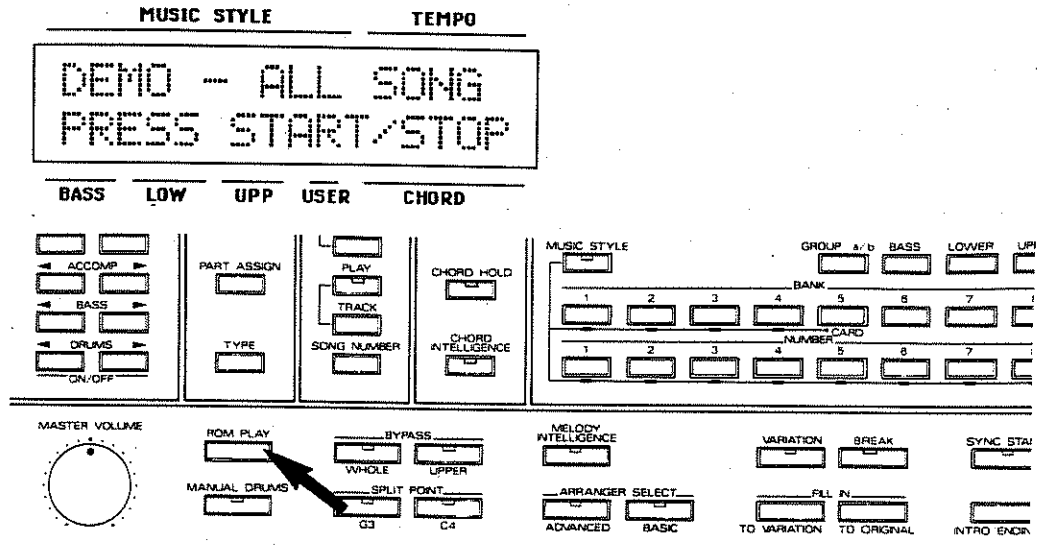


* If you are using a keyboard other than the Roland piano, read the owner's manual of the keyboard to set the MIDI channel (both channels if the keyboard can set the transmit and receive channels separately) to 1. If the MIDI channel of your keyboard is fixed to a number other than 1, read page 73 "1 Setting the MIDI Functions" in the fifth chapter to set the MIDI receive channel of the RA-50 to the same number as the keyboard.

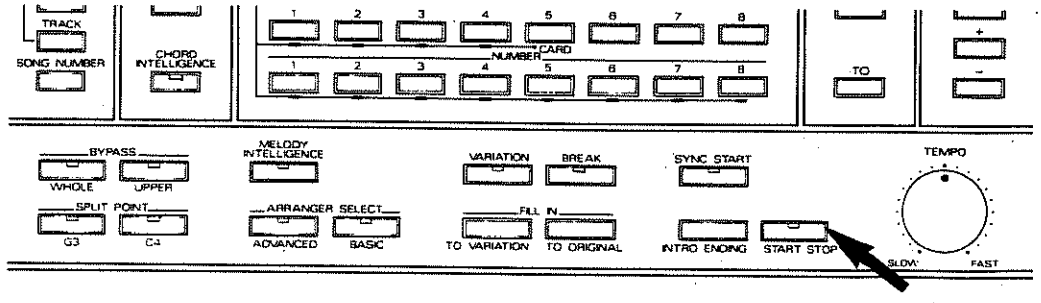
2
Playing the preprogrammed performance data (ROM Play)

Five demonstration songs are preprogrammed in the RA-50's internal memory. Playing these songs is called ROM Play in this manual.

① **Press** **ROM PLAY**.

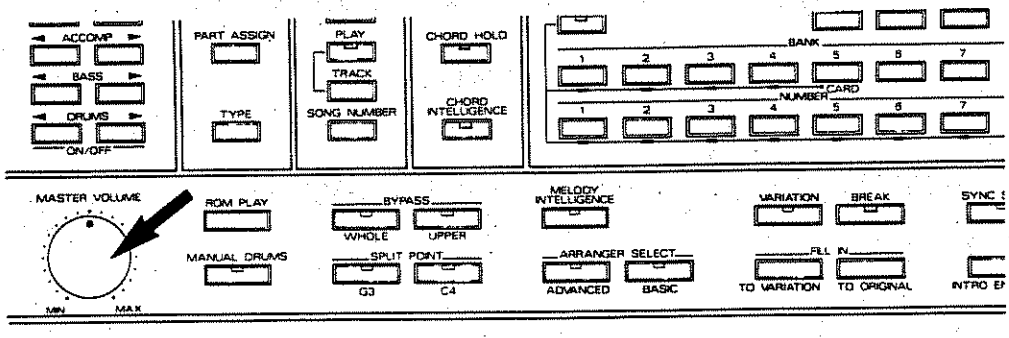


② **Press** **START/STOP**.



*If you do not press **START/STOP** quickly after pressing **ROM PLAY**, the display will return to the previous indication. To continue to play the demonstration songs, repeat steps ① and ②.

③ **Adjust the volume using the MASTER VOLUME knob on the RA-50.**

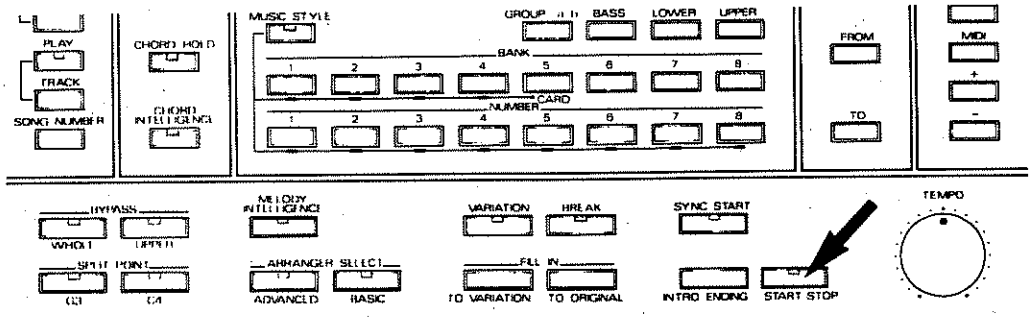


* The Master Volume knob on the Roland piano does not affect the volume of the RA-50.

* If you start ROM Play as explained above, the 1st to 5th songs are played repeatedly unless you press **START/STOP**.

* To play the second song, press **ROM PLAY** twice in step ①. Likewise, to play the third song, press **ROM PLAY** three times, and so on. In this case, the song is played only once.

* To stop ROM Play, simply press **START/STOP**.



3
Let's enjoy ensemble performance

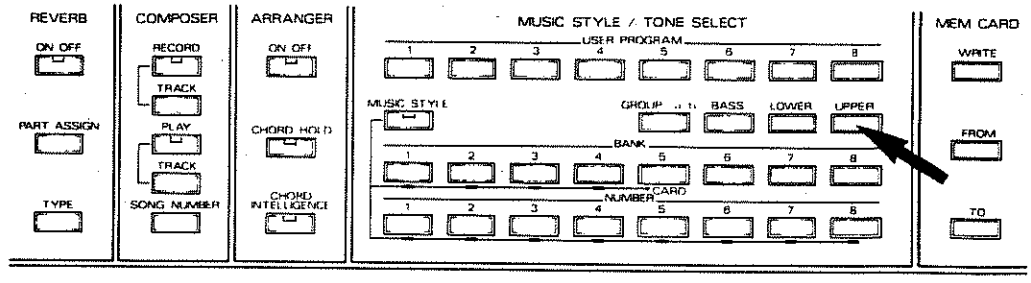
(1) Keyboard Split

When the RA-50 is switched on, the indicator located above the "C4" button in the SPLIT POINT will light up. This means that the keyboard is divided into two sections; the keyboard higher than C4 to the Upper Part (right-hand keyboard) and the keyboard lower than B3 to the Lower Part (left-hand keyboard). (For details of Split, refer to page 24 in the third chapter.)

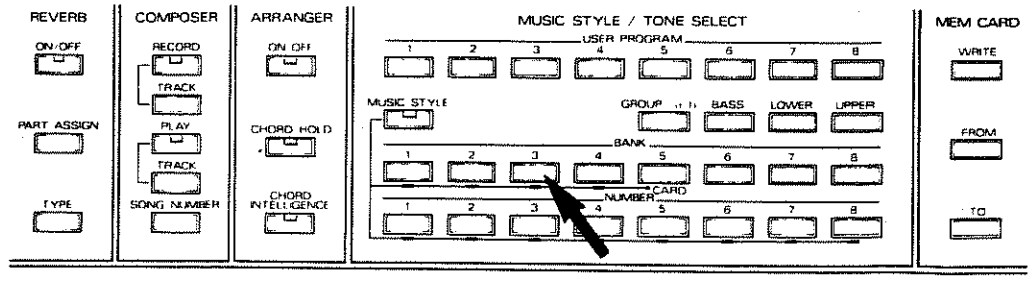
The Upper Tone is default to "11 ELEC PIANO 1", the Lower Tone to "42 STRING SECT 2" and the Bass Tone to "71 ACOU BASS 1".

Now, select "35 TROMBONE 1" for the Upper Tone and "21 ELEC ORGAN 1" for the Lower Tone to play the example score.

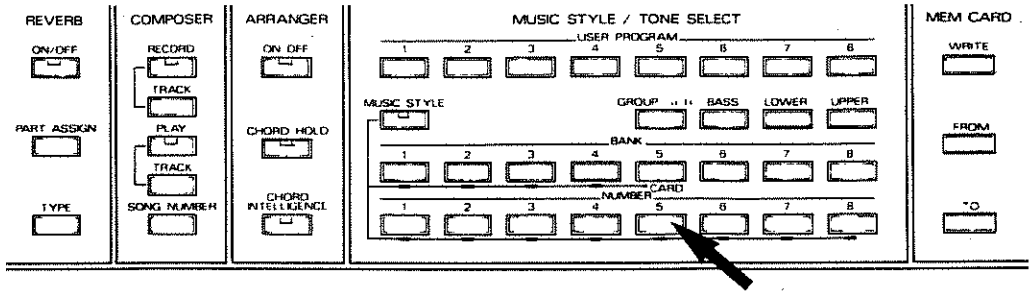
① Press [UPPER] in the MUSIC STYLE/TONE SELECT section.



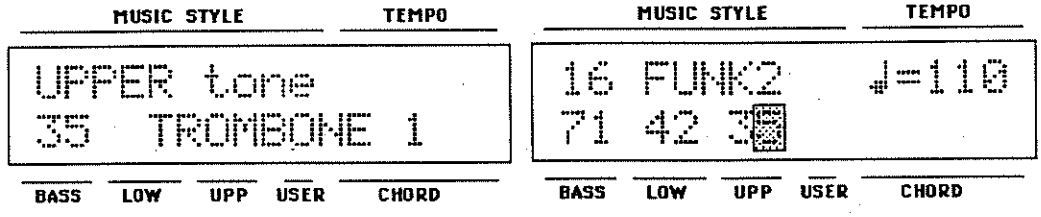
② Press BANK [3].



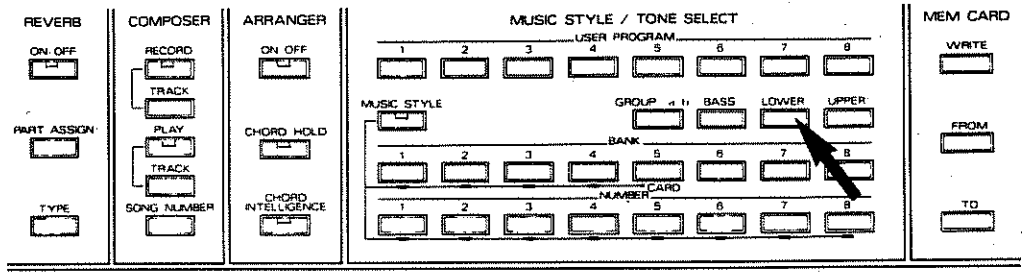
③ **Press NUMBER [5].**



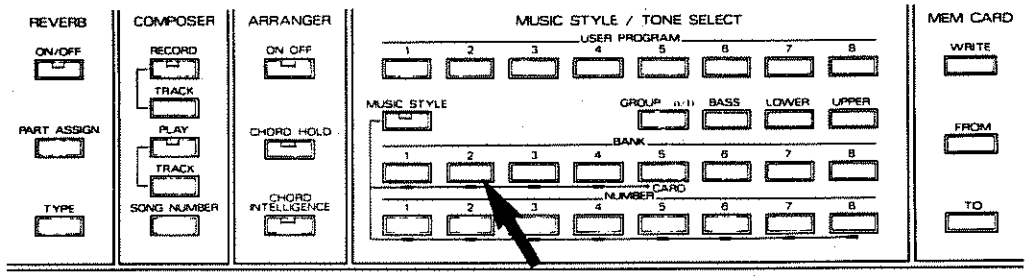
* The number of UPP in the display will change to "35". (If a different number is shown, repeat steps ② and ③.)



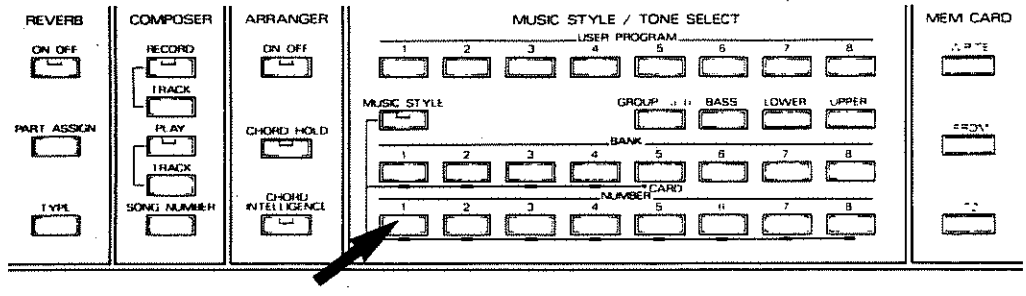
④ **Press [LOWER] that is located next to [UPPER].**



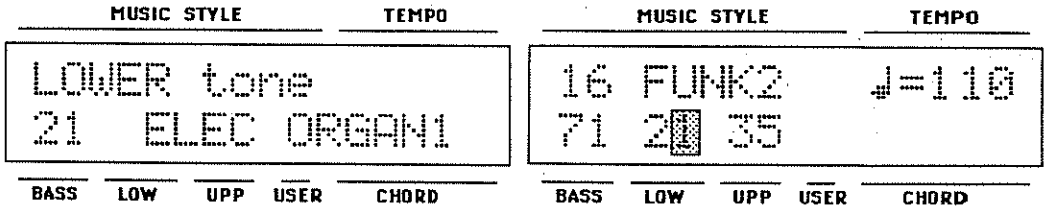
⑤ **Press BANK [2].**



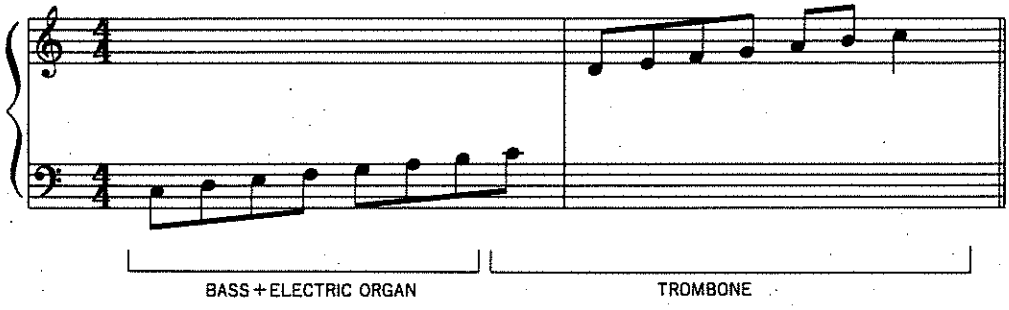
⑥ **Press NUMBER [1].**



* The number of LOW in the display will change to "21". (If a different number is shown, repeat steps ⑤ and ⑥.)



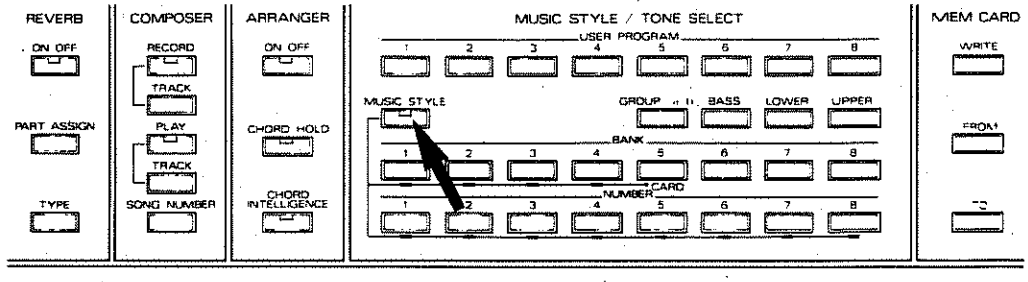
⑦ Play the keyboard.



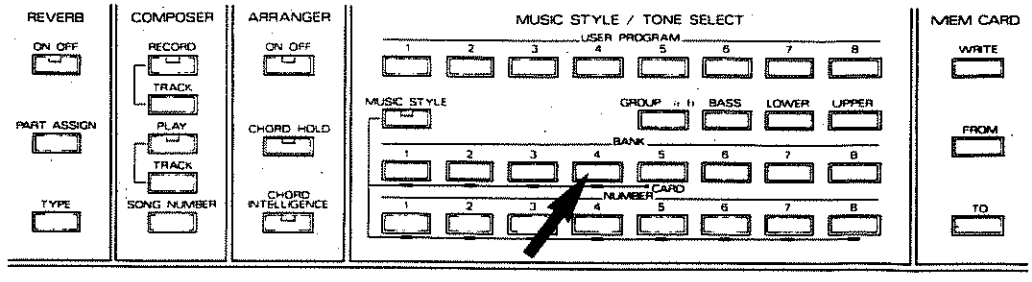
(2) Listening to the rhythm

Various different rhythms can be played on the RA-50. Now, we play "44 CHA CHA" rhythm.

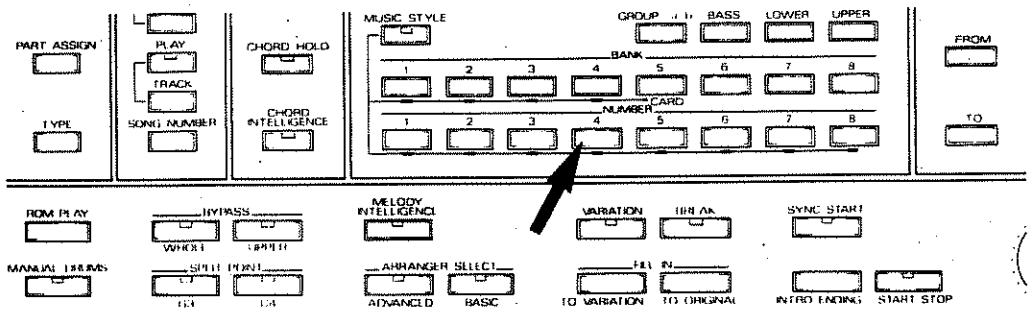
① Press MUSIC STYLE.



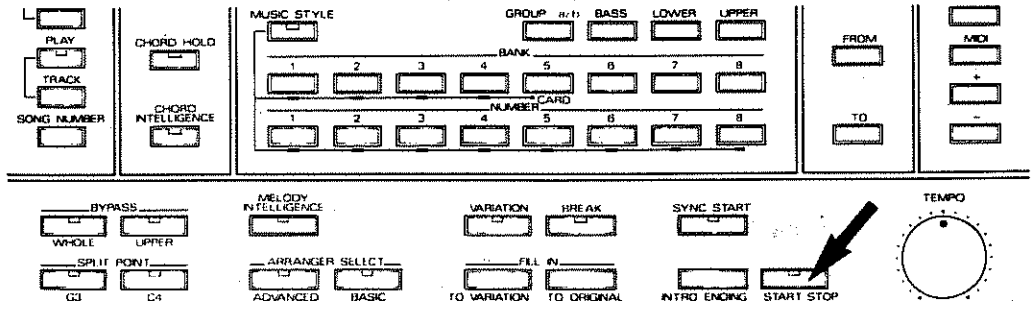
② Press BANK 4.



③ **Press NUMBER [4].**



④ **Press [START/STOP].**



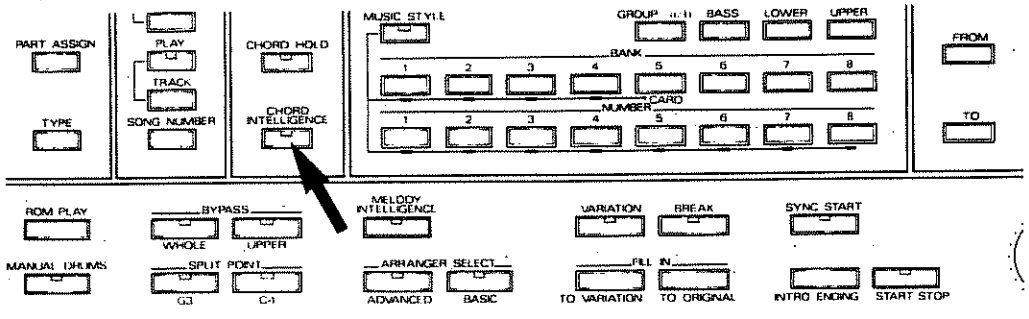
*A desired rhythm can be selected using the 1 to 4 BANK buttons and 1 to 8 NUMBER buttons. You may play different rhythms. For details of rhythm, refer to page 29 in "2 Rhythm and Music Style" in the third chapter.

(3) Accompaniment

a. Chord Intelligence

This function can distinguish the chord by playing only a part of a chord.

① **Press [CHORD INTELLIGENCE] and make sure that the indicator lights up.**



② **Press ARRANGER [ON/OFF] and make sure that the indicator lights up.**

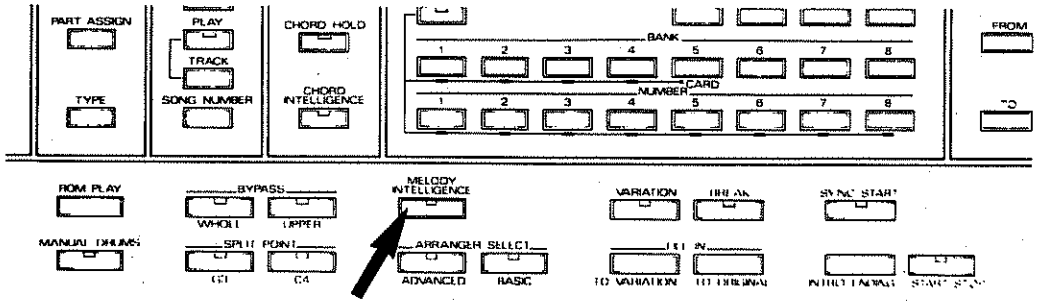
③ **Press [SYNC START]**

④ **Play the piano (Lower Part).**

b. Melody Intelligence

Now, you can add harmony to the melody played in single note.

① **Press** MELODY INTELLIGENCE **and make sure that the indicator lights up.**



② **Play the chord with the left hand (naturally, the Chord Intelligence function can be used) and play the melody with the right hand.**

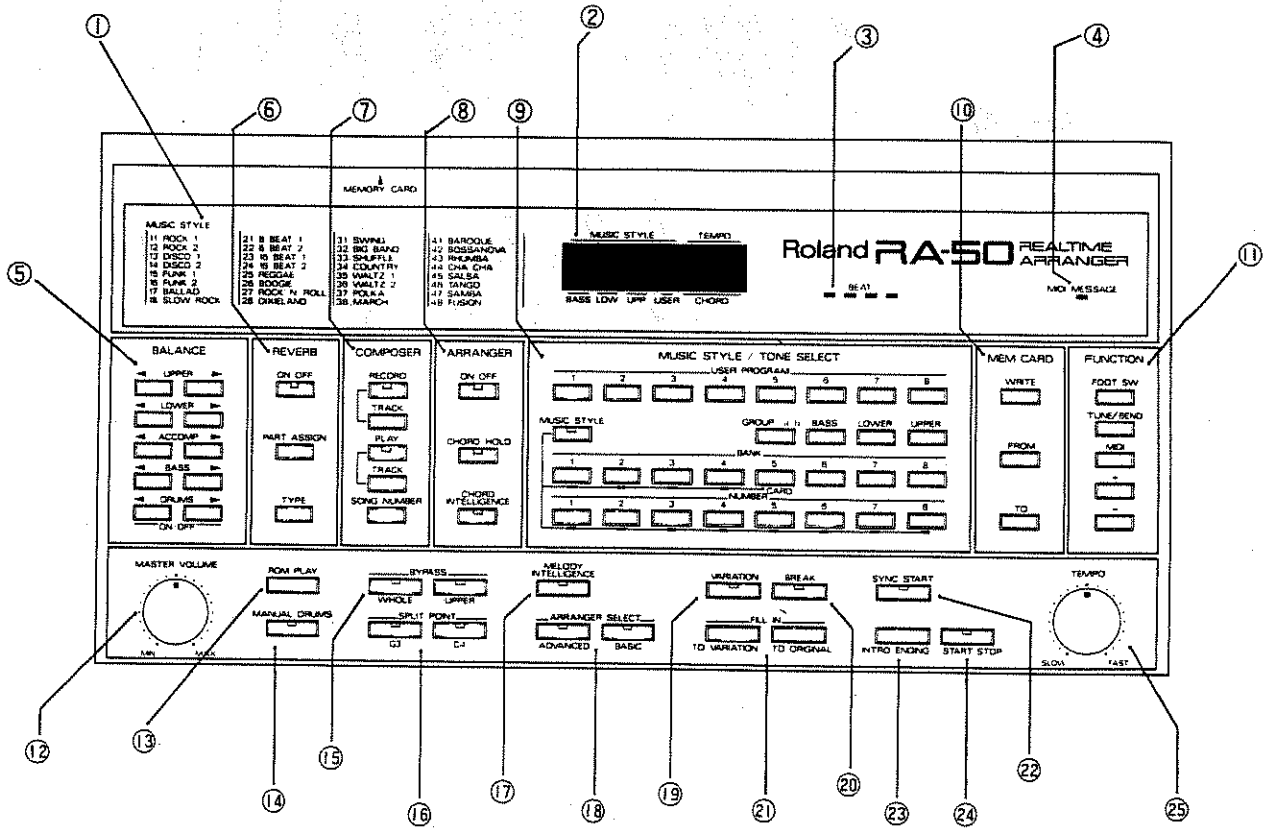
2

BEFORE PLAYING THE RA-50

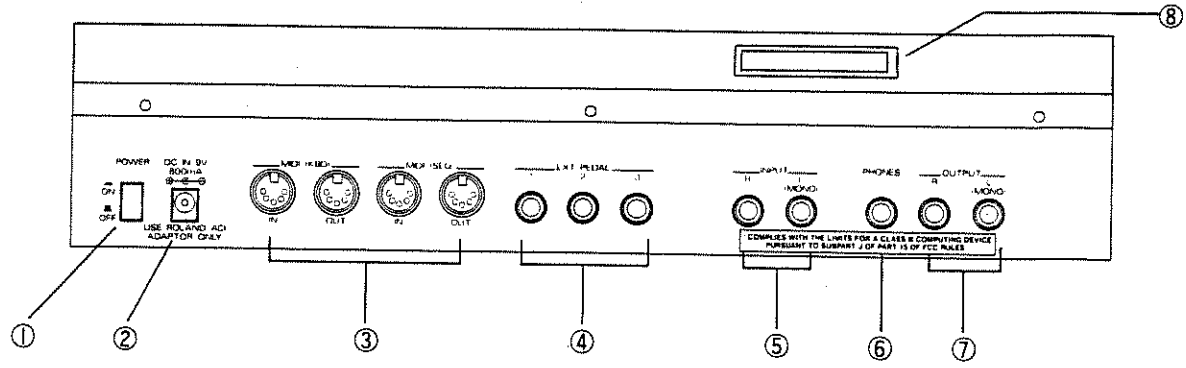
TO USE THE RA-50 IN THE BEST CONDITION.

1
Panel Description

(1) Front Panel



(2) Rear Panel



●Front Panel

① **Music Style List**
② **Display**……shows the current condition of the RA-50 or instructions for you to follow.
③ **Beat Indicator**……the indicator flashes to tell you what beat is carrently being played.
④ **MIDI Message Indicator**……this lights when any MIDI messages are received.
⑤ **BALANCE**……controls the volume of each Part for ensemble performance.
⑥ **REVERB (Reverberation)**……controls the reverb effect.
⑦ **COMPOSER**……use this for recording or playing back your performance data.
⑧ **ARRANGER**……this allows you to select an ideal auto-accompaniment that suits the played chord and selected Music Style.
⑨ **MUSIC STYLE/TONE SELECT**……use this to select a desired Music Style (music genre) and Tone.
⑩ **MEM CARD**……use this for saving data onto a memory card or loading data on a memory card back to the RA-50 memory.
⑪ **FUNCTION**……this allows you to set parameters related with foot switch, tuning, pitch bend and MIDI.
⑫ **MASTER VOLUME knob**……this controls the volume. The headphones volume is also controlled with this knob.
⑬ **ROM PLAY**……used this to play the five preprogrammed demonstration songs.
⑭ **MANUAL DRUMS**……you can enjoy drum solo performance by playing the keyboard.
⑮ **BYPASS**……you can select whether to play the RA-50's built-in sound module or the sound source of the connected keyboard.
⑯ **SPLIT POINT**……this determines the position where the keyboard is splited into two parts, Upper and Lower.
⑰ **MELODY INTELLIGENCE**……this can add harmony to the melody you play (in the Split mode).
⑱ **ARRANGER SELECT**……this selects an accompaniment type (Basic or Advanced).
⑲ **VARIATION**……this selects the advanced type accompaniment.
⑳ **BREAK**……this makes a space of silence in the middle of a performance.
㉑ **FILL IN**……this can put fill in in the middle of a song.
㉒ **SYNC START**……this starts playing the moment you play the keyboard.
㉓ **INTRO/ENDING**……this inserts specific patterns at the beginning and end of the performance.
㉔ **START/STOP**……this starts or stops playing.
㉕ **TEMPO knob**……this changes the tempo of song.

● Rear Panel

① **POWER**……this switchs on or off the unit.
② **DC IN**……connect an AC adaptor to this socket.
③ **MIDI Sockets**……these are MIDI sockets to connect an external MIDI device.
④ **EXT PEDAL**……connect a foot switch (optional : DP-2/6, FS-5U) to this socket.
＊A foot switch (unlatch type), damper pedal or pedal switch will function in exactly the same way on the RA-50.
⑤ **INPUT**……this receives audio signal from an external device, mix it with the audio signal of the RA-50 itself, then output the mixed signal from the OUTPUT socket.
⑥ **PHONES (headphones) socket**……connect headphones to this socket.
⑦ **OUTPUT**……this output the RA-50's audio signal.
⑧ **MEMORY CARD slot**……insert a MUSIC STYLE CARD (optional : TN-SC1-01 ~ 07, etc.) or MEMORY CARD (optional : M-256E) to this slot.

2
Important Notes

●When employing an AC adaptor, make certain you use only one that has been supplied by the manufacturer. Use of any other power adaptor could result in malfunction or damage.

●When you make any connections with other devices, always turn off the power to all equipment first. This will help in preventing malfunction, and damage to speakers.

●Do not force the unit to share the same power outlet as one used for distortion producing devices (such as motors, variable lighting devices). Be sure to use a separate power outlet.

●Before using the AC adaptor, always make certain the voltage of the available power supply conforms to its rating.

●Do not place heavy objects onto, step on, or otherwise risk causing damage to the power cord.

●Whenever you disconnect the AC adaptor from the outlet, always grasp it by plug, to prevent internal damage to the cord and hazard of possible short circuits.

●If the unit is not to be used for a long period of time, unplug the cord from the socket.

●Avoid using or storing the unit in the following places, as damage could result.

○Places subject to extremes in temperature. (Such as under direct sunlight, near heating units, above equipment generating heat, etc.)

○Places near water and moisture. (Baths washrooms, wet floors, etc.) Places otherwise subject to high humidity.

○Dusty environments.

○Places where high levels of vibration are produced.

●Placing the unit near power amplifiers or other equipment containing large transformers may induce hum.

●Should the unit be operated nearby television or radio receivers, TV pictures may show signs of interference, and static might be heard on radios. In such cases, move the unit out of proximity with such devices.

●For everyday cleaning, wipe the unit with a soft dry cloth, or one that is dampened slightly. To remove dirt that is more stubborn, wipe using a mild, neutral detergent. Afterwards, make sure to wipe thoroughly with a soft cloth.

●Never apply benzene, thinners, alcohol or any like agents, to avoid the risk of discoloration and deformation.

●Protect the unit from strong impact

●Avoid getting any foreign objects(coins,wire, etc.) or liquids (water,drinks, etc.)into the unit.

●NEVER apply strong pressure to the display, or strike it in any way.

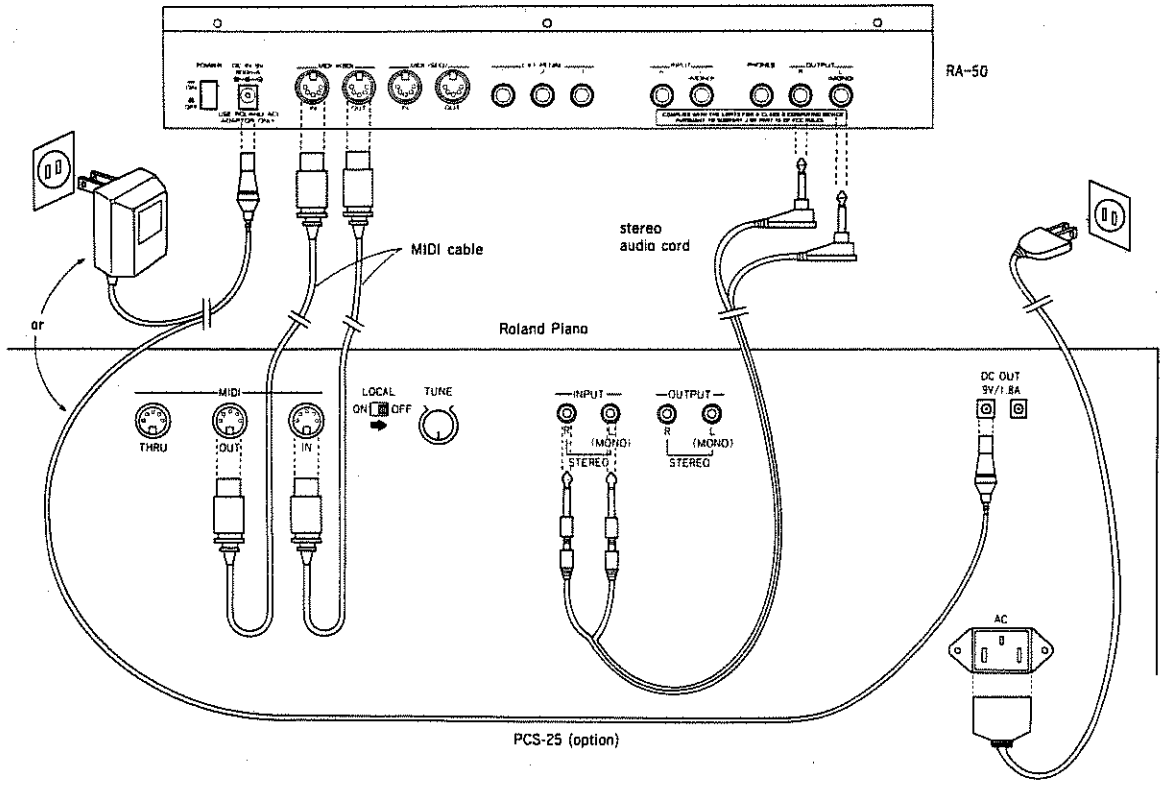
●At any time that you notice a malfunction, or otherwise suspect there is damage, immediately refrain from using the unit. Then contact the store where bought, or the nearest Roland Service Station.

●Within the unit is contained a battery which serves in maintaining the contents of memory while the main power is off. The normal life of this battery is 5 years or more, but it is strongly recommended that you change it every 5 years as a rule. When it is time to change the battery, contact a Roland Service Station. The first time you need to change the battery could occur before 5 years have passed.

●When the battery gets weak the following will appear in the display. By this time,it is possible that the contents of memory have already been lost.
"CHECK INTERNAL BATTERY"

●Please be aware that the contents of memory may at times be lost ; when sent for repairs or when by some chance a malfunction has occurred. Important data should be saved on an optional memory card (M-256E), or written down on paper. During repairs, due care is taken to avoid the loss of data, however, in certain cases, such as when circuitry related to memory itself is out of order, we regret that it may be impossible to restore the data.

3
Connections



The MIDI receive channel of the RA-50 has been set to "1" from the manufacturer. Normally, a Roland piano is default to MIDI channel 1, so that you do not need to change MIDI channels. However, if the MIDI channel on the Roland piano is fixed to a different number, change the Upper and Lower's receive channels on the RA-50 to 1 as explained on page 72 "1 Setting MIDI Functions" in chapter 5.

Even when the piano is set to Local OFF, the Bypass function allows you to play the piano on its own without switching the RA-50 off. (For detailed explanation, read page 72"1 Setting the MIDI Functions" in chapter 5.)

If the RA-50 is not correctly tuned to the connected piano, the pitch of the sound created by piano with the Bypass function on will differ from the RA-50's. How to adjust the RA-50's tuning is explained on page 65 "(1) Tuning" in chapter 4.

When you disconnect the RA-50 from the piano and play the piano on its own, return the Local Switch on the piano to the ON position.

4
Outline of the RA-50

(1) What is the RA-50 ?

RA-50 is an arranger that arranges the music you play on your electronic piano or MIDI keyboard. It also features various sounds such as a guitar, violin, trumpet, bass and drums, and therefore can become a player. In other words, it is an orchestra with a conductor that allows you to play melody or ad-lib to the excellent accompaniment.

You may consider it difficult to create music or compose a song. When you wish to make a song from the melody you happen to hear, you cannot think of how to make the accompaniment, how to play the phrase, how to play the drums, etc. Now that you have the RA-50, there is nothing to worry about. Simply select the music genre you like, give the melody and chord process, and the RA-50 will arrange it and add excellent accompaniment and harmony, if you like. The RA-50 is not only intelligent as above but also is an excellent player. The RA-50 adopts the LA synthesis which is greatly supported by professional musicians in the D-50 and other D-series, and therefore creates high quality sounds; from realistic acoustic sounds to synthesizer sounds. It also includes a digital reverb that creates natural reverberation of a large hall. The RA-50 can record your performance just like a tape recorder, so that you can record the melody that comes in your mind or the song you have arranged.

The RA-50's is an instrument that features great many functions. With the RA-50 and a piano, you can stand on a stage in a large hall as a keyboard player, and the RA-50 will take parts of an arranger and conductor.

(2) About "Music Style"

Music Style in this manual means accompaniment pattern that varies depending on the music genre. That is, changing the Music Style, you can use different accompaniments. Each Music Style has a name, such as Rock, Disco, Bossanova, Samba, etc.

One Music Style has Advanced and Basic types and each type has two variations, therefore, by selecting a Music Style, you can play four types of accompaniments. The accompaniment patterns change depending on the chord constructions, creating natural accompaniment along with the music. Advanced Music Style is more sophisticated accompaniment compared with the Basic. A Music Style contains patterns for two patterns of Fill in, Intro and Ending. It also contains a Tone and Tempo that match the accompaniment, so that selecting a Music Style will cover everything for successful performance.

3

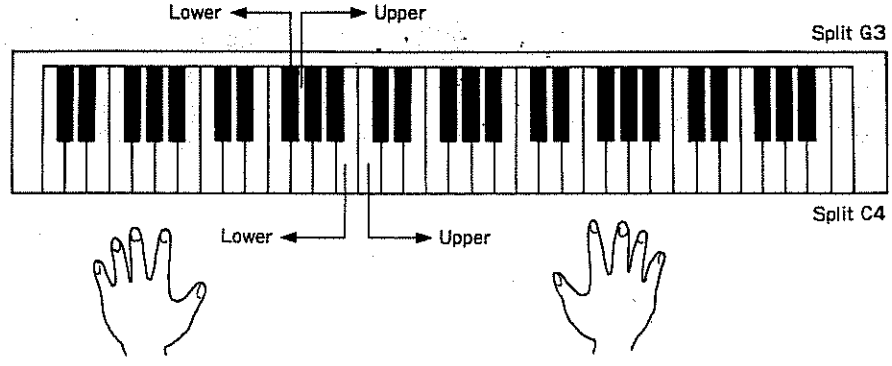
BASIC PROCEDURE

ENJOY THE RA-50 THROUGHLY.

1
How to enjoy the Split Performance

(1) Split Function and Tone Assignment

Using the RA-50's Split function, you can enjoy ensemble performance with different Tones assigned to the upper (right-hand) and lower (left-hand) keyboard.
The keyboard is divided into two sections at the Split Point where the indicator is lit. The upper keyboard includes the Split Point.



* Normally, the Split Point is set to C4 at power up. This means that the right keyboard including C4 key is the Upper Part and the left keyboard from B3 key is the Lower Part.

●To change the Split Point to G3, press [G3] . The relevant indicator lights up. Now, the right keyboard from G3 key is the Upper Part and the left keyboard from F#3 key is the Lower Part.

●To cancel the Split and use the entire keyboard with one Tone, press the button currently lit.

(2) Tone List

TONE #		TONE NAME
1	A 11	Electric Piano 1
2	A 12	Electric Piano 2
3	A 13	Electric Piano 3
4	A 14	Honkytonk
5	A 15	Harpsichord 1

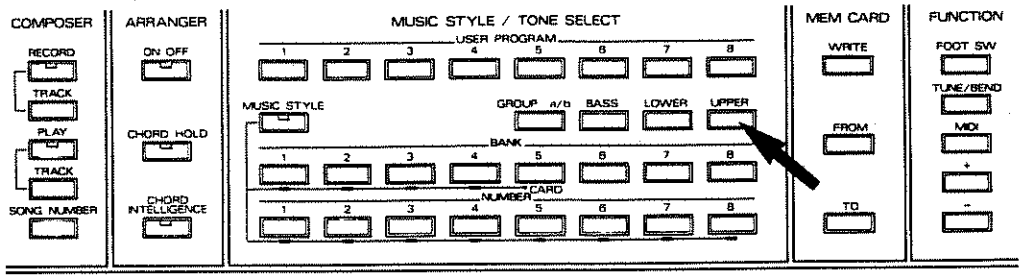
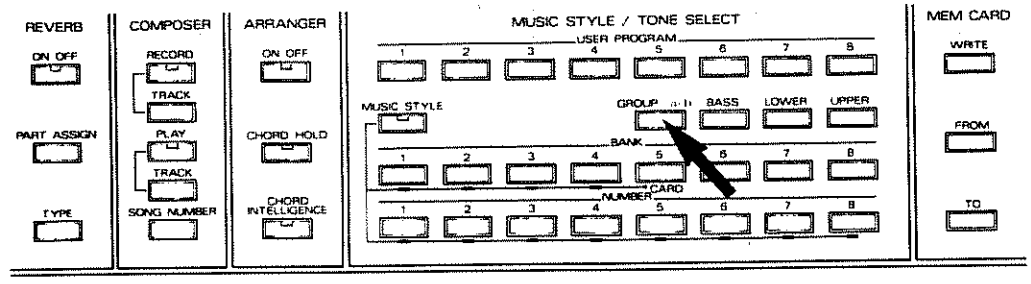
(3) Tone Selection for Upper Part

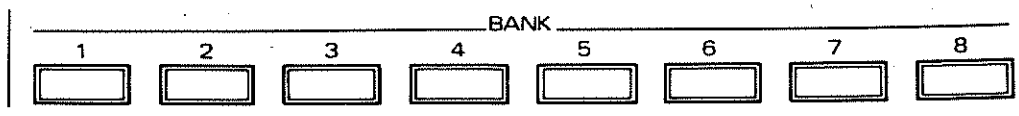
① **Press [UPPER] in the MUSIC STYLE/TONE SELECT section.**



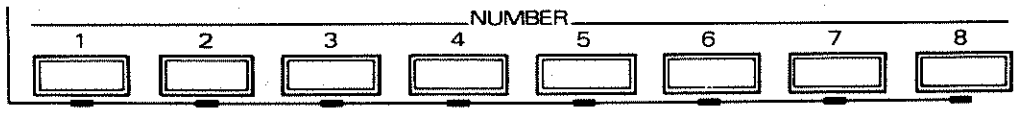
② **Press [GROUP a/b].**



③ **A Tone is represented with a two figure number. Press the BANK button for the left figure. (Press Bank button 2 if the Tone Number is 25).**

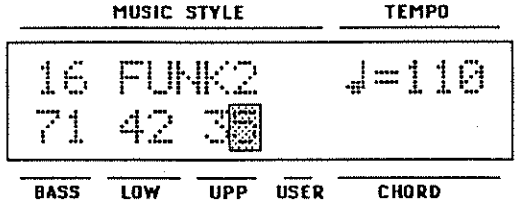


④ **Press the NUMBER button for the right figure. (Press Number button 5 if the Tone Number is 25.)**



* The number shown above UPP in the display is the selected Tone. (If you do not proceed the above steps quickly, the display will return to the previous indication. If this happens, repeat steps ②, ③ and ④.)

* While the cursor is flashing at the UPP position in the display (after [UPPER] is pressed), you can change Upper Tones by taking steps ②, ③ and ④.

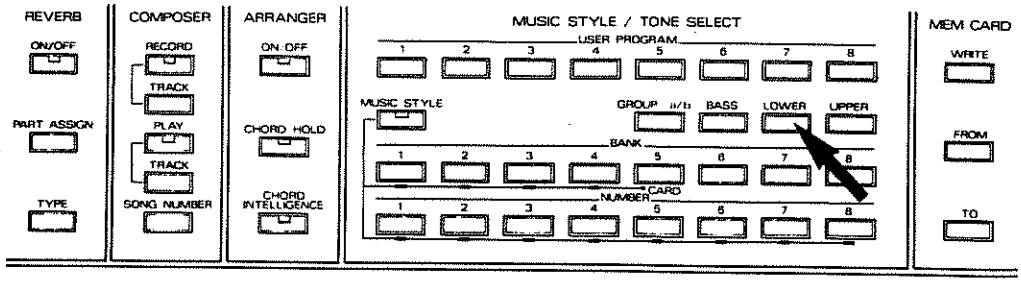


NOTE) The flashing position in the display is called cursor.

* You may take steps ②, ③ and ④ in a different order.

(4) Tone Selection for Lower Part

① Press [LOWER] in the MUSIC STYLE/TONE SELECT section.

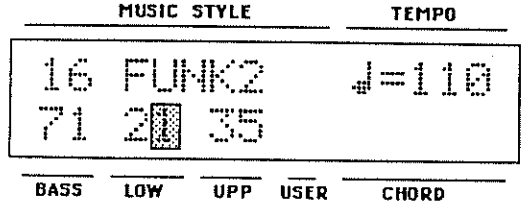


② Press the BANK button to select a Tone.

③ Press the NUMBER button.

* The number shown above LOW in the display is the new Tone Number. (If you do not proceed the above steps quickly, the display will return to the previous indication. If this happens, repeat steps ② and ③.)

* While the cursor is flashing at the LOW position in the display (after [LOWER] is pressed), you can change Lower Tones by taking steps ② and ③.



* You may take steps ② and ③ in a different order.

(5) Notes on tone selecting

* Any of the 128 different Tones can be used for the Upper Tone.

* Any of the 128 different Tones can be used for the Lower Tone.

* Both Upper and Lower Tones can be changed even while music is being played.

● Any of the 128 different Tones can be used for the Bass Tone. Press [BASS] in the MUSIC STYLE/TONE SELECT section, then use the BANK and NUMBER buttons to assign the Tone Number. However, when the rhythm has been started with the Arranger function on, the Tone that is assigned to the Music Style currently used will be automatically used for the Bass, and you cannot use any other Tone. (For detailed explanation about the Arranger function, see page 35 "Arranger" in chapter 3, and about the Music Style, read the following "2 Rhythm and Music Style".

2
Rhythm and Music Style

There are various different music genres, such as Classical music, Jazz, Rock etc. There are some common features for all music in the same genre. Rhythm is one of the common features. Rhythm, tempo and accompaniment instrument and arrangement will determine the music. Music Style consists of all these elements.

Four Elements included in a Music Style

Rhythm.
Tempo that matches the rhythm (Preset Tempo).
Accompaniment instrument that matches the rhythm (Tone).
Arrangement that matches the rhythm (Arranger).

The RA-50 is accompanied with 32 different Music Styles (4 Banks × 8 Numbers : the same number as the rhythms). Youmany use the optional Music Style Card to extend the number of Music Styles.

If you select a Music Style with the Arranger function off, the rhythm and tempo that matches the rhythm will be automatically set. Playing the Music Style will play only the rhythm with the preset tempo like a rhythm machine. (You can play the keyboard to the rhythm, if you like.) If you select a Music Style with the Arranger function on, the four elements will be automatically set. Therefore, complete form of the performance will be automatically played. This is called "Style Performance".

A Music Style includes bass/chord/accompaniment for the use of drum pattern/basic tempo and arranger. Also, a basic rhythm (original) and modified rhythm (variation) are set for the drum pattern and a basic arrange type (basic) and advanced type (advanced) are set for the accompaniment. Therefore, a Music Style can be played in four different variations, that is, 128 different patterns are prepared in the internal memory of the RA-50.

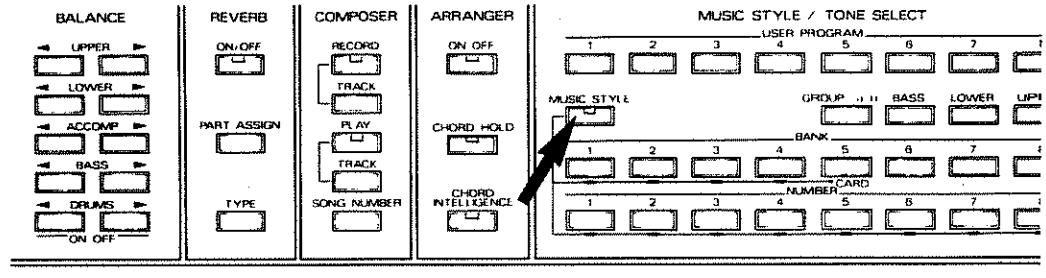
(1) Music Style List

11 ROCK 1	21 8 BEAT 1	31 SWING	41 BAROQUE
12 ROCK 2	22 8 BEAT 2	32 BIG BAND	42 BOSSANOVA
13 DISCO 1	23 16 BEAT 1	33 SHUFFLE	43 RHUMBA
14 DISCO 2	24 16 BEAT 2	34 COUNTRY	44 CHA CHA
15 FUNK 1	25 REGGAE	35 WALTZ 1	45 SALSA
16 FUNK 2	26 BOOGIE	36 WALTZ 2	46 TANGO
17 BALLAD	27 ROCK'N'ROLL	37 POLKA	47 SAMBA
18 SLOW ROCK	28 DIXIELAND	38 MARCH	48 FUSION

The same Music Style List is shown at the upper left on the front of the RA-50.

(2) Selecting a Music Style

① **Press** **MUSIC STYLE** .



② **Select a Music Style using a BANK button (1 ~ 4) and NUMBER button (1 ~ 8).**

* You can press either of the BANK or NUMBER button first.

* When the cursor has been moved to the position of the Music Style Number using **MUSIC STYLE**, a different Music Style can be selected simply by taking step ②.

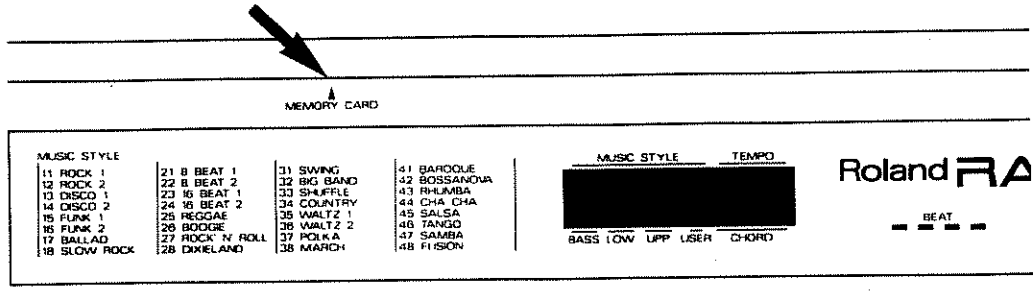
* To select a Music Style in the internal memory of the RA-50, only 1 to 4 BANK buttons can be used.

* Even while a Music Style is being played, you can select a different Music Style. However, the tempo remains unchanged.

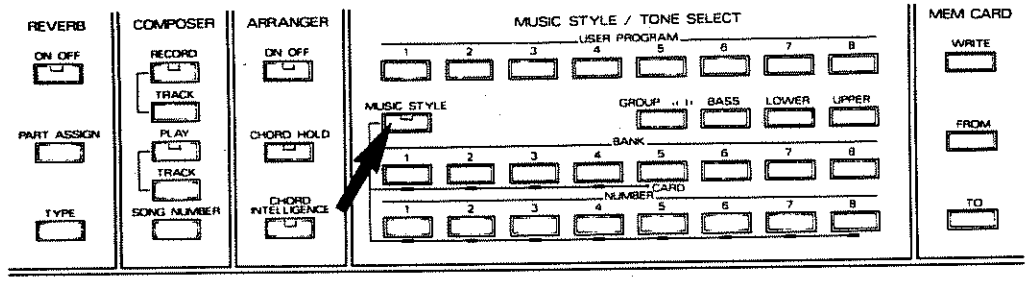
(3) Music Style Card

The RA-50's internal memory stores 32 different Music Styles. The optional music style card (TN-SC1-01 ~ 07, etc.) allows you to use even more Music Styles. The Music Styles loaded from the Music Style Card can be played in the same way as the internal ones.

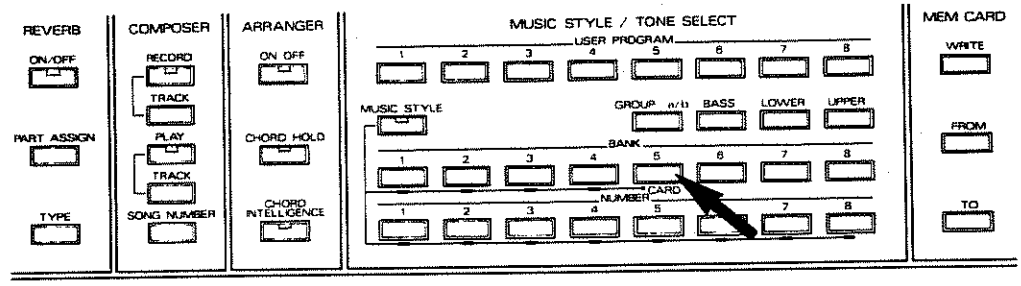
① Insert the Music Style Card into the card slot on the RA-50.



② Press [MUSIC STYLE].



③ Press BANK button [CARD 5].



④ Assign the Music Style you wish to play using the appropriate NUMBER button.

*If you use a Music Style Card storing four rhythms, 1 to 4 patterns are exactly the same as 5 to 8 patterns.

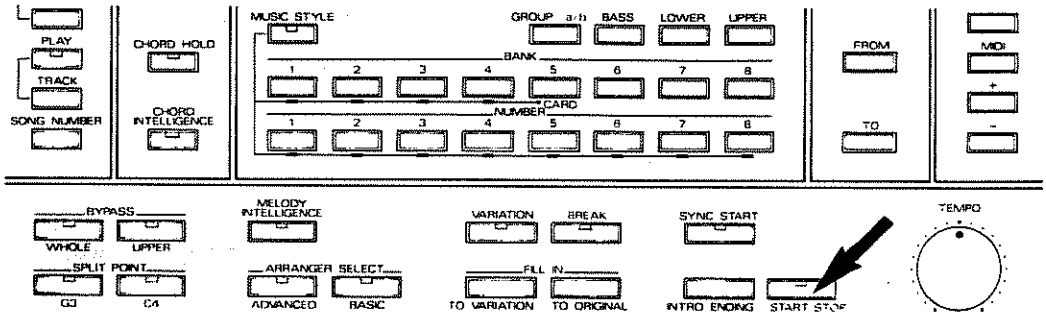
(4) Starting the Music Style

There are four different methods of starting to play a Music Style.

a. Immediate start

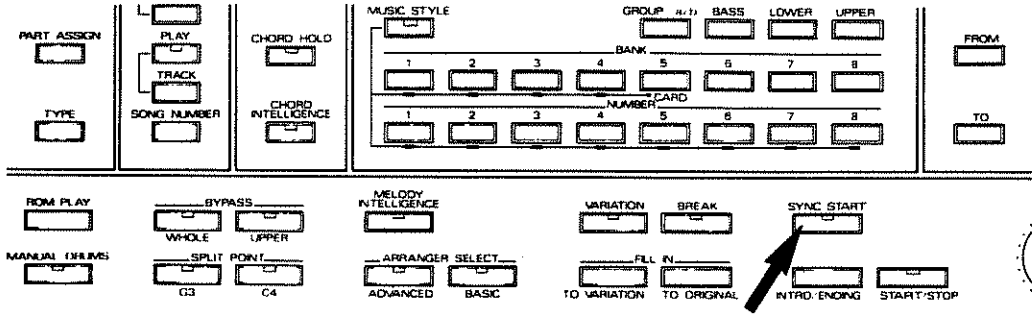
① **Press** **START/STOP**.

The moment the button is pressed, the rhythm starts playing.



b. Sync start

① **Press** **SYNC START**.



② **Play the keyboard on the Lower Part.**

The moment you play the keyboard, the rhythm starts playing.

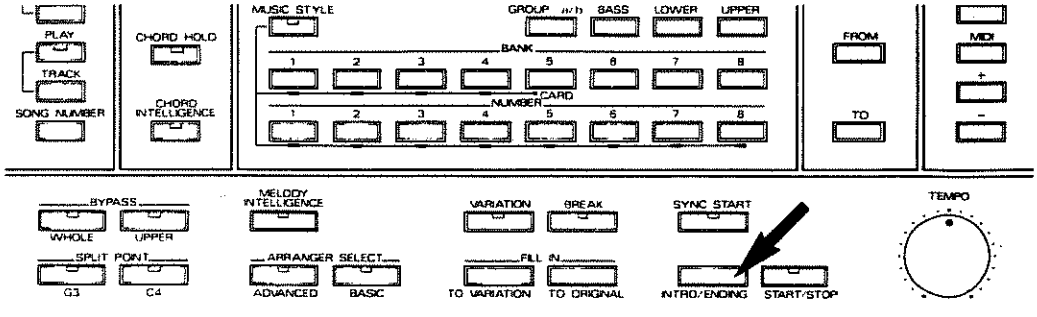
* In the Sync Start Stand-by condition (right after the **SYNC START** is pressed), the Sync Indicator lights up, and it goes out the moment the rhythm starts.

* You can also start the rhythm by pressing the **START/STOP** button.

c. Start with Intro

① **Press** **INTRO/ENDING**.

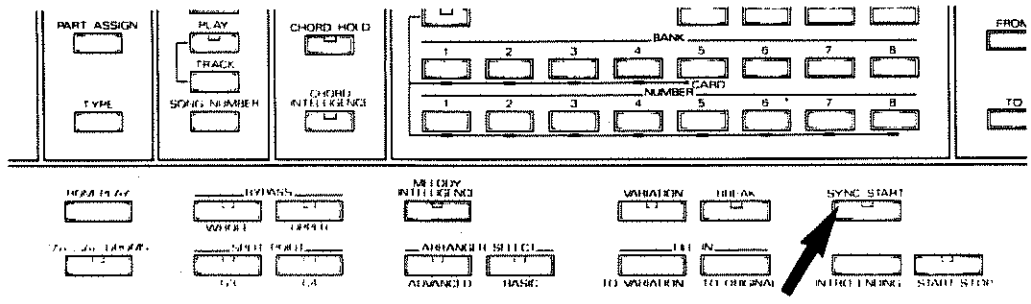
The moment the keyboard is played, the rhythm starts with intro.



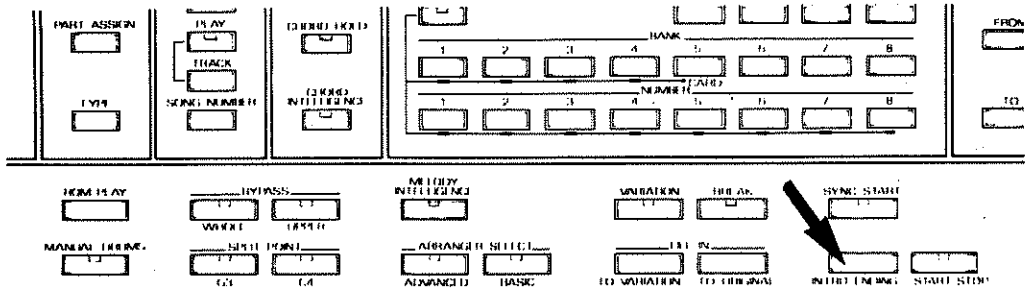
* The length of the Intro varies depending on the Music Style you select.

d. Sync start with intro

① Press **SYNC START**.



② Press **INTRO/ENDING**.



③ **Play the keyboard on the Lower Part.**

The moment the keyboard is played, the rhythm starts with intro.

* In the stand-by condition (right after **SYNC START** is pressed), the Sync Indicator lights up, and it goes out the moment the rhythm starts.

* You can also start the rhythm by pressing the **START/STOP** button.

* The length of the intro varies depending on the Music Style you select.

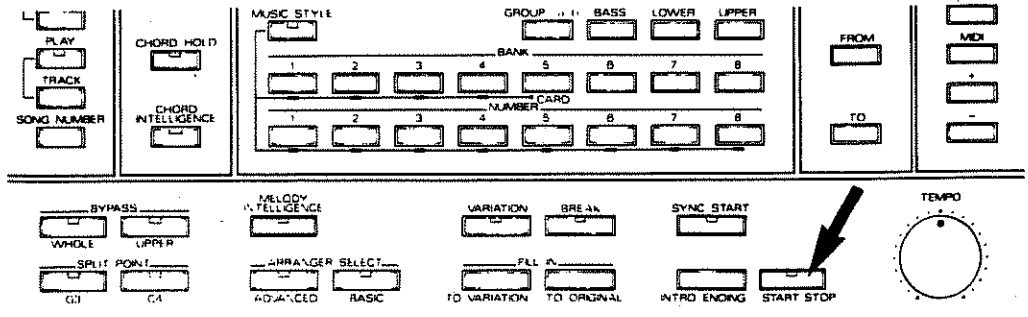
(5) Stopping the Music Style

There are two methods of stopping the Music Style.

a. Immediate start

① Press **START/STOP**.

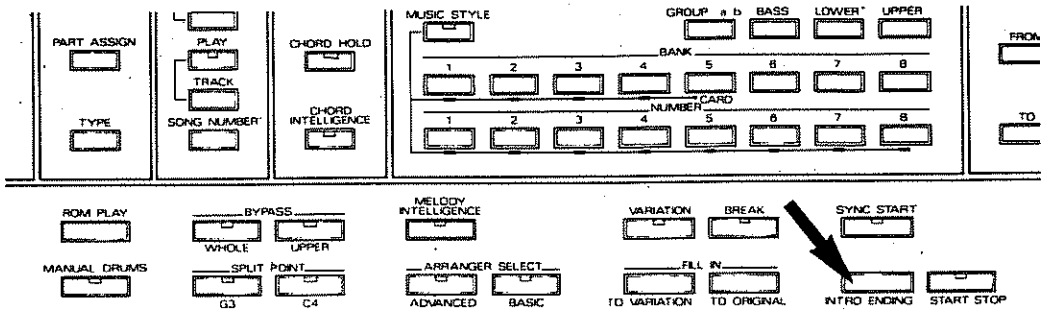
The moment the button is pressed, the rhythm stops playing.



b. Stop with Ending

① Press **INTRO/ENDING**.

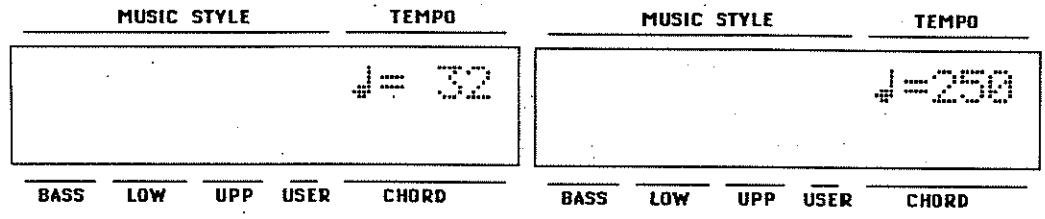
The ending starts from the first accent (the first beat of a bar) and the song stops at the end of the ending.



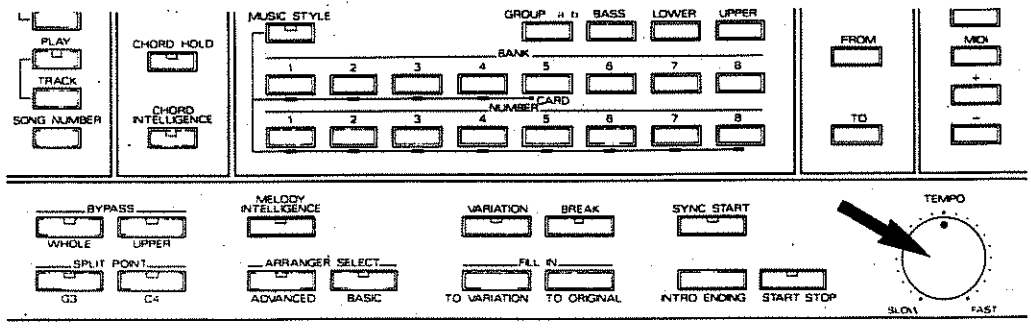
* The length of the ending varies depending on the Music Style you select.

(6) Tempo Change

The tempo can be changed using the TEMPO knob. The tempo is shown under TEMPO in the display as "♩=120 ". This means that as many as 120 quarter notes are played per minute. The variable range of tempo is ♩=32 to 250.



●Change the tempo using the TEMPO knob.



* Rotating the TEMPO knob clockwise will quicken the tempo.

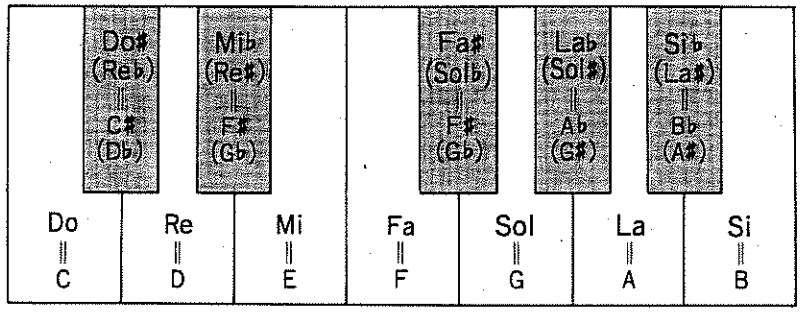
* The tempo may not change by rotating the TEMPO knob slightly. If this happens, rotate the knob drastically once. Each Music Style has a different tempo and that is why the tempo does not change unless the TEMPO knob should be moved up to the preset tempo value.

3
Arranger
(Automatic Accompaniment Playing)

The RA-50's accompaniment is automatic accompaniment played with the Arranger function.

(1) Arranger Function (Automatic Accompaniment Function)

The Arranger Function distinguishes the chord pattern from a part of the chord you play on the Lower Part (within the range where the chord is detectable).

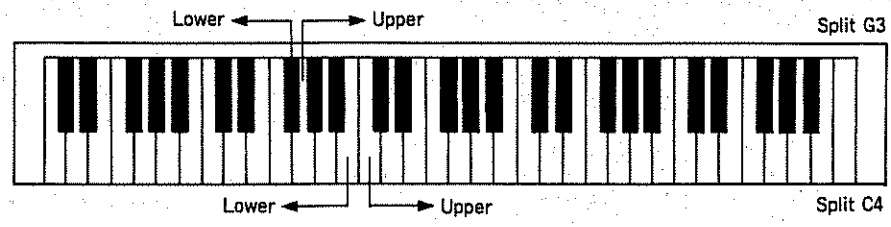


When a Music Style is started with the Arranger function on, the Lower Part (within the range where the chord is detectable) is automatically muted, therefore any note played will not sound. The Style performance in this case varies depending on the selected Music Style and the played chord.

(2) Chord

Chord names may be familiar to guitar players but not to those who play only the classical piano. They, however, are easy and useful once you have learned them.
Playing "la", "do", and "mi" in the Lower Part will cause the display to show "Ami" at the CHORD position. "Ami" is a chord name for the "la", "do", and "mi". The first (far-left) capital letter (C - B may be marked with ♯ or ♭) is the root note of the chord and the sign or number that follows it shows the other notes of the chord, such as major or minor. (For detailed explanation about chord and the notes, see page 88 "Chord List".)

There are 12 root notes available for each chord. They are displayed as shown below.



●Keys played on the Lower Part are used only for Chord Detection and therefore do not sound.

●Keys played on the Upper Part sound in a usual way.

The RA-50 can distinguish and display the following 10 chords from one root note. (In the following example, the root note C is displayed.) Also, it may be displayed as shown in. < >.

<Chord Name List>

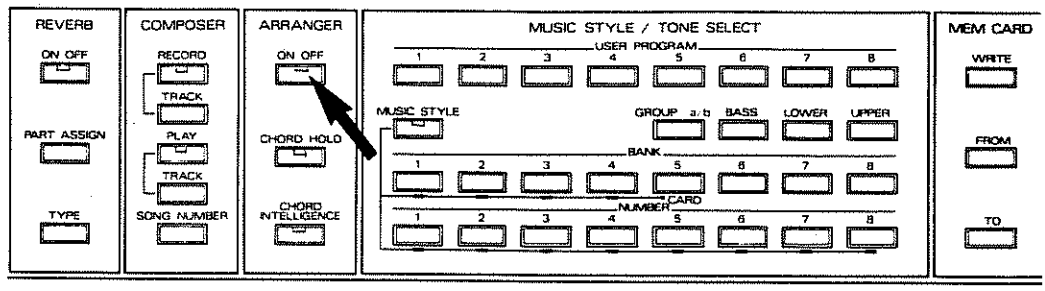
C Ma	C Major < C, Cmaj>
C mi	C Minor < Cm >
C Ma7	C Major 7th < C△7, Cmaj7, CM7 >
C mi7	C Minor 7th < Cm7, C-7 >
C 7	C 7th
C ϕ	C Minor 7th Flat Five < Cm7 (♭5), Cm7 (−5), C-7 (−5) >
C Aug	C Augmented < Caug, C (♯5), C (+5) >
C Dim	C Diminished < Cdim, Cdim7, C°, C°7 >
C Su4	C Suspended 4th < Csus4 >
C Su7	C Suspended 7th < C7sus4 >

(3) Style Performance

There are two types of automatic accompaniments played with the Arranger function; basic type arrange (BASIC) and advanced type arrange (ADVANCED). When the power is turned on, either of the arrange types is selected. (The relevant ARRANGER SELECT indicator is lit.)

① Press [ON/OFF] of ARRANGER section.

●If you wish to change arrange types, press [ADVANCED] or [BASIC] of the ARRANGER SELECT section which you desire.



② Start playing the Music Style. (How to start the Music Style is explained on page 32 "(4) Starting the Music Style" in chapter 3.)

③ Play a chord on the Lower Part (within the chord detectable range). The RA-50 will play the Music Style currently selected and the accompaniment that matches the chord you are playing.

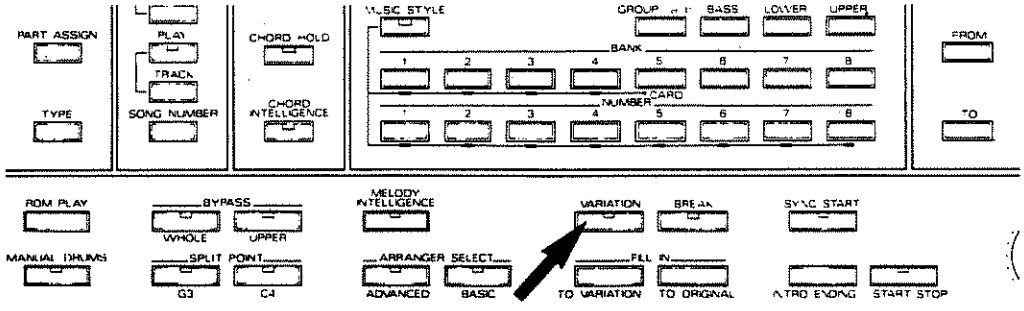
④ Stop the rhythm. (How to stop the rhythm is explained on page 33 "(5) Stopping the Music Style".)

* The muting condition of the Lower Part (the chord detectable range) is retrieved when the rhythm is stopped. However, if you stop the rhythm without releasing the keyboard, the notes being pressed are not played. To continue to play the Lower Part, play the same notes again.

(4) Variation

There are two types of rhythm patterns for Music Styles; basic rhythm (Original) and modified rhythm (Variation). Normally, you may use Original patterns, and use variations for the climax of a song.

① Press VARIATION and make sure the indicator lights up.



② To return to the Original pattern, press VARIATION again.

* The Variation can be turned on or off using the Fill in Function which is explained in the following section.

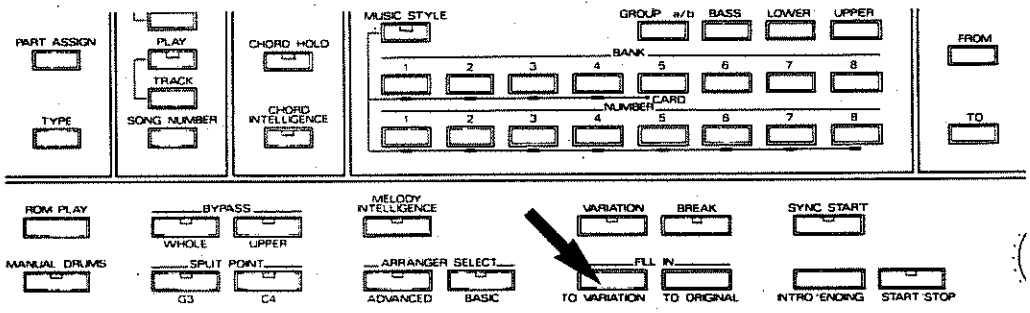
(5) Fill in

Fill in is a short improvisational irregular phrase (such as a drum-roll) in the song.

There are two types of Fill in for each of 32 rhythms.

a. Fill in To Variation

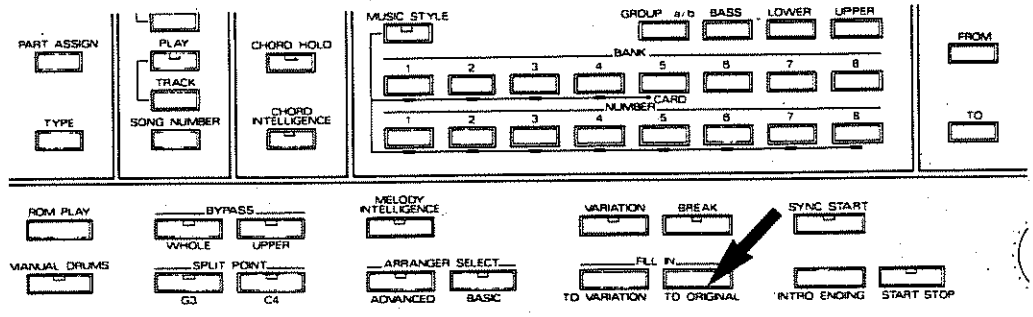
●Press TO VARIATION of FILL IN section, and a bar of sophisticated fill in is played before variation rhythm of each arranger.



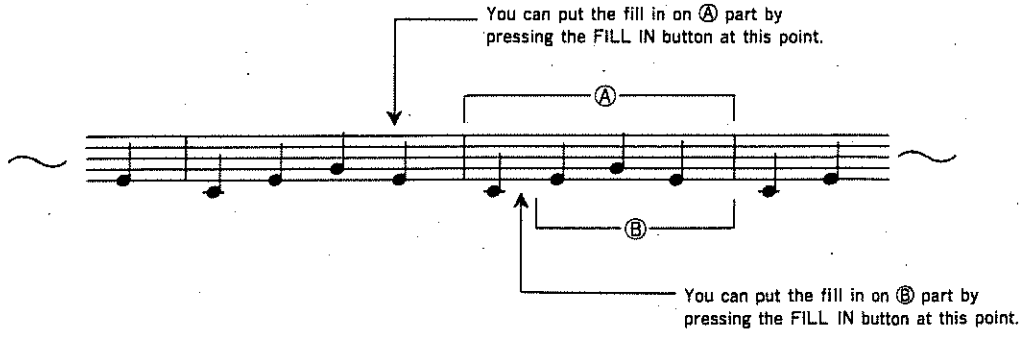
*At this stage, the VARIATION indicator lights up showing that the Variation is on.

b. Fill in To Original

●Press TO ORIGINAL of FILL IN, and a bar of simple fill in is played before original rhythm of each arranger.



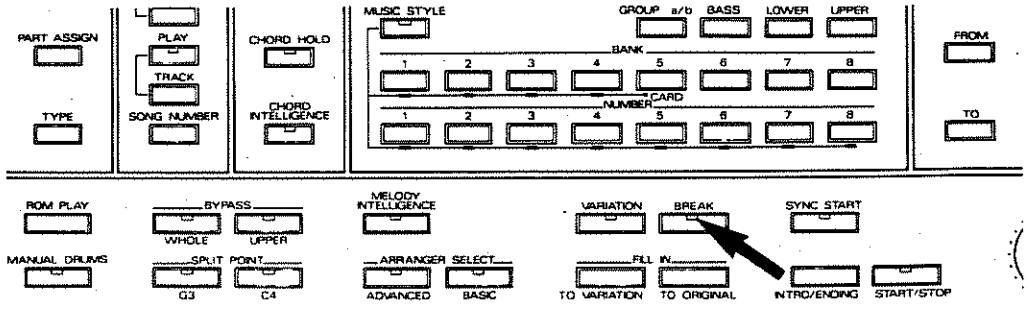
*The fill in is a bar of performance. However, depending when the Fill in button is pressed, it will be played differently.



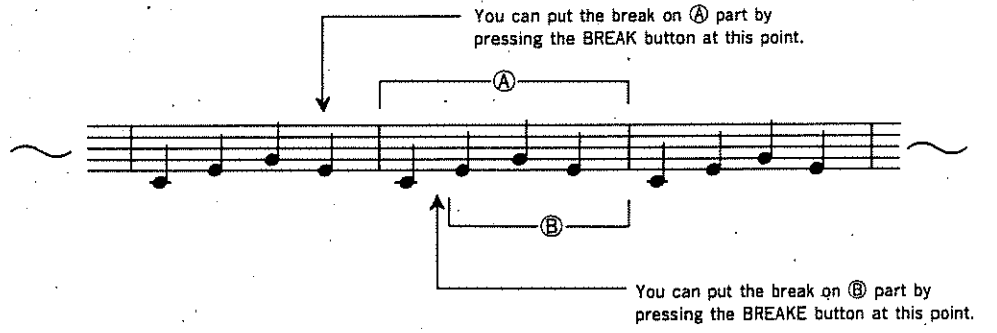
(6) Break

The RA-50's Break function makes a bar of rest in the middle of the performance, then resume playing. You may play ad-lib solo for the break (rest). This is called solo break.

① **Press** **BREAK** .



* A break is a bar of rest. However, depending when the Break button is pressed, the length of the break will vary.

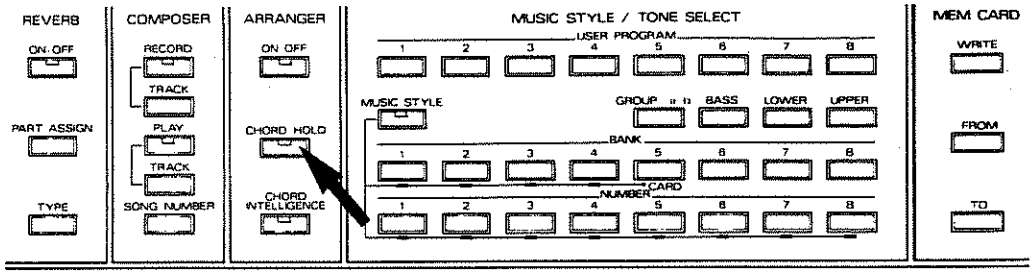


(7) Chord Hold

The Chord Hold function allows you to hold the chord played on the Lower Part until you play a new chord. Using the Chord Hold function, you can change arranger style or insert a fill in without stopping the performance.

* The Chord Hold function is effective only for the Lower Part. If you turn the Chord Hold function on with the Split off, Split Point is automatically set to C4.

① **Press CHORD HOLD of ARRANGER and make sure the indicator lights up.**

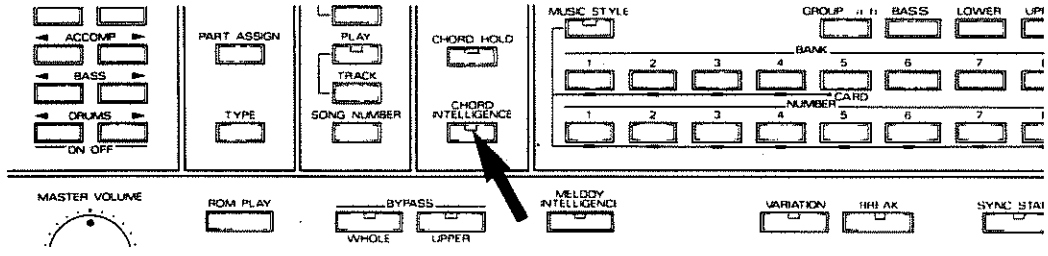


●**To turn the Chord Hold function off, press CHORD HOLD again and check the indicator goes out.**

(8) Chord Intelligence

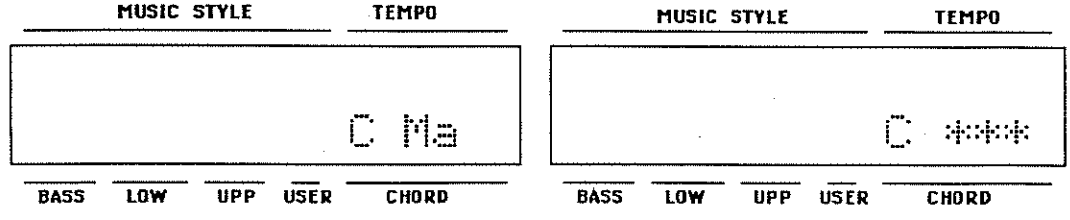
The Chord Intelligence function can assign a correct chord even if you play only a part of the chord.

① **Press CHORD INTELLIGENCE of ARRANGER and make sure the indicator lights up.**



* The RA-50 can distinguish the ten types of chords from 12 root notes. (Chords that the RA-50 can distinguish are shown on page 35 "(2) Chord" in chapter 3.)

* When the chord is distinguished, the chord name is displayed. When the chord cannot be distinguished, the display shows the lowest note played on the keyboard and "* * *".

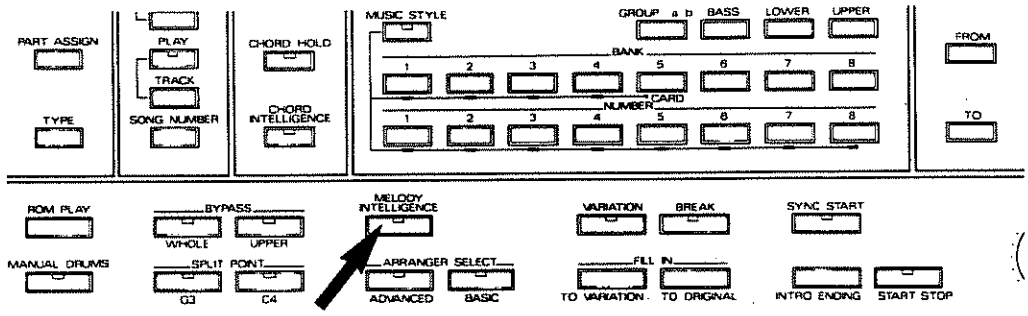


●**To turn the Chord Intelligence function off, press CHORD INTELLIGENCE again and check the indicator goes out.**

(9) Melody Intelligence

The Melody Intelligence function adds harmony to the melody you play. This function is effective in the Split mode. Play melody on the Upper Part while playing the chord in the Lower Part (this applies to the Chord Hold mode).

① Press **MELODY INTELLIGENCE** in ARRANGER and make sure that the indicator lights up.



●To turn the Melody Intelligence function off, press **MELODY INTELLIGENCE** again and check the indicator goes out.

Now, you let's play the following song.

INTERMEDIATE PROCEDURE

LET'S MASTER HOW TO ENJOY MUSIC MORE.

1
Adjusting the volume balance of each Part

The MASTER VOLUME knob controls the overall volume of the RA-50, so it cannot make fine adjustment of each Part. If you need volume adjustment for each Part, do as follows.

* The volume balance of each Part is set as follows at power up.

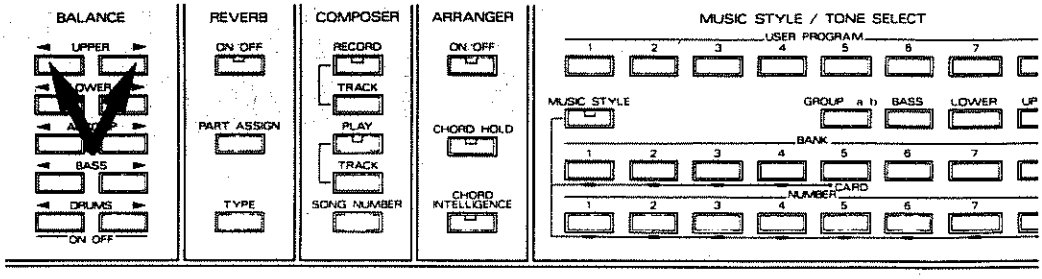
<Default Volume Setting Table>

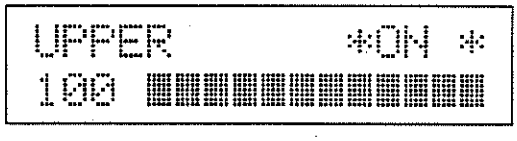
Upper Part	100
Lower Part	80
Accompaniment Part	75
Bass Part	90
Drums Part	90

(1) Volume balance for the Upper and Lower Parts

a. Upper Balance

① Press ◄ or ► of UPPER in BALANCE section.





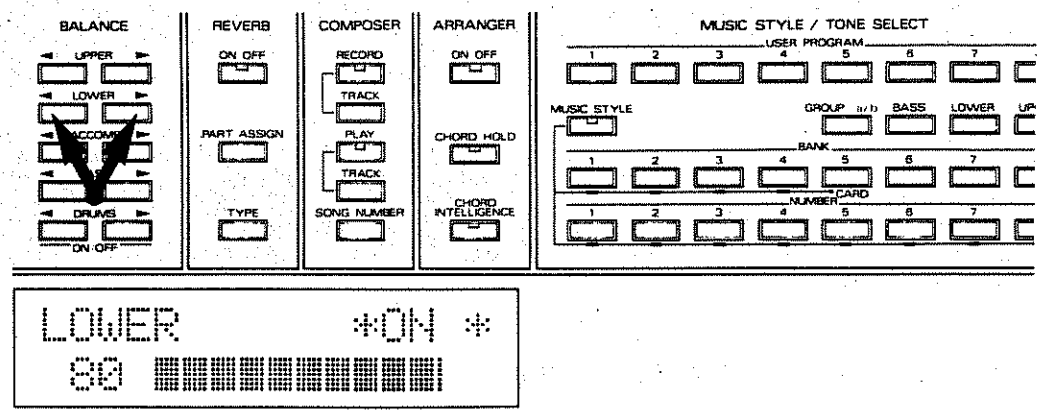
② To increase the volume, press ►. To decrease, press ◄.

●To change the volume continuously, keep pressing ◄ or ►.

●By pressing ► and ◄ at the same time, you can turn to the muting state without changing the volume balance of the Upper Tone. (To cancel the muting state, press ◄ and ► simultaneously again.)

b. Lower Balance

① Press ◄ or ► of LOWER in BALANCE section.

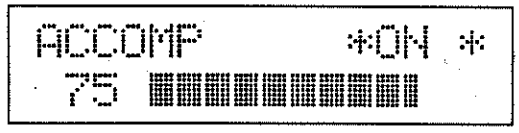


●The volume balance of the Lower Part can be set using the same procedure as the Upper Part. (Continuous volume change, mute and mute cancel can also be achieved in the similar method as the Upper Part.)

(2) Volume Balance for the other Parts

a. Accompaniment Balance

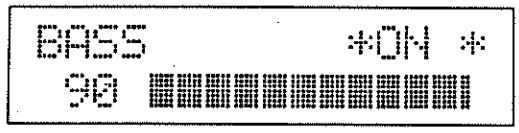
① Press ◄ or ► of ACCOMP in BALANCE section.



●The volume balance of the accompaniment can be set using the same procedure as the Upper Tone. (Continuous volume change, mute and mute cancel can also be achieved in the similar method as the Upper Tone.)

b. Bass Balance

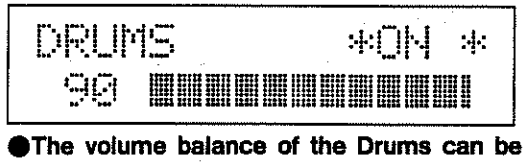
① Press ◄ or ► of BASS in BALANCE section.



●The volume balance of the Bass can be set using the same procedure as the Upper Tone. (Continuous volume change, mute and mute cancel can also be achieved in the similar method as the Upper Tone.)

c. Drums Balance

① Press ◄ or ► of DRUMS in BALANCE section.



●The volume balance of the Drums can be set using the same procedure as the Upper Tone. (Continuous volume change, mute and mute cancel can also be achieved in the similar method as the Upper Tone.)

* The panning of the drum sounds (in stereo) is fixed. (For detailed explanation, read page 67 "(4) Manual Drums" in chapter 4.

2
Creating spacious sounds

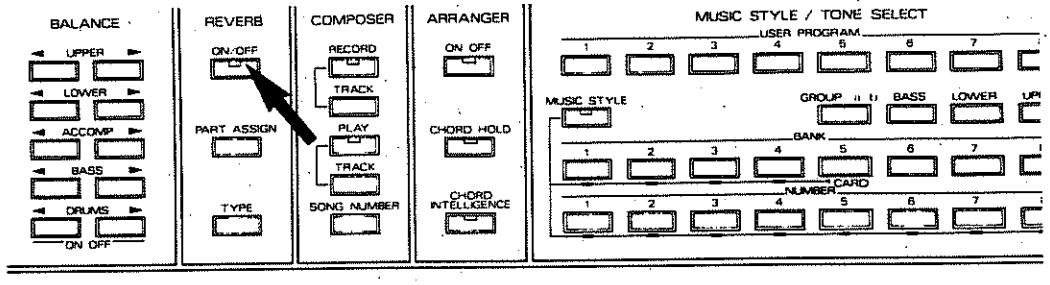
(1) About Reverberation

Reverb stands for reverberation. Reverberation gives depth to the sound and makes you feel the spaciousness of the room. In other words, reverb effect creates ambience as if you were playing in a concert hall. The RA-50 includes the reverb unit which can be turned on or off for each Part or for the entire Parts.

(2) On/Off of the Reverb Effect

a. On/Off for all the Parts

① **Press [ON/OFF] of REVERB and make sure the indicator lights up.**

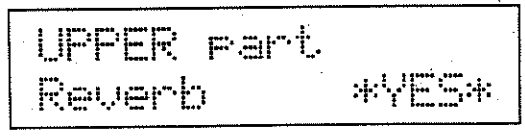


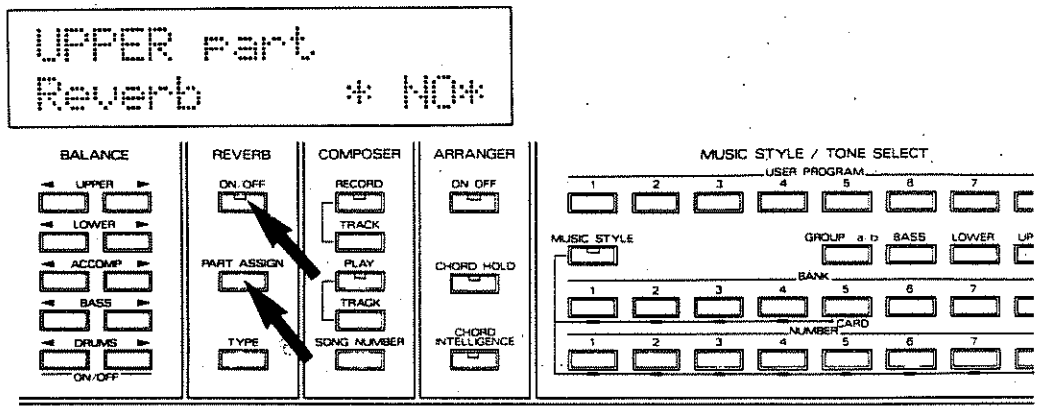
●**To turn the reverb off, press [ON/OFF] again and check that the indicator goes out.**

b. On/Off for Individual Part

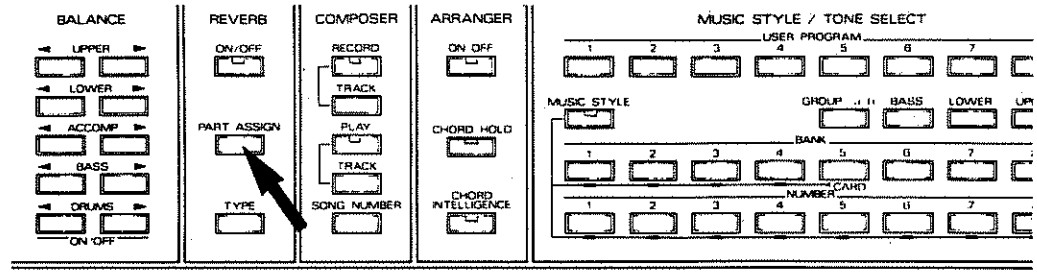
Normally, all the Parts take on reverb effect when it is turned on. However, it is possible to turn on or off the reverb effect separately for Upper/Lower/Drums Parts.

① **Press [PART ASSIGN] of REVERB.**
(To turn on or off the Part currently shown in the display, take the following procedure without releasing [PART ASSIGN].)



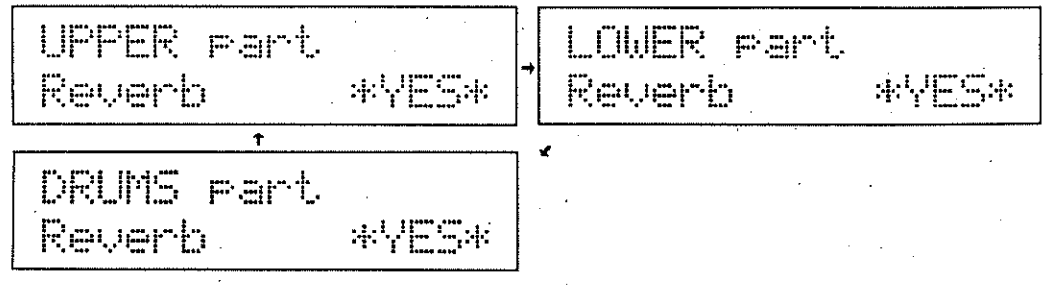


② **While still holding** [PART ASSIGN] **down, press** [ON/OFF]**. (To turn on the reverb, make the display show** [*YES*]**, and to turn it off, make the display shown** [*NO*]**.)**



③ **To continue to turn on or off the other Part, press** [PART ASSIGN] **until the desired Part appears, then take step②.**

* The Part display changes in sequence of UPPER - LOWER - DRUMS - UPPER.



* When the reverb is set to off in all Parts, no reverb effect is obtained even by turning the overall reverb on.

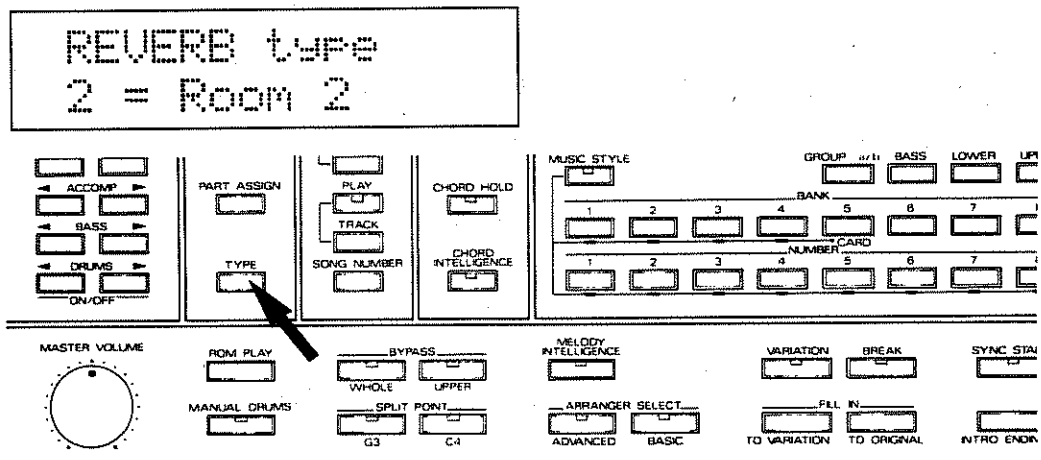
(3) Changing Reverb Types

Any of the following 8 reverb types can be used.

<Reverb Type List>

Room 1	Reverberation in a small room.
Room 2	Reverberation in a large room.
Hall 1	Reverberation in a small hall.
Hall 2	Reverberation in a large hall.
Plate 1	Metallic reverberation.
Plate 2	Deeper reverberation than Plate 1.
Delay 1	Echo sound.
Delay 2	Longer echo than Delay 1.

① **Press** **TYPE** .



② **Keep pressing** **TYPE** **until the desired reverb type appears.**

* The RA-50 is default to reverb type "2=Room 2".

3
User Program

The RA-50 allows you to store up to 8 different patches you program using various parameters and recall any of them just by a flick of switch. These 8 patches are called User Programs.

The following 25 parameters can be used for making a User Program.

Upper Tone……Tone of the Upper Part.
Lower Tone……Tone of the Lower Part.
Bass Tone……Tone of the Bass Part.
Upper Volume……Volume of the Upper Part.
Lower Volume……Volume of the Lower Part.
Accompaniment Volume……Volume of the Accompaniment Part.
Bass Volume……Volume of the Bass Part.
Drums Volume……Volume of the Drums Part.
Split (OFF/G3/C4) ……Whether to split the keyboard into two parts, Upper and Lower. If so, at which key.
Music Style……Pattern for accompaniment.
Basic Tempo……Base tempo.
Variation (ON/OFF) ……Whether to play Variation performance or not.
Arranger (ON/OFF) ……Whether to use the Arranger function or not.
Arranger Select (Basic/Advanced) ……Arranger type to be used for the Arranger function.
Chord Hold (ON/OFF) …… Whether to hold the chord played on the Lower Part or not.
Sync Start (ON/OFF) ……Whether to use the Sync Start function or not.
Chord Intelligence (ON/OFF) ……Whether to use the Chord Intelligence function or not.
Melody Intelligence (ON/OFF) ……Whether to use the Melody Intelligence function or not.
Reverb (ON/OFF) ……Whether to turn on or off the reverb effect.
Reverb Type……Selecting one of the 8 Reverb Types.
Manual Drums……Whether to play the Drums Part from the keyboard.
Pedal Switch 1……Assigning a function to the Pedal Switch 1.
Pedal Switch 2……Assigning a function to the Pedal Switch 2.
Pedal Switch 3……Assigning a function to the Pedal Switch 3.
Pitch Bend Range……The maximum pitch change caused by using the pitch bender.

(1) Calling a User Program

It takes a lot of time to make a patch each time you play a song. To save time and work, you can record patches (User Programs) and recall one of them at any time you want. Up to 8 different User Programs can be recorded in the internal memory of the RA-50 or onto a memory card (optional M-256E). The following User Programs are preprogrammed from the manufacturer.

●User Program 1

Upper Tone·····31 SYN BRASS 1
Lower Tone·····11 ELEC PIANO 1

3. Fill in to Variation

To call a prerecorded User Program, do as follows.

① Select a User Program you like using the 1～8 USER PROGRAM button.

* To call a different User Program, press the relevant button.

* To cancel the User Program mode, press the USER PROGRAM button that corresponds to the User Program number currently shown in the display. (This will return the RA-50 to the previous condition.)

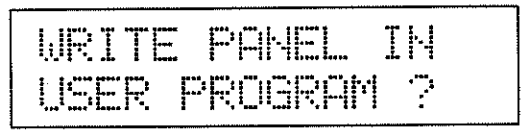
(2) Recording a User Program

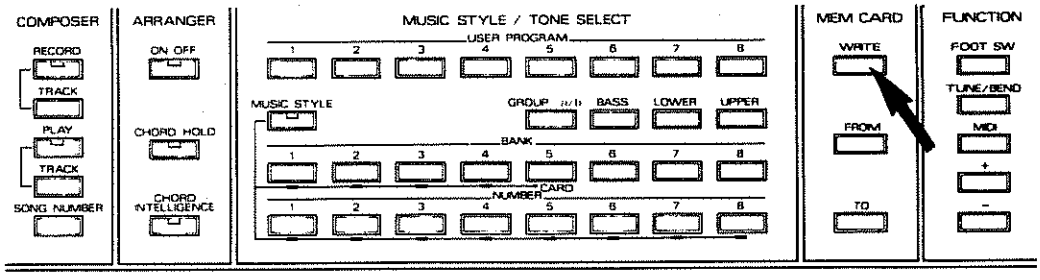
The patch you have made on the panel switches can be recorded as a User Program. Up to 8 different User Programs can be recorded and they are retained safely even after the unit is switched off. Recording a new User Program will erase the previous data, so if you wish to retain the previous data, save it onto an optional memory card (M-256E) before writing a new program. (How to use a memory card is explained on page 61 "Using Memory Cards".)

* You can restore the User Programs preprogrammed from the manufacturer at any time.

① Make a patch using the 25 parameters.

② Press [WRITE].

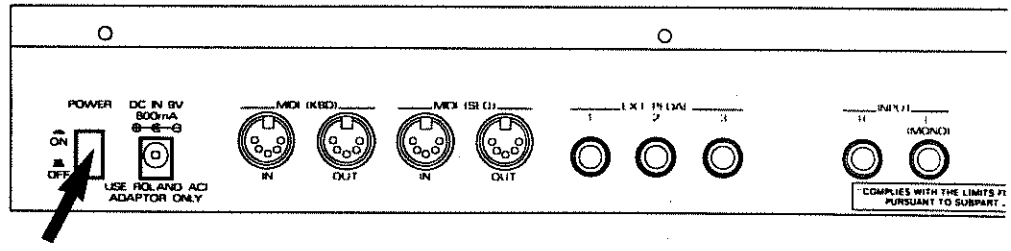




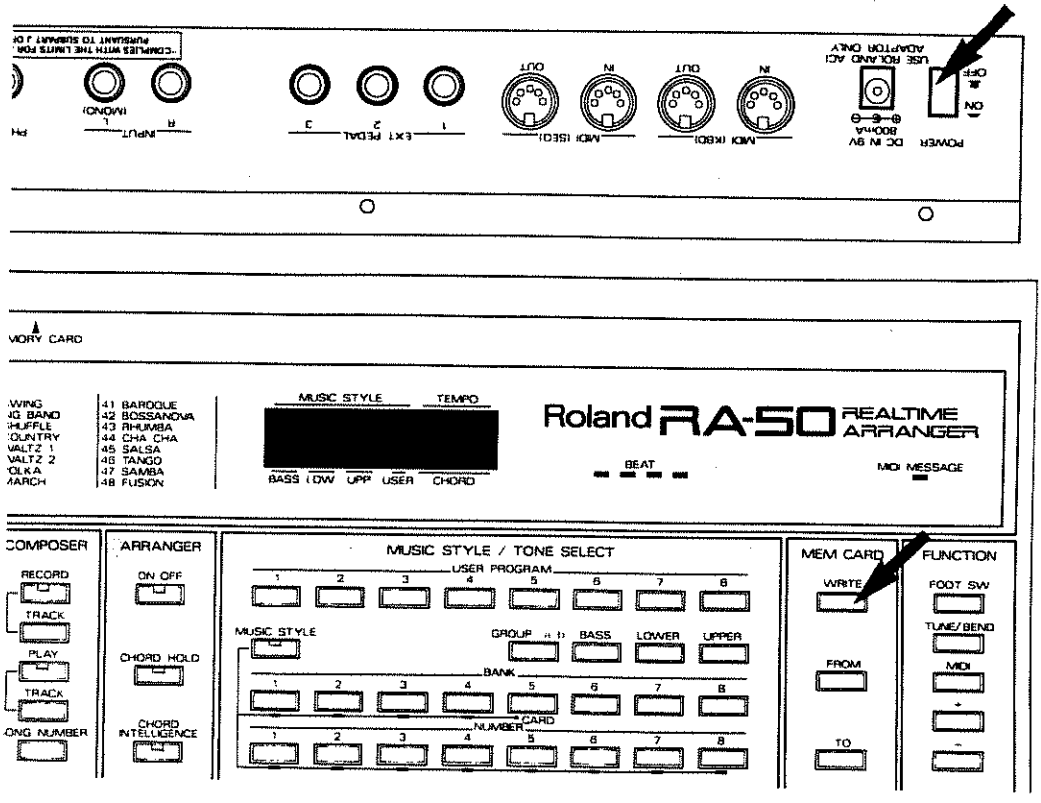
③ While still holding [WRITE] down, press the USER PROGRAM button where you wish to write the patch.

Writing a new User Program will automatically erase the previous data, but you can restore the User Programs preset from the manufacturer as shown below.
However, restoring the preprogrammed User Programs will erase any data you have written in the RA-50 and the Song Composer function. Therefore, if you wish to retain the data, save it onto an optional memory card. (Song Composer function is explained in the next section "Song Composer".)

① Switch the RA-50 off.



② Switch the RA-50 on while holding WRITE down.



4
Song Composer
(Recording the performance data)

The RA-50's Composer function allows you to record the music you play on the RA-50. The recording basic of the RA-50 is conceptual like a tape recorder in that it records sound. However, the recording process is very different since the RA-50 converts audio signal into digital and records it into computer memory. The major advantage of this method is that noise is shut out in recording, and pitch is not affected by changing the tempo in playback. The RA-50's Composer can record up to 3 songs. Each song can be played back individually. Also, each song consists of the Upper and Lower tracks, recording the Upper Part performance into the Upper track and the Lower Part performance into the Lower track (including the Style Performance) respectively.

(1) Recording a performance 1 - - Recording

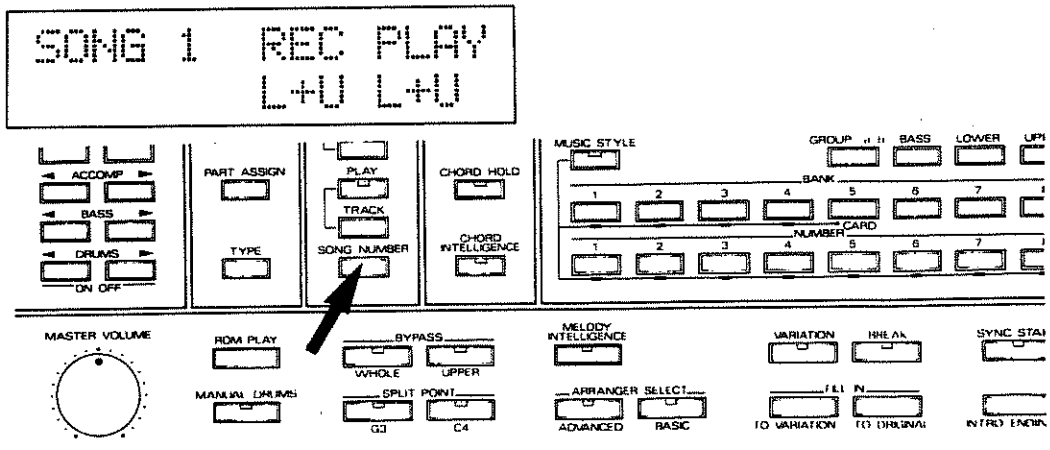
There are two methods for recording a song.

Recording the Upper and Lower performance at the same time.

Recording the Upper and Lower performance separately (Monitor Recording).
(Details about Monitor Recording is explained the following "(4) Recording a performance 2 ".)

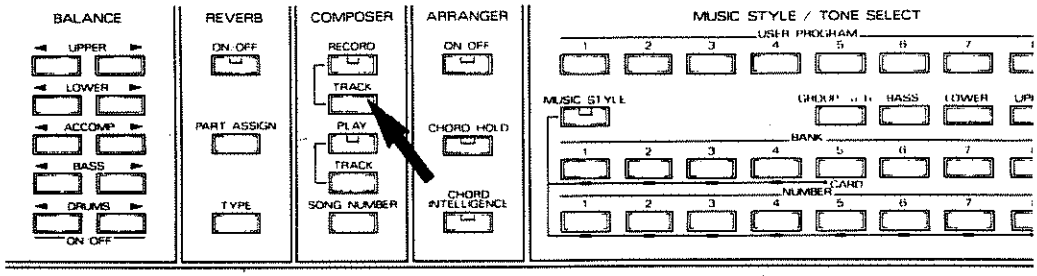
① Make sure that the Music Style is stopped and make the necessary settings for Style Performance.

② Press SONG NUMBER of COMPOSER to select a song number (destination song).

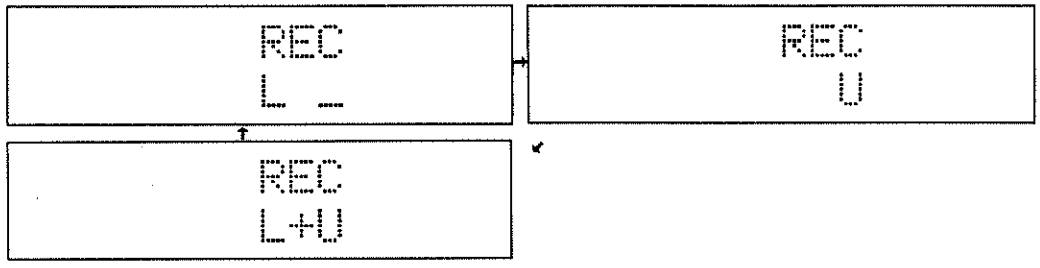


*Each time you press **SONG NUMBER**, the display changes as "1 - 2 - 3 - 1 ····· ".

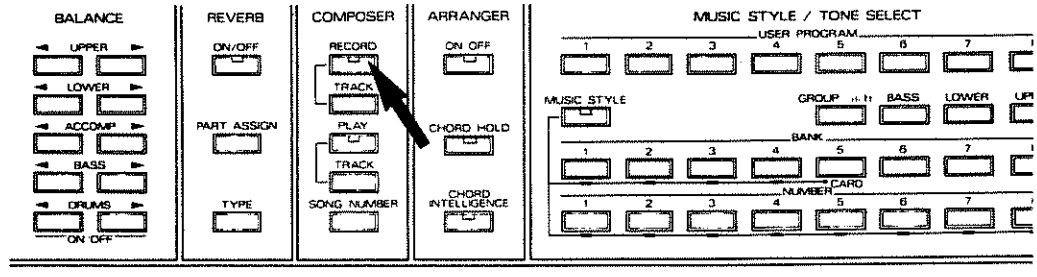
③ Press TRACK under RECORD to select the track (Upper or Lower) to be recorded. Keep pressing TRACK until "L + U" appears.



*"L" represents Lower and "U" represents Upper track. The display changes as "L - U - L+U - L·····".



④ Press RECORD and make sure the indicator lights up. (Pressing RECORD will automatically select Split C4.)



*To cancel recording, press **RECORD** again and make sure the indicator goes out.

⑤ Play the keyboard to start recording. (There are 4 different types for starting recording. For details, read page 32 "(4) Starting the Music Style" in chapter 3.)

⑥ When you finish playing, stop recording. (There are 2 types for stopping recording. For details, read page 33 "(5) Stopping the Music Style" in chapter 3.)

*If you make a mistake, stop recording by pressing **START/STOP** then resume from step 3.

*The Lower track can store up to 96 time Chord Changes for each song.

* The shortest timing value recorded in the Upper track is 64th note triplets.

* The performance data recorded with the Composer function is retained in memory even after the unit is switched off.

* To store more than three songs, save the existing songs onto an optional memory card, then record the other songs. If you record a new song with three songs already stored in memory, the previous song will be erased. (For details of memory card, see page 61 "5 Using Memory Card" in chapter 4.)

* When the remaining memory for recording is very small (less than 10 %), the RECORD indicator flashes. When no memory is left, recording stops automatically.

* Recording with Pitch Bend/Modulation/Tempo Change/Volume control of each Part will consume large amount of memory.

The following are data which can be recorded:

< Lower Track >

Lower Tone
Bass Tone
Lower Volume
Accompaniment Volume
Bass Volume
Drums Volume
Music Style
Tempo (Tempo Change)
Variation (ON/OFF)
Arranger (ON/OFF)
Arranger Select (Original/Advanced)
Chord Hold (ON/OFF)
Chord Intelligence (ON/OFF)
Reverb (The entire or individual Parts ON/OFF)
Reverb Type
Manual Drums (ON/OFF)

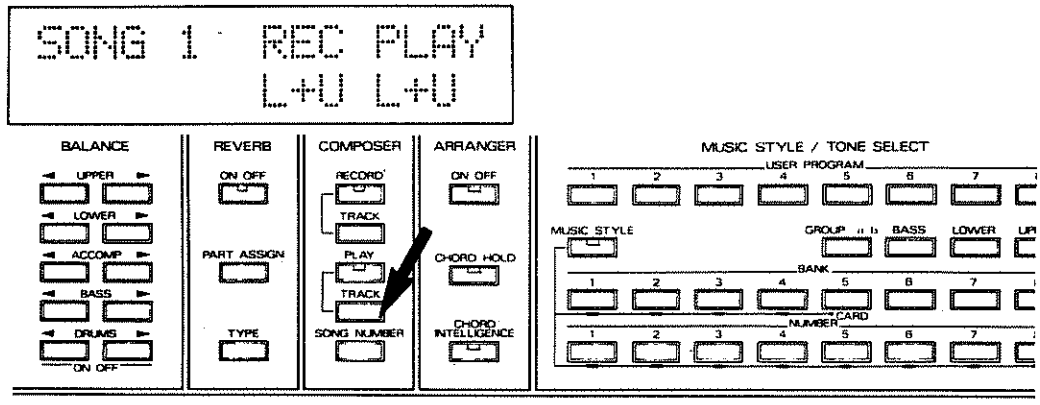
< Upper Track >

Upper Tone
Upper Volume
Melody Intelligence (ON/OFF)
Pitch Bend
Modulation (vibrato)

(2) Playing the performance data 1 - - Playback

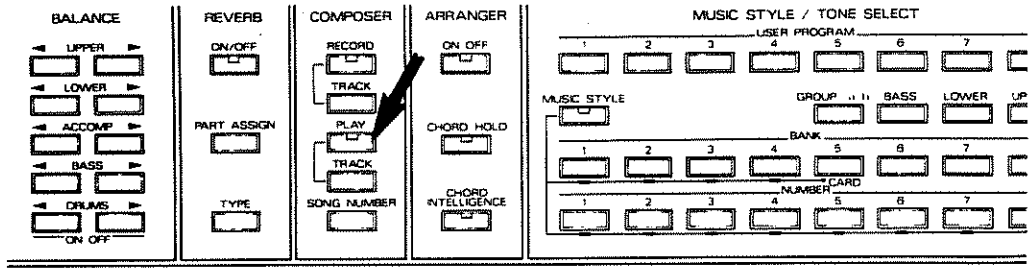
There are two methods for playing back the recorded performance data; playing both the Upper and Lower Tracks at the same time and playing each track individually.

① Press [TRACK] under [PLAY] of COMPOSER to select the track to be played back.



*Each time you press [TRACK], the display changes as "L - U - L+U - L·····".

② Press [PLAY] to start playing. (The PLAY indicator lights up.)

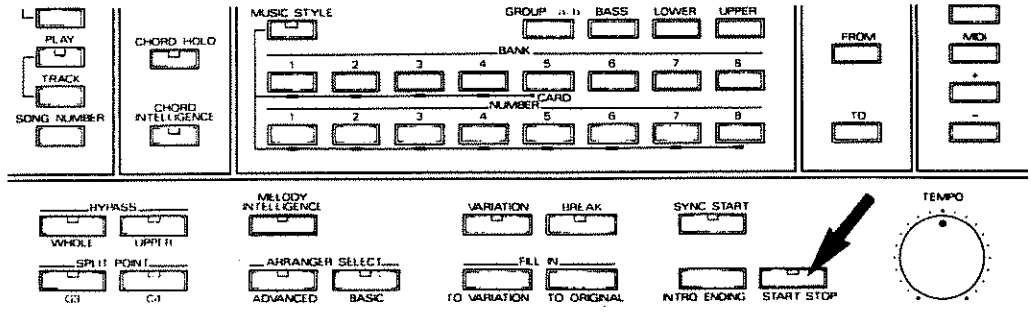


●Pressing [PLAY] again will flash the indicator. To stop playback, press [PLAY] once again. (To continue to playback data = repeat play, do not press [PLAY]. For details, read the following section "(3) Playing the performance data 2".)

③ Take either of the following procedures:

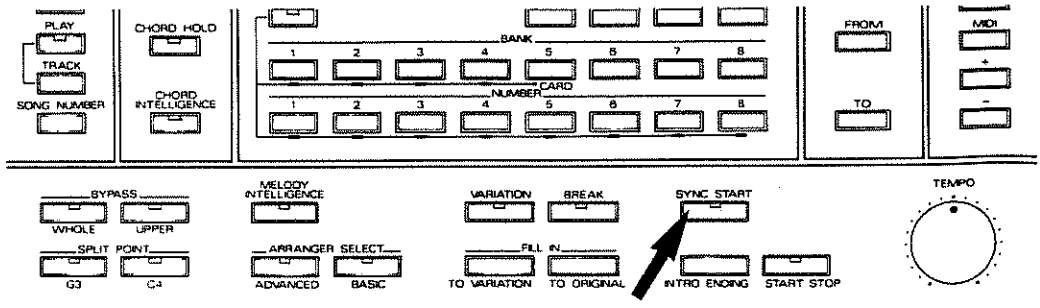
●Press [START/STOP].

This will playback the recorded data faithfully.



●Press **SYNC START**.

This will playback the recorded data faithfully by playing the Lower Part.



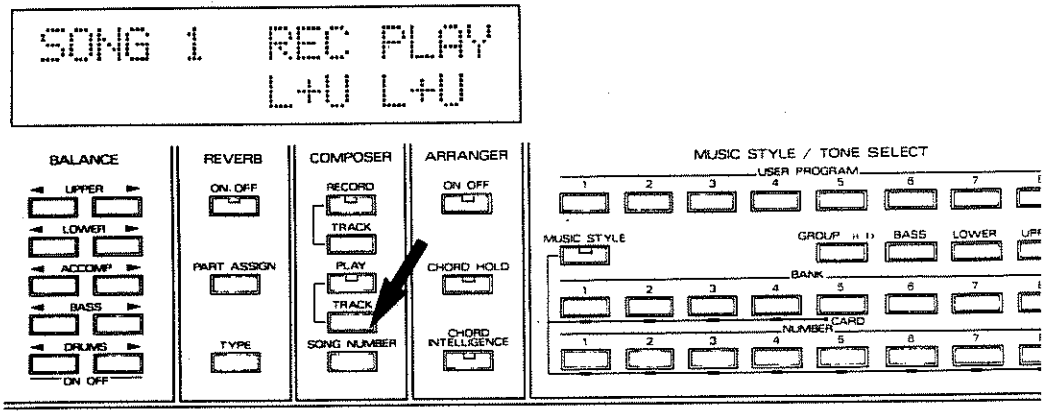
④ **The RA-50 automatically stops after playing the final measure. (The PLAY indicator goes out.)**

●**To stop playback in the middle of the song, press** **START/STOP** **or** **INTRO/ENDING**. **START/STOP** **will stop playing immediately, while** **INTRO/ENDING** **will stop playing after the ending.**

(3) Playing the performance data 2 - - Repeat

If the recorded performance data does not include any Intro or Ending, it can be played back repeatedly (Repeat Play). (Data with Intro or Ending will automatically stop after played back once even if you use the Repeat Play function.)

① **Press** **TRACK** **under** **PLAY** **to select the track to be played.**



② **Press** **PLAY** **twice and make sure that the indicator flashes.**

③ **Press** **START/STOP** **to start the Repeat Play.**

* To stop playback press **START/STOP** or **INTRO/ENDING**.

* The Repeat Play function can be used not only for listening but also for practicing ad-lib to a specific chord, etc.

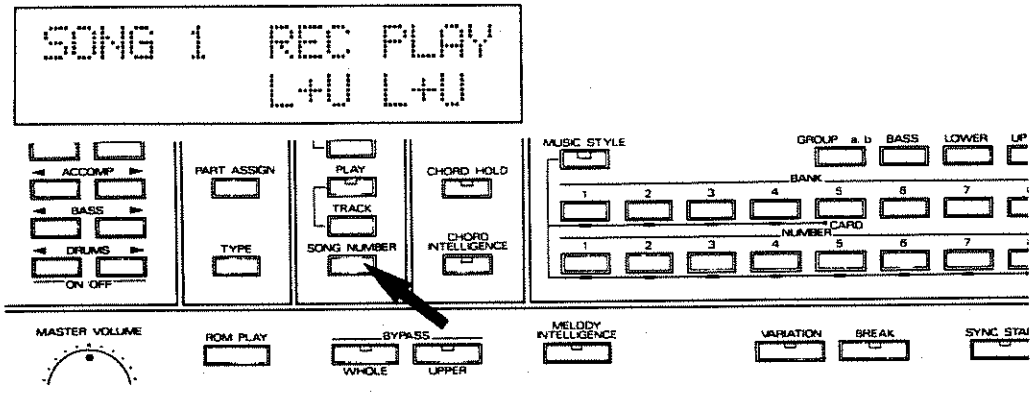
(4) Recording a performance 2 - - Monitor Recording

The Monitor recording allows you to record new data into a different track while playing (monitoring) data recorded in a track.

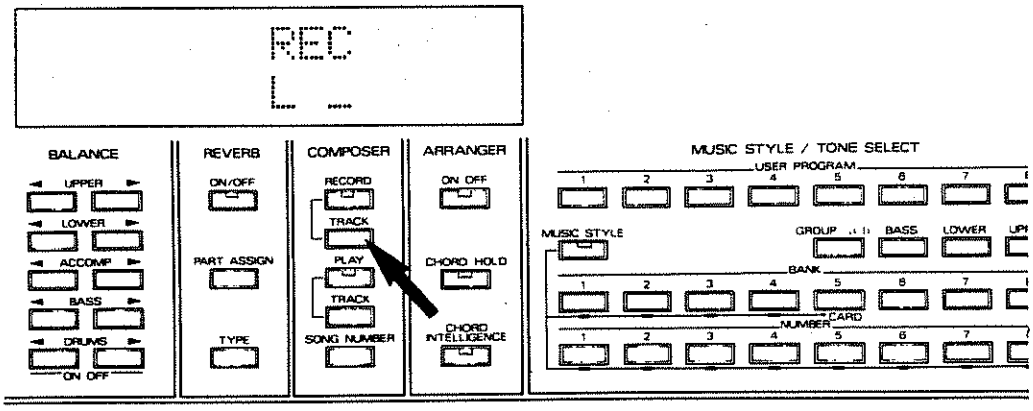
It may be better to record the Lower Part first since the Drums part is included in the Lower Part, therefore it will be easier to record melody later to the rhythm.

① Make sure that the Music Style is stopped, and make necessary setting for Style Performance.

② Press [SONG NUMBER] of COMPOSER to select a song number (destination song) to be recorded.



③ Press [TRACK] under [RECORD] to select the track (Upper or Lower) to be recorded.



④ Press [RECORD] and make sure the indicator lights up. (Pressing [RECORD] will automatically select Split C4.)

* To cancel recording, press [RECORD] again and make sure the indicator goes out.

⑤ Play the keyboard to start recording. (There are 4 different types for starting recording. For details, read page 32 "(4) Starting the Music Style" in chapter 3.)

⑥ When you finish playing, stop recording. (There are 2 types for stopping recording. For details, read page 33 "(5) Stopping the Music Style" in chapter 3.)

●If you make a mistake, stop recording by pressing START/STOP then resume from step ③.

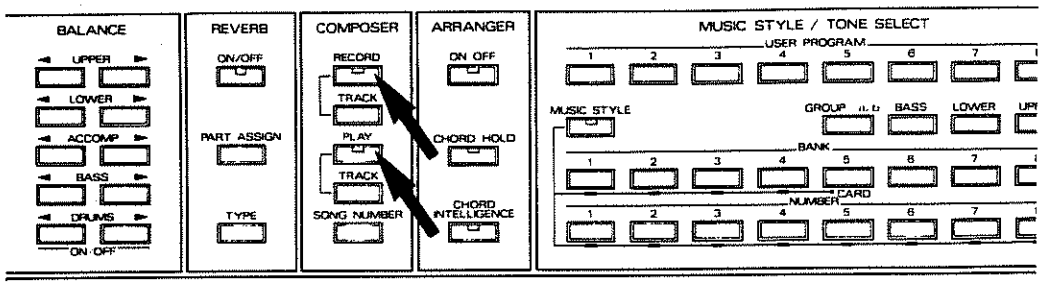
⑦ Press TRACK (under PLAY) to select the track to be monitored and press TRACK (under RECORD) to select a new track to be recorded.

・DISPLAY for recording Upper while monitoring Lower.

・DISPLAY for recording Lower while monitoring Upper.

＊If you try to record new data onto the track being monitored or select "L+U" mode, the Monitor Recording cannot be done.

⑧ Press RECORD and PLAY and make sure the indicators light up.



＊If the PLAY indicator flashes, the Monitor Recording cannot be done. Press PLAY again and make sure the indicator lights up.

＊You may press either of RECORD or PLAY prior to another.

⑨ Press START/STOP or SYNC START to start monitor recording.

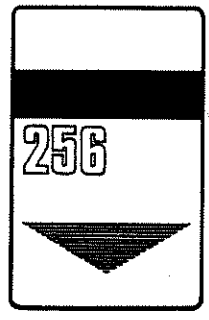
⑩ When you finish playing song, press START/STOP to stop the monitor recording.

5
Using Memory Cards

(1) Useful Memory Cards

a. Data that can be saved on a memory card

The RA-50 allows you to save User Program data that are Music Style selections, Tone settings etc, and Song Composer data onto a memory card. You can use both a music style card and memory card. However, when you save Song Composer data/User Programs, be sure to use the specific memory card (optional : M-256E), since these cannot be saved onto a music style card.



*M-256D can be used the same as M-256E.

Song Composer and User Program data can be saved or loaded together or separately.

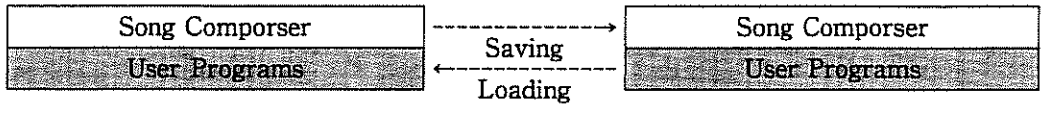
SONG COMPOSER Song Composer data
USER PROGRAMS User Program data
SONGS/USER PROG. Song Composer/User Program data

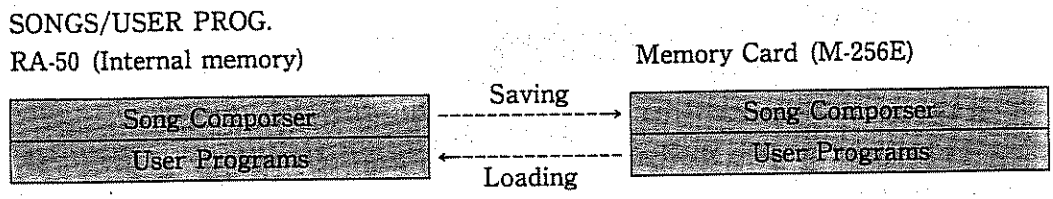
SONG COMPOSER

RA-50 (Internal memory) Memory Card (M-256E)

USER PROGRAMS

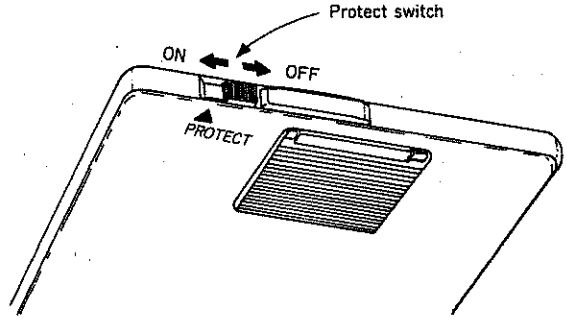
RA-50 (Internal memory) Memory Card (M-256E)





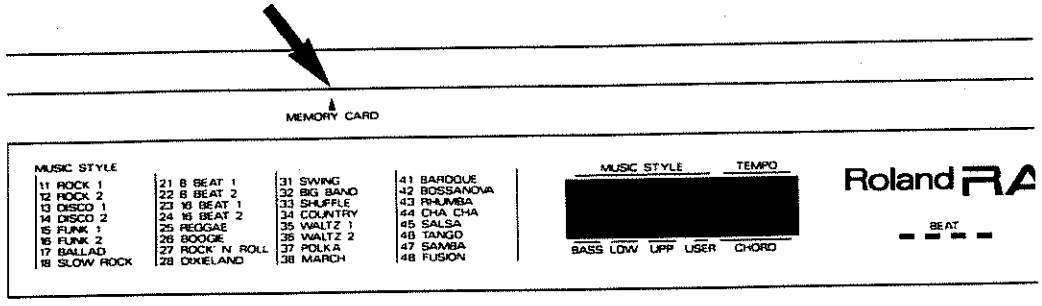
b. Memory Protect

A memory card has a Memory Protect switch to prevent accidental erasure of data. When you save Song Composer and User Program data in the RA-50 onto a memory card, set the Memory Protect switch to the OFF position. When you have saved data, make sure to set it back to the ON position.



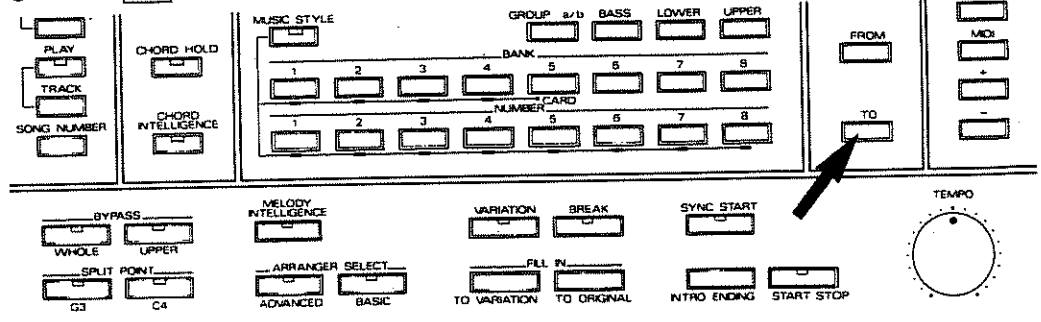
(2) Saving onto a memory card

① Insert a memory card into the card slot. (Be sure that the side with the letter "ROLAND" facing upward and inserting in the correct direction that an arrow indicates.)



② Set the Protect Switch on the memory card to the OFF position.

③ Press TO of CARD.



・DISPLAY of saving User Program data

```
USER PROGRAMS
TO MEMORY CARD
```

・DISPLAY of saving Song data

```
SONG COMPOSER
TO MEMORY CARD
```

・DISPLAY of saving Song and User Program data

```
SONGS/USER PROG.
TO MEMORY CARD
```

④ Press [WRITE] while holding [TO] down.

●If you use a brand new memory card, the display responds as shown below. If so, repeat step ④.

```
ILLEGAL CARD !!
WRITE AGAIN ?
```

＊When you are using a card which has been used before, data will be saved after step④. However, be sure that any previous data on the card will be replaced with the new data.

⑤ When data saving is completed, the display responds as shown below.

```
OK !!
SAVE COMPLETE
```

＊Saving data onto a card does not affect data in the RA-50.

＊If the display does not respond with "OK!!...", refer to page 84 "Error Messages".

⑥ Set the Protect Switch on the card back to the ON position, then remove the card.

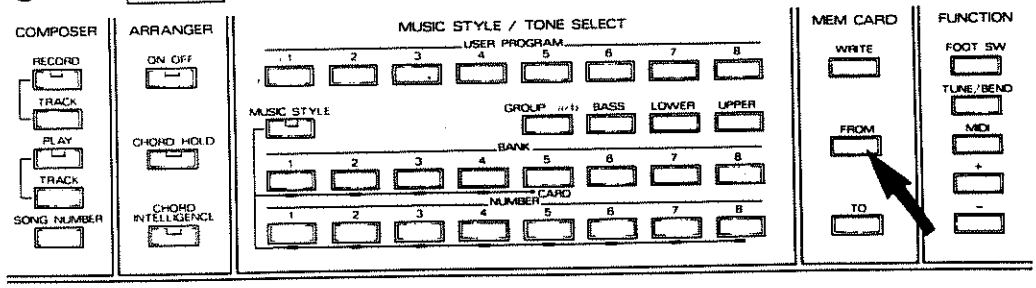
＊It may be a good idea to put down the name of the data on the label of the card.

(3) Loading data from a memory card back to the internal memory

To load data saved on a memory card back to the internal memory of the RA-50, do as follows.

① **Insert the memory card into the card slot. (Be sure that the side with the letter "ROLAND" facing upward and inserting in the correct direction that an arrow indicates.)**

② **Press** **FROM** **of CARD.**



· DISPLAY of loading User Program data

```
USER PROGRAMS
FROM MEMORY CARD
```

· DISPLAY of loading Song data

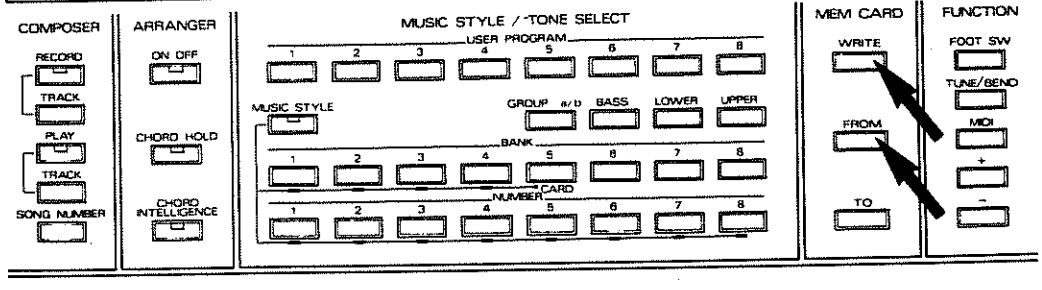
```
SONG COMPOSER
FROM MEMORY CARD
```

· DISPLAY of loading Songs and User Program data

```
SONGS/USER PROG.
FROM MEMORY CARD
```

③ **Press** **WRITE** **while holding** **FROM** **down.**

```
OK !!
LOAD COMPLETE
```



④ **Release the buttons, then remove the card.**

* When you load data into the RA-50, leave the Protect Switch on the memory card ON. When you are not using a memory card, be sure to keep the Protect Switch ON.

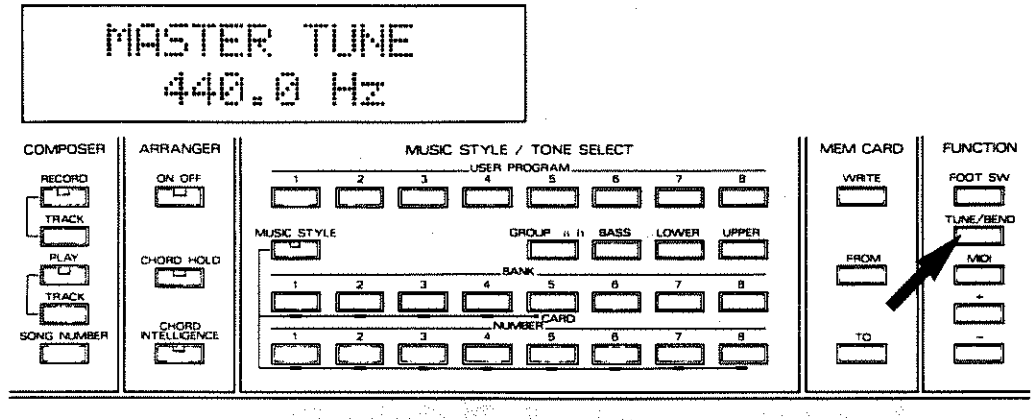
6
Advanced procedure for playing

(1) Tuning the RA-50

The RA-50 can be tuned to the connected keyboard. Adjust it with the Master Tune in the Sound Module. The variable range of the pitch is from 427.5 to 452.6Hz.

The Master Tune you have set will retain even after the unit is switched off.

① **Press** [TUNE/BEND].



●If the display does not respond as shown above, press [TUNE/BEND] until the proper Master Tuning display appears.

② **To increase the pitch, press [+]. To decease, press [−].**

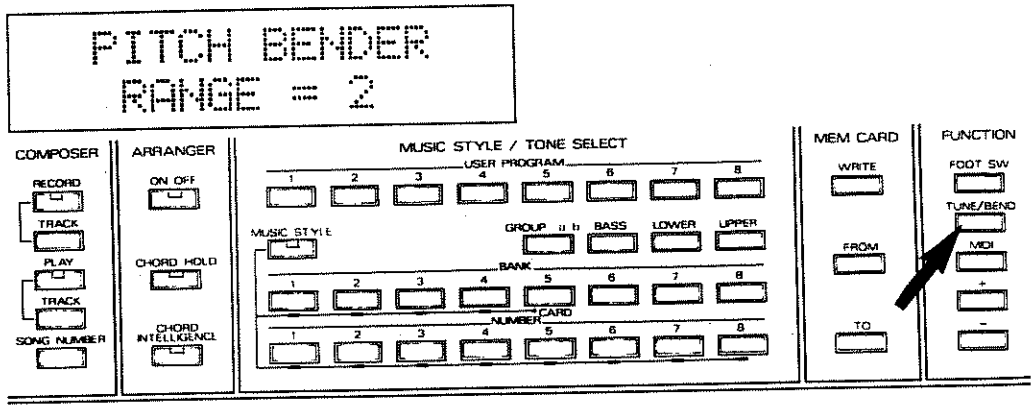
(2) Setting the Pitch Bend Range

The Upper Part of the RA-50 can receive bender messages sent from the connected keyboard. The variable range of the pitch is determined by the Pitch Bend Range value. (The RA-50 is default to Pitch Bend Range 2.)

Select a Pitch Bend Range value from the following 8.

1·····1 half tone (minor 2nd)
2·····2 half tones (major 2nd)
3·····3 half tones (minor 3rd)
4·····4 half tones (major 3rd)
5·····5 half tones (perfect 4th)
6·····6 half tones (augmented 4th)
7·····7 half tones (perfect 5th)
12·····12 half tones (an octave)

① Press TUNE/BEND.



●If the display does not respond as shown above, press TUNE/BEND until the correct display appears.

② To increase the pitch bend range, press [+]. To decrease, press [−].

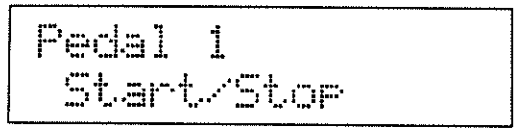
(3) Using a Foot Switch

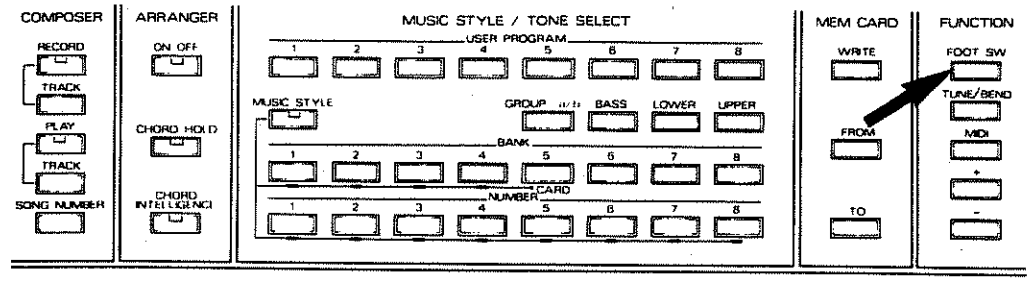
Up to three foot switches (DP-2, DP-6 or FS-5U) can be connected to the RA-50 at the same time for you to control with your foot. To each foot switch, a different function can be assigned from the panel switches.

Functions that can be assigned to the foot switches

Bypass ON/OFF (Bypass is OFF while holding down.
Bypass WHOLE is ON when the Foot Switch is released.)
Rhythm (Start ⟷ Stop)
Fill in to Variation
Fill in to Orginal
Rhythm (ORIGINAL ⟷ VARIATION)
Split ON/OFF (OFF ⟷ Split C4)
Arranger Select (Basic ⟷ Advanced)
Melody Intelligence (ON ⟷ OFF)

① Press FOOT SW to call the foot switch setting display. (Pressing FOOT SW once will select foot switch function 1. To change to a different foot switch number, press FOOT SW again.)



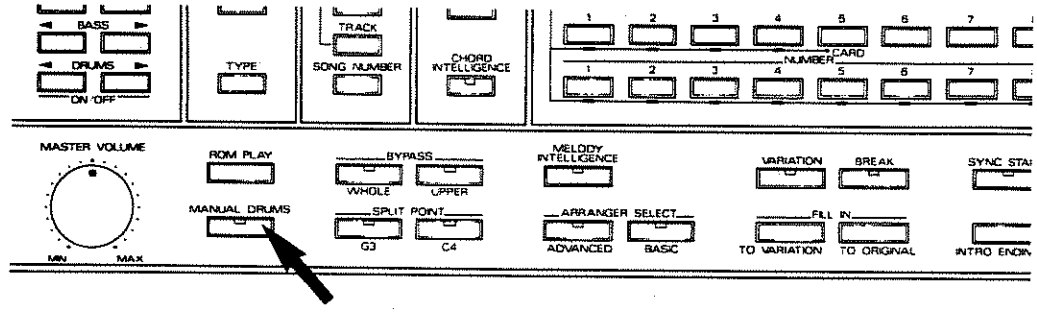


② Select the function to be assigned with [+] or [−].

(4) Manual Drums

30 different drum voices can by created by playing the keyboard.

① Press MANUAL DRUMS. (The indicator lights up.)



② Press keys on the keyboard.

*Drum voices are played whether the Rhythm is playing or stopped.

●To cancel the Manual Drums mode, simply press MANUAL DRUMS again. (The indicator goes out.)

*The Chord detecting function of the Arranger is effective even in the Manual Drums mode, therefore, it is possible to play the Manual Drums during Style Performance. However, a keyboard with less than 61 keys is too short for the Chord detecting. So, you must set the RA-50 so that bass/chord will keep playing with the Chord Hold function, then press MANUAL DRUMS to use the Manual Drums function.

*During Manual Drums playing, the arranger's chord cannot be changed. To change chords, cancel the Manual Drums mode once.

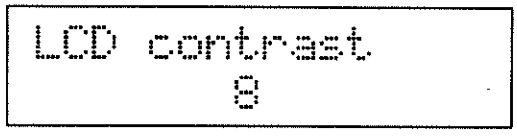
The sound positions (panning) of the RA-50's Drum voices are set as shown below. (When the Reverb is on, the sound positioning may be unclear.)

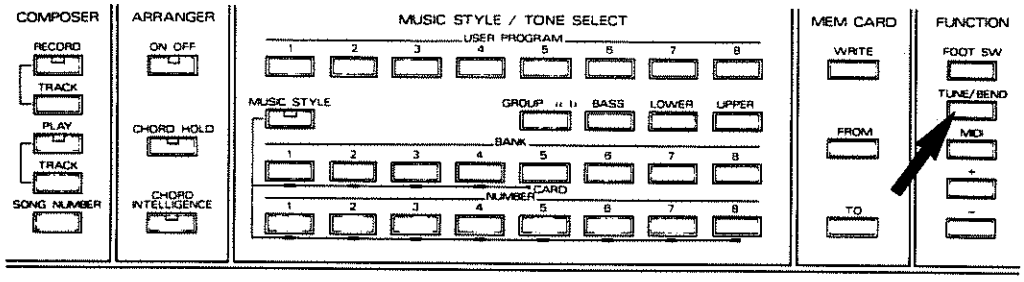
Note	Tone name	Pt 1 #	Left ‹‹‹‹‹‹ Center ›››››› Right
B 1	Acoustic Bass Drum	1	
C 2	Acoustic Bass Drum	1	
C#2	Rim Shot	1	
D 2	Acoustic Snare Drum	1	
D#2	Hand Clap	1	
E 2	Electric Snare Drum	1	
F 2	Acoustic Low Tom	1	
F#2	Closed High Hat	1	
G 2	Acoustic Low Tom	1	
G#2	Open High Hat 2	2	
A 2	Acoustic Middle Tom	1	
A#2	Open High Hat 1	2	
B 2	Acoustic Middle Tom	1	
C 3	Acoustic High Tom	1	
C#3	Crash Cymbal	2	
D 3	Acoustic High Tom	1	
D#3	Ride Cymbal	1	
E 3			
F 3			
F#3	Tambourine	1	
G 3			
G#3	Cowbell	1	
A 3			
A#3			
B 3			
C 4	High Bongo	1	
C#4	Low Bongo	1	
D 4	Mute High Conga	1	
D#4	High Conga	1	
E 4	Low Conga	1	
F 4	High Timbale	1	
F#4	Low Timbale	1	
G 4	High Agogo	1	
G#4	Low Agogo	1	
A 4	Cabasa	1	
A#4	Maracas	1	
B 4	Short Whistle	2	
C 5	Long Whistle	2	
C#5	Quijada	3	
D 5			
D#5	Claves	1	

(5) LCD Contrast

If the LCD display is not clearly viewed, adjust the contrast of the display with the LCD Contrast control. You can change the contrast in 8 levels. The contrast you have set will remain even after the unit is switched off.

① **Press** [TUNE/BEND] .





NOTE) LCD stands for "Liquid Crystal Display". Using in various devices such as a watch or calculator, since it requires small amount of power consumption and the display is stable.

●**When the display does not respond as shown above, press** [TUNE/BEND] **until the correct display appears.**

② **To make the display darker, press** [+] . **To make it lighter, press** [−] .

Now, try some functions explained so far using the example score.

ADVANCED PROCEDURE

1
Setting the MIDI functions

The following explains the RA-50's MIDI functions.

(1) What is MIDI ?

MIDI stands for Musical Instrument Digital Interface that makes it possible to send and receive messages between different electronic musical instruments. By connecting the RA-50 with another musical instrument via MIDI, you can play the musical instrument from the RA-50 or control the RA-50 from the instrument. Since the RA-50 does not feature its own keyboard, you may connect an electronic piano or MIDI keyboard to the RA-50 via MIDI. There are many other instruments that can be connected to the RA-50 via MIDI.

(2) Devices that can be connected via MIDI

The following are the instruments which can be connected to the RA-50:

Electronic Piano (e.g. Roland Piano)

Synthesizer (e.g. D-10/20/50)

Sampler (e.g. S-50)

Keyboard Controller (e.g. A-50/80)

You may connect a keyboard instrument to enjoy the RA-50's excellent sounds and Style Performance. Also, it is possible to play the RA-50's Parts using the external instrument.

MIDI Sequencer (e.g. MC-500 MKII)

A MIDI sequencer records performance data in MIDI signals and plays the recorded data. It can be used just like a tape recorder. A MIDI sequencer may be effectively used for recording a long song that cannot be recorded into the RA-50's composer. Also, you may use it to record data and correct it later.

Rhythm Machine (e.g. R-8)

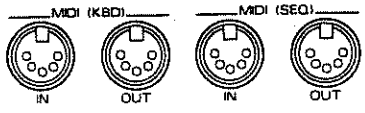
By using a rhythm machine with the RA-50, you can play the rhythm voices in the rhythm machine as well as those in the RA-50.

Effect Unit (e.g. DEP-5)

You may connect effect units to the RA-50 to add effects to the sounds.

(3) MIDI Sockets on the RA-50

The RA-50 features four MIDI sockets; MIDI (KBD) IN, MIDI (KBD) OUT, MIDI (SEQ) IN and MIDI (SEQ) OUT. Normally MIDI IN sockets receive signals from external MIDI devices and MIDI OUT sockets transmit signals to external devices. MIDI (KBD) IN and MIDI (SEQ) IN, MIDI (KBD) OUT and MIDI (SEQ) OUT, however, function in a slightly different way.



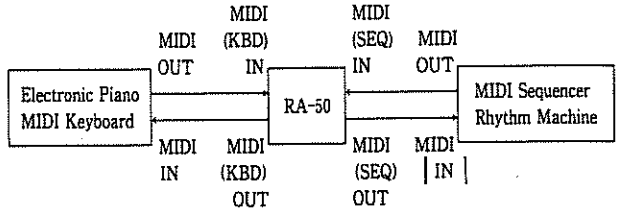
a. MIDI (KBD) IN/ MIDI (KBD) OUT

Connect an instrument that features a keyboard, such as an electronic piano, MIDI keyboard, etc. To play Style Performance on the RA-50, it is essential to connect an electronic piano or MIDI keyboard to this socket.

b. MIDI (SEQ) IN/ MIDI (SEQ) OUT

Connect a MIDI sequencer or rhythm machine to this socket. To sync the RA-50 to an external MIDI instrument, this socket is used.

* Sync Play: Sync is means that a slave unit plays to the master device in the tempo and start/stop timing of the master device.



(4) Internal Structure of the RA-50

The normal Style Performance of the RA-50 allows you to play the Upper/Lower Parts from the keyboard of the connected instrument. The other Parts can also be controlled by the external MIDI keyboard. The following are the Parts built in the RA-50.

UPPER	Upper Part
LOWER	Lower Part
BASS	Bass Part
DRUMS	Drums Part
ACCOMP1	Accompaniment Part 1 ★
ACCOMP2	Accompaniment Part 2 ★
ACCOMP3	Accompaniment Part 3 ★
Rx. 1	Part 1 for receiving only
Rx. 2	Part 2 for receiving only

★Correspond to the accompaniments for the Style Performance.

DRUMS Part is specifically for drum voices played with the Manual Drums function. The other Parts can be played with various sounds and controlled via MIDI.

Receive Parts 1 and 2 are not used for performance on the RA-50 itself (when playing the Upper/Lower Parts from an electronic piano or the Style Performance), but can also be controlled via MIDI and played just like the other Parts.

Moreover, there are Arranger Parts which are provided for controlling the Arranger function or change Music Styles externally.

Arranger UPPER	Upper Part + Melody Intelligence
Arranger LOWER	Lower Part + Arranger, Chord Intelligence
CONTROL	Changing Music Styles

The above Parts can set MIDI channel, Part On/Off, Program Change On/Off and Control Change On/Off for receive (Rx), transmit (Tx) and extended transmit (Ex) individually.

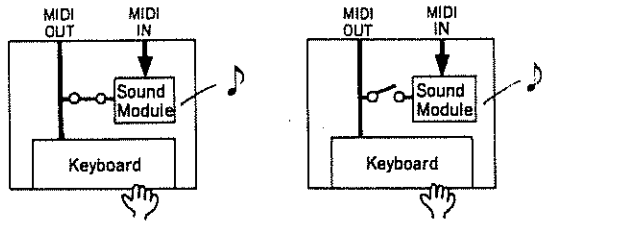
(5) Difference between normal transmission and extended transmission

Normally, performance massages of each Part are transmitted through the MIDI (SEQ) OUT socket. Extended transmission transmits the performance messages of each Part through the MIDI (KBD) OUT when playing the Style Performance using the sound modules (e. g. external synthesizer) other than the RA-50's internal sound module.

(6) Local Control

Normally, a MIDI keyboard such as an electronic piano generates sound when the keyboard is played. This is because the keyboard and the internal sound module are connected (this is Local On condi-

tion). However, in some types of keyboards, the keyboard and the internal sound module can be disconnected (this is Local Off condition).

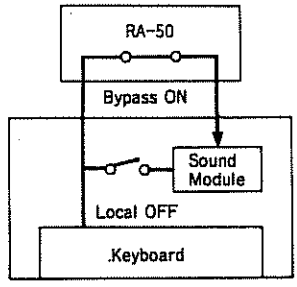


Sound is produced when the Keyboard is played.

No sound is produced when the Keyboard is played. (Sound is produced by performance messages received through MIDI IN)

When the unit is set to Local Off, performance messages from the keyboard are only output from the MIDI OUT, therefore, the internal sound module is controlled only by the messages received through the MIDI IN. When you use a MIDI keyboard with the RA-50, set the MIDI keyboard to Local Off. In this way, the sound of the MIDI keyboard and the RA-50 can be used separately or play the Split performance.

When using the MIDI keyboard on its own, turn the Bypass of the RA-50 on. In this way, the performance messages fed into the MIDI (KBD) IN are transmitted from the MIDI (KBD) OUT, playing the internal sound module from the keyboard of the MIDI keyboard.



(7) Functions of the Panel Switches for MIDI

When MIDI functions are being edited (when [MIDI] is pressed), the panel switches function differently.

USER PROGRAM	Selects the MIDI function to be edited.
TO	Selects the Part to be set (to the next Part).
FROM	Selects the Part to be set (to the previous Part).
+	Changes values (increasing a number / ON).
−	Changes values (decreasing a number / OFF).
WRITE	Calls the Program Change map.
MUSIC STYLE	Finishes editing

*While a Music Style is being played, MIDI functions cannot be edited. (Pressing [MIDI] has no effect.)

When USER PROGRAM 1 ~ 4, 6 or 7 is selected, Parts (display) are changed as show below.

2 MIDI Channels of Parts / MIDI Filter

(1) Setting the MIDI Channels

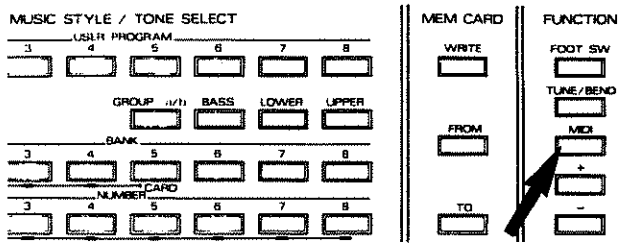
The receive, transmit, extended transmit channels can be set for each Part.

Receive ····· MIDI channel for playing a Part with the messages from the MIDI (KBD/SEQ) IN.

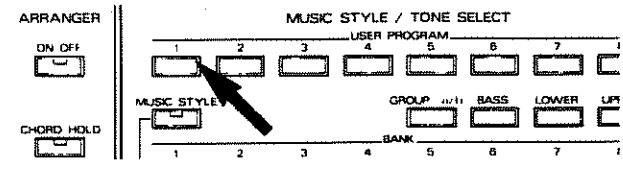
Transmit ····· MIDI channel for transmitting the Style Performance messages from the MIDI (SEQ) OUT.

Extended transmit ····· MIDI channel for transmitting the Style Performance messages from the MIDI (KBD) OUT.

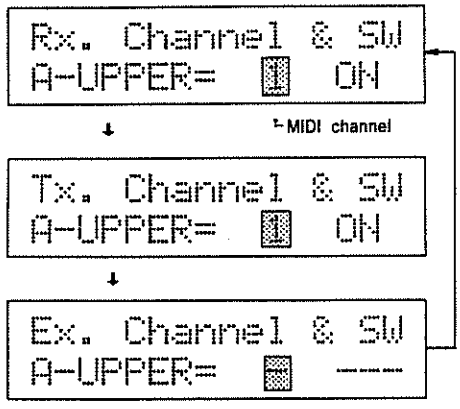
① Press [MIDI].
(The previous display appears.)



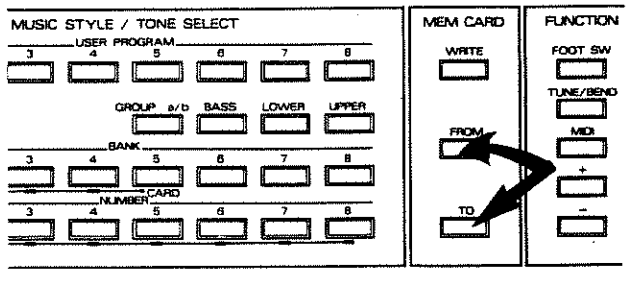
② Press USER PROGRAM [1].



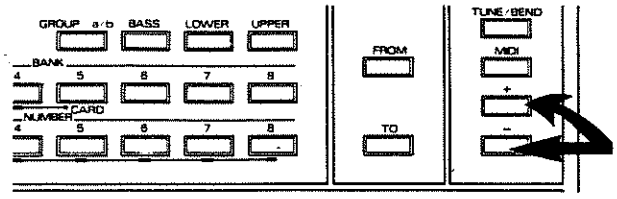
*Each time you press USER PROGRAM [1], the display changes as "Rx. - Tx. - Ex. - Rx. ".



③ Press [TO] ([MIDI]) and [FROM] to select the Part to be edited.

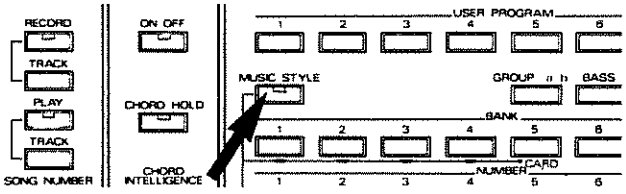


④ Set the channel using [+] or [−].



*Repeat steps 2 to 4 to set the channels of all Parts.

⑤ Press **MUSIC STYLE**.



*To continue to set the other MIDI parameters, select the parameter with USER PROGRAM.

*If the keyboard connected to the MIDI (KBD) IN does not feature the function to change the MIDI channels, set the Arranger UPPER/LOWER's receive (Rx.) and transmit (Tx.) channels to the same number as the keyboard's channel. In this way, the Arranger function can be controlled from the connected keyboard.

*The MIDI channels of the Arranger UPPER/LOWER are MIDI receive channel that activates the Arranger function and transmit channel used for Bypass On. (MIDI (SEQ) OUT = transmit, MIDI (KBD) OUT extended transmit)

*MIDI channel of CONTROL is the channel on which Program Change messages for changing Music Styles are transmitted and received.

< Factory Preset >

Part	Receive(Rx.)	Transmit(Tx.)	Extended Transmit(Ex.)
A-UPPER	1	1	–
A-LOWER	1	1	–
CONTROL	16	16	–
UPPER	4	*4	4
LOWER	3	*3	3
BASS	2	*2	2
DRUMS	10	*10	10
ACCOMP1	5	*5	5
ACCOMP2	6	*6	6
ACCOMP3	7	*7	7
Rx. 1	8	*8	8
Rx. 2	9	*9	9

*The numbers darkened with gray are restored each time the unit is switched on.

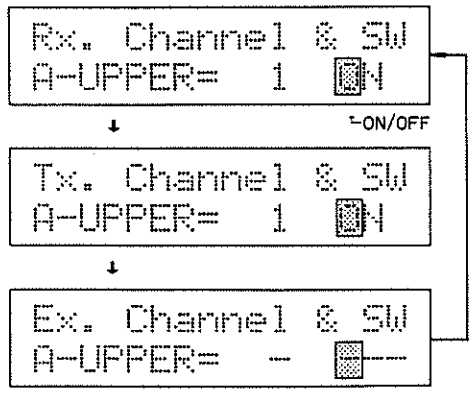
(2) On/Off of MIDI

This determines whether or not to use MIDI receive, transmit and extended transmit channel of each Part.

① Press **MIDI**.
(The previous display is retrieved.)

② Press USER PROGRAM [2].

*Each time you press USER PROGRAM [2], the display changes as "Rx. - Tx. - Ex. - Rx.".



③ Select the Part to be edited with **TO** (**MIDI**) or **FROM**.

④ Set ON or OFF using [+] or [−].

●Repeat steps 2 to 4 to set On/Off of the other Parts.

⑤ When you finish, press **MUSIC STYLE**.

*To continue to edit the other MIDI functions, select the function to be edited with USER PROGRAM.

< Factory Preset >

Part	Receive(Rx.)	Trapsmit(Tx.)	Extended Transmit(Ex.)
A-UPPER	ON	ON	–
A-LOWER	ON	ON	–
CONTROL	ON	ON	–
UPPER	ON	*ON	OFF
LOWER	ON	*ON	OFF
BASS	ON	*ON	OFF
DRUMS	ON	*ON	OFF
ACCOMP1	ON	*ON	OFF
ACCOMP2	ON	*ON	OFF
ACCOMP3	ON	*ON	OFF
Rx. 1	ON	*ON	OFF
Rx. 2	ON	*ON	OFF

*The ON or OFF settings darkened with gray are restored each time the unit is switched on.

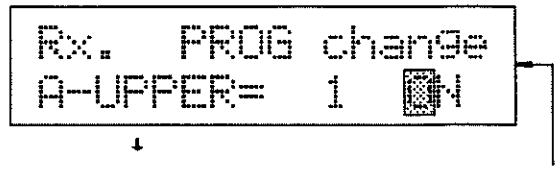
(3) On/Off of Program Change

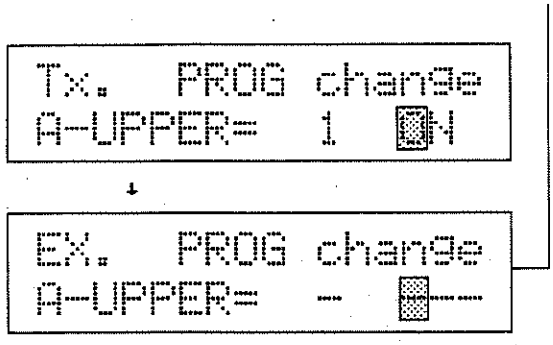
This determines whether to use Program Change (Tone Selection messages) or not.

① Press **MIDI**.
(The previous display is retrieved.)

② Press USER PROGRAM [3].

*Each time you press USER PROGRAM [3], the display changes as "Rx. - Tx. - Ex. - Rx.".





③ Select the Part to be edited with TO (MIDI) or FROM.

④ Set ON or OFF using + or −.

●Repeat steps ② to ④ to set On/Off of the other Parts.

⑤ When you finish, press MUSIC STYLE.

*To continue to edit the other MIDI functions, select the function to be edited with USER PROGRAM.

*In the Arranger UPPER/LOWER Parts, the received Program Change messages are output through MIDI OUT according to the Bypass setting.

*In the UPPER, LOWER, BASS, ACCOMP1, ACCOMP2, ACCOMP3, Rx.1 and Rx.2 Parts, Tones are changed by receiving Program Change messages. Program Change messages are transmitted from these Parts when Tones are changed with User Program or Music Style data. Extended transmission transmits Program Change according to the Program Change map.

* Program Change numbers shown as ---- are ignored even when received.

* Pressing relevant buttons transmits the corresponding Program Change number. When a Program Change number is received, the RA-50 reacts as if the relevant buttons on the RA-50 were pressed.

< Factory Preset >

Part	Receive (Rx.)	Transmit (Tx.)	Extended Transmit (Ex.)
A-UPPER	(OFF)	(OFF)	(OFF)
A-LOWER	(OFF)	(OFF)	(OFF)
CONTROL	ON	(ON)	(ON)
UPPER	ON	*ON	OFF
LOWER	ON	*ON	OFF
BASS	ON	*ON	OFF
DRUMS	ON	*ON	OFF
ACCOMP1	ON	*ON	OFF
ACCOMP2	ON	*ON	OFF
ACCOMP3	ON	*ON	OFF
Rx. 1	ON	*ON	OFF
Rx. 2	ON	*ON	OFF

* The ON or OFF settings shown in ( ) cannot be edited.

* The ON or OFF settings darkened with gray are restored each time the unit is switched on.

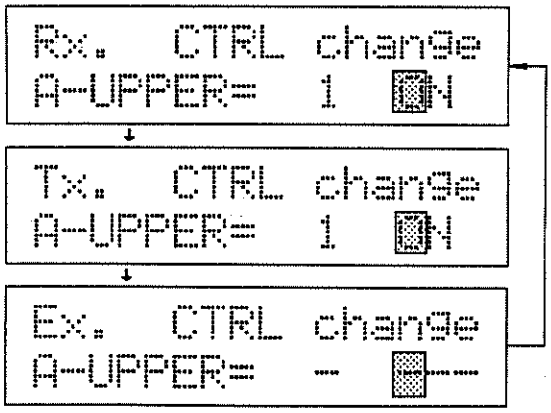
(4) On/Off of Control Change

This determines whether or not to use Control Change for each Part.

① Press [MIDI].
(The previous display is retrieved.)

② Press USER PROGRAM [4].

*Each time you press USER PROGRAM [4], the display changes as "Rx. - Tx. - Ex. - Rx.".



③ Select the Part to be edited with [TO] ([MIDI]) or [FROM].

④ Set ON or OFF using [+] or [−].

●Repeat steps ② to ④ to set On/Off of the other Parts.

⑤ When you finish, press [MUSIC STYLE].

*To continue to edit the other MIDI functions, select the function to be edited with USER PROGRAM.

The following are the Control Changes that can be received and transmitted.

CTRL#	Name	Description
1	Modulation	Creates vibrato effect.
6	Data Entry	Used for RPN.
7	Volume	Adjusts the volume.
10	Panpot	Controls the sound positioning.
11	Expression	Controls the volume.
64	Hold 1	Stretches the sound.
100, 101	RPN	Controls parameters. *1
121	Reset All Controllers	Resets all the controllers.

*1:RPN 0 Controls the maximum range of the pitch change caused by the pitch bender.

<Factory Preset>

Part	Receive(Rx.)	Transmit(Tx.)	Extended Transmit(Ex.)
A-UPPER	ON	–	–
A-LOWER	ON	–	–
CONTROL	ON	–	–
UPPER	ON	*ON	OFF
LOWER	ON	*ON	OFF

ACCOMP2	ON	*ON	OFF
ACCOMP3	ON	*ON	OFF
Rx. 1	ON	*ON	OFF
Rx. 2	ON	*ON	OFF

3 Other MIDI Settings

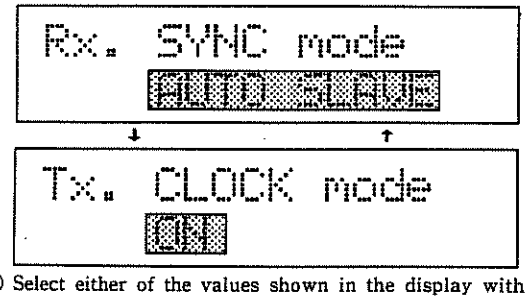
(1) Setting the Sync Mode

In the Sync Mode, you must set whether to control the tempo on the RA-50 or from external MIDI clocks. Also, you can set whether or not to output MIDI clocks through the MIDI (SEQ) OUT.

① Press [MIDI].
(The previous display is retrieved.)

② Press USER PROGRAM [5].

*Each time you press USER PROGRAM [5], the display changes as "Rx. - Tx. - Ex. - Rx.".



③ Select either of the values shown in the display with [+] or [−].

The following describes the indication in the display.

Rx. SYNC mode ····· Sync Mode (Rx.)

AUTO SLAVE ····· Normally, Start/Stop and tempo are controlled by the RA-50. However, if the RA-50 receives Start or Continue message from the MIDI (SEQ) IN or MIDI (KBD) IN without Style Performance being played, it syncs to the MIDI clock from the MIDI (SEQ) IN or MIDI (KBD) IN. (When the RA-50 receives Stop message, it is returned to normal.)

REMOTE ····· The Style Performance is started or stopped by Start, Continue or Stop message received through the MIDI (SEQ) IN. The tempo, however, is controlled by the RA-50. (MIDI clocks are ignored.)

OFF ····· Start/Stop and tempo are controlled by the RA-50. Select this when you use the RA-50 as a sound module just like the MT-32.

TX. CLOCK mode ····· Clock Transmit (Tx)

ON ····· Transmits MIDI clocks from the MIDI (SEQ) OUT.

OFF ····· Does not transmit MIDI clocks from the MIDI (SEQ) OUT.

④ When you finish, press [MUSIC STYLE].

* To continue to edit the other MIDI functions, select the function to be edited with USER PROGRAM.

< Factory Preset >

Rx SYNC mode	AUTO SLAVE
Tx CLOCK mode	ON

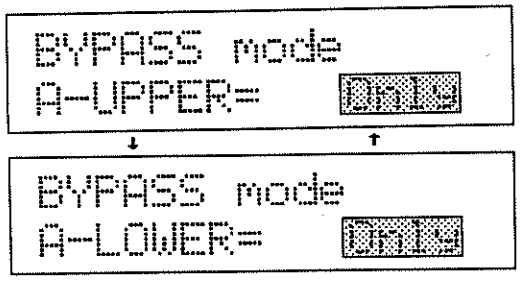
(2) Setting the Bypass Mode

You must select what kind of MIDI messages are transmitted from the MIDI OUT with [BYPASS] set to on.

① Press [MIDI].
(The previous display is retrieved.)

② Press USER PROGRAM [6].

③ Select the Arranger UPPER or LOWER which you wish to edit with [TO] ([MIDI]) or [FROM].



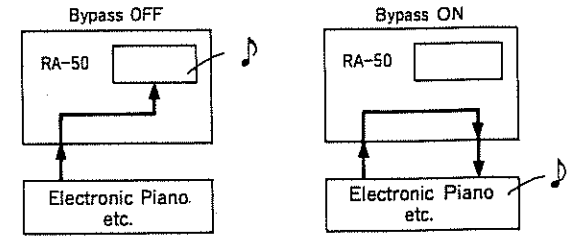
④ Select either of the indication in the display using [+] or [−].

The following describes the indication in the display.

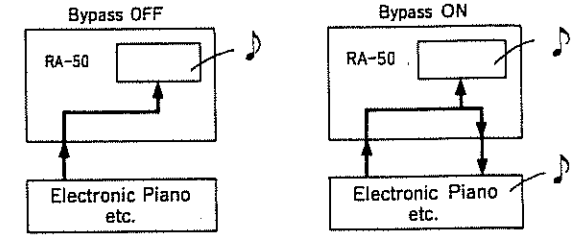
Only ····· When the Bypass is set to off, only the RA-50's internal sound module will be played by performance messages received at MIDI (KBD) IN (performance messages are not output from the MIDI (KBD) OUT). When the Bypass is turned on, performance messages from the MIDI (KBD) IN are output through the MIDI (KBD) OUT (the internal sound module of the RA-50 is not played).

Both ····· When the Bypass is set to off, only the RA-50's internal sound module will be played by performance messages sent through MIDI (KBD) IN (performance messages are not output from the MIDI (KBD) OUT). When the Bypass is turned on, the internal sound module of the RA-50 is played by the performance messages received through the MIDI (KBD) IN and the performance messages are output from the MIDI (KBD) OUT.

●Only



●Both



④ When you finish, press [MUSIC STYLE].

* To continue to edit the other MIDI functions, select the function to be edited with USER PROGRAM.

< Factory Preset >

A-UPPER	Only
A-LOWER	Only

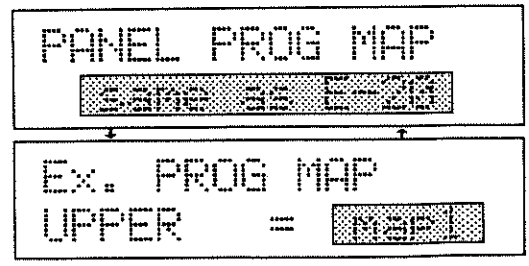
(3) Selecting a Program Change Map

A Program Change Map shows how the Program numbers are assigned to the actual sound numbers of the sound module. The six types of Program Change maps we have here are accompanied with the Program numbers that will be transmitted on the Extended transmit channel when tones on the RA-50 are changed. By using a different Program Change map, the assignment of the Program numbers to the sounds in the RA-50 or external sound module will change. As well as the six Program Change maps, you can select E-20 or MT-32 mode that determines what sound is actually selected by a sound number you assign using the panel switches.

① Press [MIDI].
(The previous display is retrieved.)

② Press USER PROGRAM [7].

* Each time you press USER PROGRAM [7], the Panel (PANEL PROG MAP) and Map (Ex. PROG MAP) setting display will be alternately called.



Panel ····· In this display, you select whether to change RA-50's tones in the same sequence as the E-20 or MT-32.

Map ····· In this display, you select one of the six Program Change maps for each Part.

③ In the Map display, select the Part to be edited with [TO] ([MIDI]) or [FROM].

④ Select a map using [+] or [−].

The following describes the indication in the display.

Panel

same as E-20 ····· When you change tones on the RA-50 using the panel switches, the tones are changed in the same sequence as the E-20.
same as MT-32 ····· When you change tones on the RA-50 using the panel switches, the tones are changed in the same sequence as the MT-32.

Map

map1 ~ map6 ····· Six types of Program Change maps that are accompanied with the Program numbers that will be transmitted on the Extended transmit channel when tones on the RA-50 are changed.

● Repeat steps ② to ④.

⑤ When you finish, press [MUSIC STYLE].

* To continue to edit the other MIDI functions, select the function to be edited with USER PROGRAM.

(4) Editing a Program Change Map

In this Program Change Map, you can edit the assignment of the Program number (that will be transmitted on the Extended transmit channel) to the Tones on the RA-50 for each Program Change Map.

① Press [MIDI].
(The previous display is retrieved.)

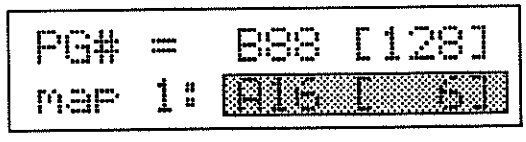
② Press USER PROGRAM [8].

③ Select a map to be edited using [+] or [−].

④ Press [WRITE].

⑤ Select the source tone number (the number of the actual sound) using [GROUP a/b], [BANK] and [NUMBER].

⑥ Select the Program Number with [+] or [−].



● Repeat steps ⑤ and ⑥.

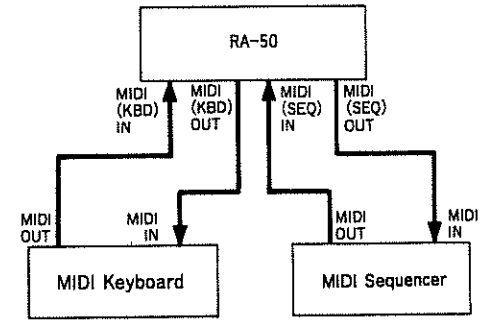
⑦ Press [WRITE].

⑧ Press [MUSIC STYLE].

4 Using the RA-50 with a MIDI sequencer

(1) MIDI Sequencer

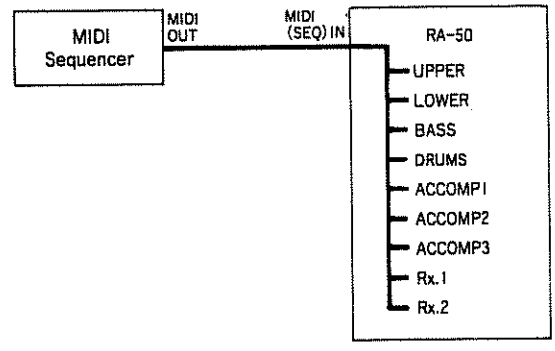
The RA-50's Song Composer can record the Style Performance and Upper/Lower performance. However, using a MIDI sequencer such as the MC-500MKII, you can enjoy more sophisticated ensemble and sync performance.



As shown in the picture, connect the sequencer to the MIDI (SEQ) IN and MIDI (SEQ) OUT. Use the MIDI (KBD) IN and MIDI (KBD) OUT for the connection of an electronic piano or MIDI keyboard.

(2) Control from a MIDI sequencer

By sending messages to the RA-50 through MIDI (SEQ) IN, the RA-50 can be used as a multi timbral sound module that features 8 individual synthesizer parts and one rhythm part.



a. When not using the RA-50's Arranger Function

To record the performance played on the keyboard into a MIDI sequencer and play the recorded data on the RA-50, do as follows.

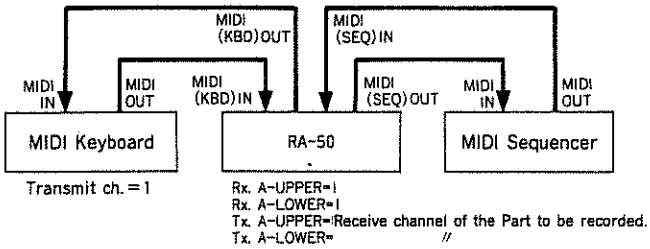
① Set the MIDI transmit channel of the keyboard and the receive channels (Rx.) of the A-UPPER/LOWER to the same number.

② Set the transmit channels (Tx.) of the A-UPPER/LOWER to the same number as the receive channel (Rx.) of the Part you wish to play.

③ Set the Rx.SYNC mode to OFF.

④ Record the performance into the MIDI sequencer.

For instance, to record into Rx.1 Part in the following settings, set the transmit channels (Tx.) of A-UPPER/LOWER to 8.



b. When using the RA-50's Arranger Function

When you record the Style Performance played with the Arranger function into a MIDI sequencer, individual performance messages such as Upper, Lower, Bass, Drums, etc. are transmitted on the respective transmit channels (Tx.). In other words, the data of the Style Performance is output in the original form as MIDI performance messages. Therefore, once it is recorded into a MIDI sequencer, it can be played using the RA-50 as a sound module (without using the RA-50's Arranger function).

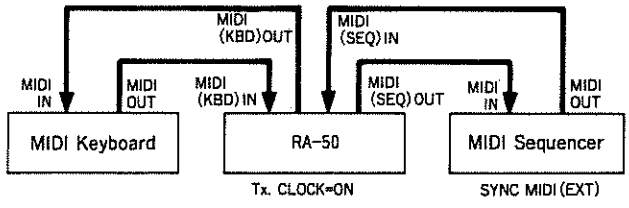
① Set the Tx CLOCK mode of the RA-50 to ON.

② Set the Rx.SYNC mode to OFF.

③ Set the Clock (Sync) of the MIDI sequencer to MIDI or EXT (External).

④ Set the MIDI sequencer to the recording condition and start the RA-50, and recording starts automatically.

To play back the recorded data, set the Clock (Sync) of the MIDI sequencer back to INT (Internal).



c. When using the RA-50's Arranger Function from the MIDI sequencer

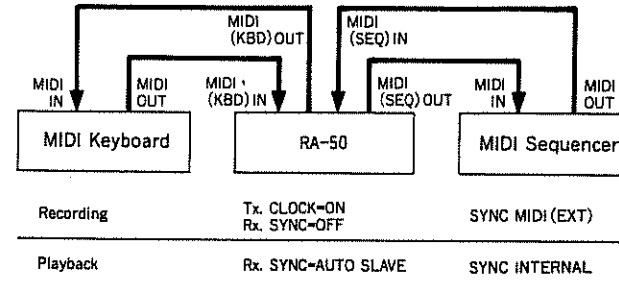
The RA-50 can play the Style Performance with the MIDI messages sent from an external MIDI sequencer. The performance messages are not recorded in the sequencer, but the keyboard connected to the MIDI (KBD) IN and RA-50's panel operation can control the Style Performance.

① To record a performance, set the transmit (Tx) of all the Part except A-UPPER/LOWER and CONTROL to OFF.

② Set the Tx. CLOCK mode to ON, and Rx. SYNC mode to OFF.

③ Set the MIDI sequencer to the recording condition, and play the keyboard. The recording starts automatically.

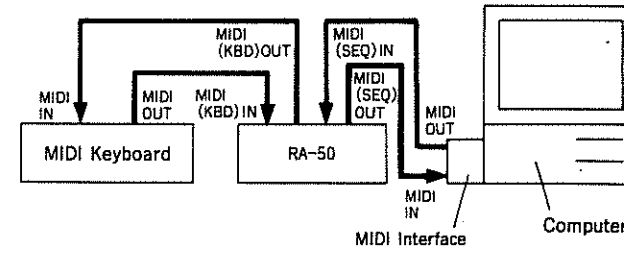
④ To play back the recorded data, set the Rx. SYNC mode to AUTO SLAVE so that the MIDI sequencer can output MIDI clocks.



5 Using the RA-50 with a MIDI instrument other than a sequencer

(1) Computer (Sequence software)

Instead of the MIDI sequencer, you can use a computer + sequencer software. For instance, by connecting the sequence software to the RA-50, the RA-50 can be controlled by the sequence software.



When the RA-50 is used as a sound module, it works almost the same as the MT-32. That is, you can follow the MT-32 for tone selection on the sequence software or the track performance.

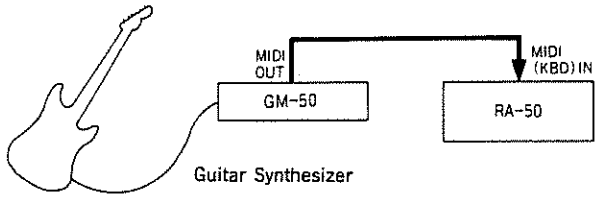
Split Select	Chord Detecting Range	Lower Sound Range
SPLIT OFF	Zero	The entire keyboard
SPLIT G3	Lower than F♯3	Higher than G3
SPLIT C4	Lower than B3	Higher than C4

* To obtain successful chord change, you may input chord data slightly forward.

* It is better to turn the Chord Hold on in playback.

(2) Guitar Synthesizer

The RA-50 can also be used for the guitar synthesizer's sound module. For example, for the MIDI Guitar Synthesizer system, GK-2 + GR-50, or for the GK-1 + GM-70.



When you use the RA-50 as a sound module for a guitar synthesizer, set the receive channel (Rx.) of each Part to the individual string of the guitar. In this way, you can express the bending or vibrato effects that create realistic guitar performance. Also, the Style Performance can be played by a guitar synthesizer just like the MIDI keyboard.

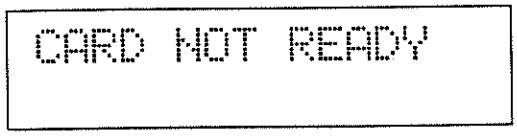
■ Troubleshooting

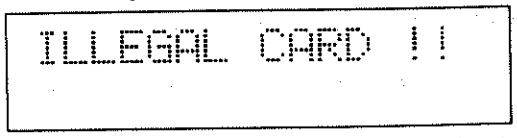
(1)Error Messages

Error Messages shown when a Memory Card is being used :



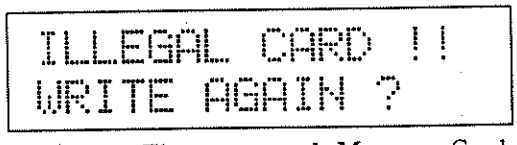
Cause : No Memory Card is connected.

What to do : Insert a Memory Card securely and repeat the procedure.



Cause : 1. The connected Memory Card is brand new.
2. The connected Memory Card does not contain data for the RA-50, or a Music Style Card is connected.

What to do : 1. Write some data on the Card.
2. Replace with a proper Card contains the RA-50's data.



Cause : 1. The connected Memory Card is brand new.
2. The connected Memory Card contains data for some other unit other than the RA-50.

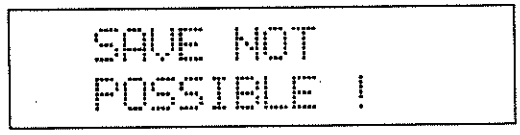
What to do : 1. Press **WRITE** and write data onto the Card.
2. If you do not mind erasing the existing data, press **WRITE** again to write data of the RA-50.

Cause : The battery of the Memory Card is exhausted, or no battery is set to the Memory Card.

What to do : Replace with the battery with a new one (CR-2016).

Cause : The protect switch on the Memory Card is set to the ON position.

What to do : Set the protect switch on the Memory Card to the OFF position, and repeat the procedure.



Cause : You have tried to write data on the ROM (read only) Card such as a Music Style Card.

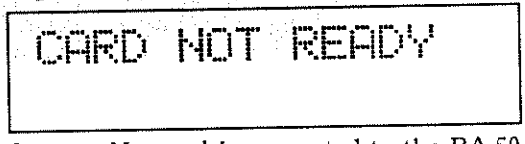
What to do : Replace the Card with a proper Memory Card for writing (M-256E/256D).

Error Message specific for the RA-50

Cause : The RA-50's internal battery is exhausted.

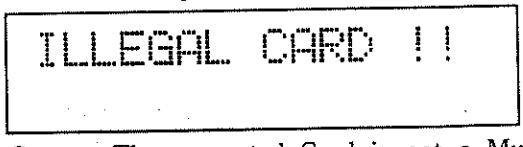
What to do : Have the local Roland service replace the battery.

Error messages shown when using a Music Style Card



Cause : No card is connected to the RA-50.

What to do : Connect the music Style Card securely and repeat the procedure.



Cause : The connected Card is not a Music Style Card.

What to do : Replace the Card with a Music Style Card.

(2)Troubleshooting

No sound is generated.

Cause: 1.The Master Volume knob is set to the MIN position.
2.The RA-50 is not connected securely with the Roland Piano.
3.The volume of the connected piano or amplifier is set too low.
4.The Part volume of BALANCE is set to zero or OFF.

What to do: 1.Raise the Master Volume knob until you can hear the sound.
2.Connect the RA-50 securely with the external instrument.
3.Raise the volume of the external units until you can hear the sound.
4.Set the Part volume of BALANCE to the ON posision, then increase the value until you can hear the sound.

* The RA-50 does not function properly for several seconds after being switched on.

Tones cannot be selected correctly.

Cause: You have selected the Upper Tone without pressing [UPPER] after selecting a Lower Tone (or vise versa).

What to do: The RA-50 continues to select a Tone of the previous Part. So, to select a Upper Tone after selecting a Lower Tone, you must press [UPPER].

Quick phrases are difficult to hear.

Cause: You are playing a quick phrase using a soft sound with slow attack.

What to do: Sone tones may be slow attack sounds and therfore are not suitable for quick phrases. (e.g. A47 SOUND TRACK). For quick phrases, use quick attack sounds, such as a guitar or piano.

Style Performance cannot be played.

Cause: The Arranger function is set to OFF.

What to do: When the Arranger function is set to OFF, Style Performance cannot be played. Set the Arranger function to ON.

Sound is cut during Style Performance. Melody Intelligence function cannot be obtained.

Cause: Many performance data are programmed in the same timing.

What to do: The maximum number of voices that the RA-50 can produce at the same time is 32. (A conventional synthesizer can produce only 8 to 24 voices.) However, for the Style performance, the RA-50 has to take many roles at the same time. Therefore, if you use many performance data of the same timing, the RA-50's voices may become short. When you use the Melody Intelligence function, be sure that sufficient number of voices are left free.

Sound does not stop.

Cause: 1.The Chord Hold function is turned on in the Split mode.
2.The MIDI cable is disconnected.

What to do: 1.Press [CHORD HOLD] to turn off the Chord Hold function.
2.Switch the unit off once and connect the cable securely.

Two sounds are mixed/the sound which is not selected is played.

Cause: You have pressed [MIDI] in FUNCTION.

What to do: If you change MIDI channels without carelessly, you may unexpectedly hear Lower Tone or Bass Tone when not using the Split function, or hear drum sound when not using the Manual Drums function. If this happens, switch the unit off, then switch it on again to

return to the normal condition.

* For explanation about MIDI, see page/72 "ADVANCED PROCEDURE".

When the Bypass Switch is on, the pitch of the RA-50 does not match that of the piano.

Cause : The RA-50 is not correctly tuned to the piano.

What to do : The Master Tune of a Roland Piano has been set to 442Hz from the manufacturer, so you must set the pitch of the RA-50 to the same value. Make sure that the tuning knob on the rear of the Roland Piano is set to the center posittion (=442Hz), press **TUNE/BEND** on the RA-50, then press **+** until the display shows "442.0Hz".

* When a different type of keyboard is used, find out the Master Tune value of the keyboard in its owner's manual, then set the RA-50's Master Tune to the same value.

If the unit does not function properly even after performing the above corrections, call your local Roland service.

kk = Note number : 00H – 7FH (0 – 127)
vv = Velocity : 00H – 7FH (0 – 127) : ignored

* A tone whose envelope is "NO SUS" ignores Note off message.

●Note on

Status	Second	Third
9nH	kkH	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
kk = Note number : 0CH – 6CH (12 – 108)
vv = Velocity : 00H – 7FH (0 – 127)

*Notes numbers outside of the range 12 – 108 are shifted to the nearest octave inside the range.

●Control change

○Modulation

Status	Second	Third
BnH	01H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Modulation depth : 00H – 7FH (0 – 127)

○Data entry

Status	Second	Third
BnH	06H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Value of a parameter specified by RPN.

○Volume

Status	Second	Third
BnH	07H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Volume : 00H – 7FH (0 – 127)

*Can be control the volume of a part accesible through the receive MIDI channel. The maximum volume is determined by MASTER VOLUME and Expression message.

○Pan

Status	Second	Third
BnH	0AH	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Pan : 00H – 7FH (0 – 127)

*Orientation of sound is as follows.
127 = LEFT, 63 = CENTER, 0 = RIGHT

○Expression

Status	Second	Third
BnH	0BH	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Expression : 00H – 7FH (0 – 127)

*Can be control the volume of a part accesible through the receive MIDI channel. The maximum volume is determined by MASTER VOLUME and Volume message.

○Hold 1

Status	Second	Third
BnH	40H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Value : 00H – 3FH = OFF, 40H – 7FH = ON

○RPN LSB

Status	Second	Third
BnH	64H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = The least significant byte of a RPN.

○RPN MSB

Status	Second	Third
BnH	65H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = The most significant byte of a RPN.

*Using RPN, RA – 50's parameter can be controlled by Control change message. RPN MSB and LSB specify the parameter to be controlled while Data entry sets a value of the parameter.
Effective RPN to RA – 50 is Pitch bend sensitivity (# 0).

RPN MSB	RPN LSB	Data entry	Description
00H	00H	vvH vv = 0 – 24	Pitch bend sensitivity Unit in semitone, 2 octave maximum.

●Program change

Status	Second
CnH	ppH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
pp = Program number : 00H – 7FH (0 – 127)

* Program change is used to change Patches.

●Pitch bend change

Status	Second	Third
EnH	llH	mmH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
mm,ll = Value : 00H,00H – 7FH,7FH 0 – 16383 (–8192 – +8191)

■Channel mode message

○Reset all controllers

Status	Second	Third
BnH	79H	00H

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16

* Set each value of the controls as follows.

Controller	Set value
Modulation	OFF (0)
Hold1	OFF (0)
Expression	Max (127)
Pitch bend change	CENTER

■System Exclusive Message

Status	data
F0H F7H	iiH,ddH,.....,eeH

F0H : System Exclusive
ii = ID number : 00H – 7FH (0 – 127)
dd,....,ee = data : 00H – 7FH (0 – 127)
F7H : EOX (End of Exclusive/System common)

* Using System Exclusive Communications, refer to Sections 5 – 8.

4.1.2 Drums part

■Channel Voice Message

●Note off

Status	Second	Third
8nH	kkH	vvH
9nH	kkH	00H

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
kk = Note number : 18H – 57H (24 – 87)
vv = Velocity ignored

* A tone whose envelope mode is "NO SUS" ignores Note off message.

●Note on

Status	Second	Third
9nH	kkH	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
kk = Note number : 18H – 57H (24 – 87)
vv = Velocity : 01H – 7FH (1 – 127)

* Notes numbers outside of range 24 – 87 are ignored.

●Control change

○Data entry

Status	Second	Third
BnH	06H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Value of a parameter specified by RPN.

○Volume

Status	Second	Third
BnH	07H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Volume : 00H – 7FH (0 – 127)

*Can be control the volume of a part accesible through the receive MIDI channel. The maximum volume is determined by MASTER VOLUME and Expression message.

○Expression

Status	Second	Third
BnH	0BH	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = Expression : 00H – 7FH (0 – 127)

*Can be control the volume of a part accesible through the receive MIDI channel. The maximum volume is determined by MASTER VOLUME and Volume message.

○**RPN LSB**

Status	Second	Third
BnH	64H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = The least significant byte of a RPN.

○**RPN MSB**

Status	Second	Third
BnH	65H	vvH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
vv = The most significant byte of a RPN.

*Using RPN, RA – 50's parameter can be controlled by Control change message. RPN·MSB and LSB specify the parameter to be controlled while Data entry sets a value of the parameter.
Effective RPN to RA – 50 is Pitch bend sensitivity (# 0).

RPN MSB LSB	Data entry	Description
00H 00H	vvH vv = 0 – 24	Pitch bend sensitivity Unit in semitone, 2 octave maximum.

●**Pitch bend change**

Status	Second	Third
EnH	llH	mmH

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16
mm,ll = Value : 00H,00H – 7FH,7FH 0 – 16383 (– 8192 – + 8191)

■**Channel mode message**

○**Reset all controllers**

Status	Second	Third
BnH	79H	00H

n = MIDI channel number : 0H – FH (0 – 15) 0 = ch.1 15 = ch.16

* Set each value of the controls as follows.

Controller	Set value
Pitch bend change	Center
Expression	Max (127)

■**System Exclusive Message**

Status	data
F0H F7H	iiH,ddH,.....,eeH

F0H : System Exclusive
ii = ID number : 00H – 7FH (0 – 127)
dd,....,ee = data : 00H – 7FH (0 – 127)
F7H : EOX (End of Exclusive/System common)

* Using System Exclusive Communications, refer to Sections 5 – 8.

5. Exclusive communications

Use MIDI (SEQ) IN and MIDI (SEQ) OUT, while communicating System Exclusive. Parameter for patches or other data can be transffered to RA – 50 through System Exclusive Message.
Model ID # and device ID # of RA – 50 are 16H and 10H (SOUND MODULE SECTION), 2DH and 1FH (ARRANGER SECTION).

■**One way communication**

Byte	Description
F0H	Exclusive Status
41H	Manufacturer's ID (Roland)
1FH	Device ID
2DH	Model ID (RA – 50)
11H	Command ID (RQ1)
aaH	Address MSB
bbH	Address
ccH	Address LSB
ssH	Size MSB
:	:
ssH	Size LSB
sum	Check sum
F7H	EOX (End of Exclusive/System Common)

●**Data set 1 DT1 (12H)**

Byte	Description
F0H	Exclusive Status
41H	Manufacturer's ID (Roland)
10H	Device ID
16H	Model ID (MT – 32)
12H	Command ID (DT1)
aaH	Address MSB
bbH	Address
ccH	Address LSB
ddH	Data
:	:
eeH	Data
sum	Check sum
F7H	EOX (End of Exclusive/System Common)

Byte	Description
F0H	Exclusive Status
41H	Manufacturer's ID (Roland)
1FH	Device ID
2DH	Model ID (RA – 50)
12H	Command ID (DT1)
aaH	Address MSB
bbH	Address
ccH	Address LSB
ddH	Data
:	:
eeH	Data
sum	Check sum
F7H	EOX (End of Exclusive/System Common)

6. PARAMETER ADDRESS MAP (Model ID = 16H)

Address are represented in 7 – bit hexadecimal.

Address	MSB	LSB	
Binary	0aaa aaaa	0bbb bbbb	0ccc cccc
7-bit Hexdecimal	AA	BB	CC

The actual address of a parameter is a sum of the start address of each block and one or more offset address.

■ Parameter base address

Temporary area (Accessed on each basic channel)

Start address	Description	
02 00 00	Timbre Temporary Area (part 1 – 8)	*6-1

Whole part (Accessible on UNIT #)

Start address	Description	
03 00 00	Patch Temporary Area (part 1)	*6-2
03 00 10	Patch Temporary Area (part 2)	
:	:	
03 00 60	Patch Temporary Area (part 7)	
03 00 70	Patch Temporary Area (part 8)	
03 01 00	Patch Temporary Area (rhythm part)	
03 01 10	Rhythm Setup Temporary rea	*6-3
04 00 00	Timbre Temporary Area (part 1)	*6-1
04 01 76	Timbre Temporary Area (part 2)	
:	:	
04 0B 44	Timbre Temporary Area (part 7)	
04 0D 3A	Timbre Temporary Area (part 8)	
05 00 00	Patch Memory #1	*6-4
05 00 08	Patch Memory #2	
:	:	
05 07 70	Patch Memory #127	
05 07 78	Patch Memory #128	
08 00 00	Timbre Memory #1 *6-1

7.PARAMETER ADDRESS MAP (Model ID = 2DH)

* Device ID is only 1FH.

■ Parameter base address

Start address	Description	
10 00 00	MIDI Setting area	*7-1
20 00 00	String area	*7-2
60 00 00	Program Change Map area	*7-3

Notes :

*** 7 – 1 MIDI Setting area**

Offset address	Description	
00 00	Arranger Upper MIDI setup	*7-1-1
00 04	Arranger Lower MIDI setup	
00 08	Control Channel MIDI setup	
00 0C	Upper MIDI setup	
00 10	Lower MIDI setup	
00 14	Drums MIDI setup	
00 18	Bass MIDI setup	
00 1C	Accompaniment 1 MIDI setup	
00 20	Accompaniment 2 MIDI setup	
00 24	Accompaniment 3 MIDI setup	
00 28	Rx. 1 MIDI setup	
00 2C	Rx. 2 MIDI setup	
Total size	00 00 30	

*** 7 – 1 – 1 MIDI setup**

Offset address	Description		
00	0000 aaaa	Receive Channel	0 - 15
01	0000 aaaa	Transmit Channel	0 - 15
02	0000 aaaa	Expansion Channel	0 - 15
03	0000 000a	OFF(0) / ON(1)	0 - 1

Example

*To get setting of each part (UPPER, LOWER, DRUMS, BASS, ACCOMP1 – 3), send a message as shown below.

F0 41 1F 2D 11 10 00 0C 00 00 1C 48 F7

*** 7 – 2 String area**

Offset address	Description		
00 00	0aaa aaaa	character	32 - 127
:	:	:	(ASCII)
0n nn	0aaa aaaa	character	

*This area is used for asking about style name, tone name, length of intro, card status etc. Only DT1 is effective on these address, and RQ1 is ignored. Refer to section 8.

Example

*To get a selected style name, send messages as shown below.

F0 41 1F 2D 12 20 00 00 53 54 59 4C 45 3F 10 F7 ("STYLE?")
F0 41 1F 2D 12 20 00 00 1A 46 F7 (EOF)

*** 7 – 3 Program Change Map area**

Offset address	Description	
00 00	Program Change Map Upper	*7-3-1
01 00	Program Change Map Lower	
02 00	Program Change Map Bass	
03 00	Program Change Map Accomp 1	
04 00	Program Change Map Accomp 2	
05 00	Program Change Map Accomp 3	
Total size	00 08 00	

*** 7 – 3 – 1 Program Change Map for each Part**

Offset address	Description		
00	0aaa aaaa	for program change 0	0 - 127
:	:	:	
7F	0aaa aaaa	for program change 127	0 - 127
Total size	00 01 00		

Example

*To get a program change map of UPPER part, send a message as shown below.

F0 41 1F 2D 11 60 00 00 00 01 00 1F F7

Address Map

Address	Block	Reference
10 00 00	MIDI Setting	7-1
20 00 00	String	7-2, 8
60 00 00	Program Change Map	7-3

8. Communication of string packet

You will get a various information of RA－50's arranger section, using "STRING PACKET".

"STRING EXCLUSIVE" fills these conditions as shown below.
- COMMAND ID 12H (DT1)
- DEVICE ID 1FH
- ADDRESS 200000H
- DATA ASCII STRING, or 1AH (one byte)

Example 1
F0 41 1F 2D 12 20 00 00 53 54 59 4C 45 3F 10 F7 ("STYLE?")
Example 2
F0 41 1F 2D 12 20 00 00 1A 46 F7

"EOF" is a specific excliusive message on RA－50, this message has only one byte data (1AH) as example 2.

"MESSAGE" is a meaningful string sequence. Example 1, "MESSAGE" includes only one string. example 3, "MESSAGE" includes two strings.

Example 3
F0 41 0F 2D 12 20 00 00 53 54 59 4C 45 3D 3D 55 F7 ("STYLE==")
F0 41 0F 2D 12 20 00 00 30 3A 52 4F 43 4B 20 31 20 20 20 20 20 20 20 20
2D 20 3A 7C F7 ("0:ROCK 1 :")

"STRING PACKET" is "MESSAGE" and "EOF" ("EOF comes after "MESSAGE"). Example 4 is "STRING PACKET" structed from example 1, and also Example 5 is "STRING PACKET" structed from example 3.

Example 4
F0 41 1F 2D 12 20 00 00 53 54 59 4C 45 3F 10 F7 ("STYLE?")
F0 41 1F 2D 12 20 00 00 1A 46 F7 (EOF)

Example 5
F0 41 0F 2D 12 20 00 00 53 54 59 4C 45 3D 3D 55 F7 ("STYLE==")
F0 41 0F 2D 12 20 00 00 30 3A 52 4F 43 4B 20 31 20 20 20 20 20 20 20 20 3A 7C F7
("0:ROCK 1 :")
F0 41 1F 2D 12 20 00 00 1A 46 F7 (EOF)

Between "STRING EXCLUSIVE" of one "STRING PACKET", you can send other status. But you should not send other exclusive message. One "STRING PACKET" can include only one "MESSAGE".

Illustrating computer communication, one "STRING PACKET" means one file and one "STRING EXCLUSIVE" means one line.

"MESSAGE" has two classes as shown below.
- Ask about a value of specified parameter. (send to RA－50)
- Notify a value of specified parameter. (RA－50 returns)

Six kinds of parameter as shown below.
- STYLE TABLE
- STYLE
- CARD
- LENGTH OF INTRO
- LENGTH OF MEASURE
- TONE TABLE

When you ask about a value of specified parameter, adding "?" after parameter name.

Example 6 LENGTH OF INTRO?
F0 41 0F 2D 12 20 00 00 4C 45 4E 47 54 48 20 4F 46 20 49 4E 54 52 4F 3F 7E F7
F0 41 0F 2D 12 20 00 00 1A 46 F7

RA－50 notifies a value after parameter name and "==".

Example 7 LENGTH OF INTRO==96
F0 41 0F 2D 12 20 00 00 4C 45 4E 47 54 48 20 4F 46 20 49 4E 54 52 4F 3D 3D 39 36 54 F7
F0 41 0F 2D 12 20 00 00 1A 46 F7

When you design a communication program, you should observe these rules.
- When it receives "ask about a value", you should send "notify of a value".

RA－50 reacts as shown below, when RA－50 receives these "MESSAGE".
- When RA－50 receives "ask about a value", RA－50 sends "notify of a value".
- When RA－50 receives "notify of a value", RA－50 ignores it.

RA－50 doesn't send "MESSAGE" voluntarily, except "notify of a value" of CARD.

Introducing meaning of each parameter, the format of "notify of a value", and how to use it.

●STYLE TABLE

STYLE TABLE has a table of style number and style name.

Usable style numbers and style names are connected ":". When MUSIC STYLE CARD is inserted, STYLE TABLE includes style number and style name on CARD.
*A style number has two characters. And the <tab> means 09H.

Example 8 STYLE TABLE==

0:ROCK 1	<tab> 1:ROCK 2	<tab> 2:DISCO 1	<tab>
3:DISCO 2	<tab> 4:FUNK 1	<tab> 5:FUNK 2	<tab>
6:BALLAD	<tab> 7:SLOW ROCK	<tab> 8:8 BEAT 1	<tab>
9:8 BEAT 2	<tab>10:16 BEAT 1	<tab>11:16 BEAT 2	<tab>
12:REGGAE	<tab>13:BOOGIE	<tab>14:ROCK'N'ROLL	<tab>
15:DIXIELAND	<tab>16:SWING	<tab>17:BIG BAND	<tab>
18:SHUFFLE	<tab>19:COUNTRY	<tab>20:WALTZ 1	<tab>
21:WALTZ 2	<tab>22:POLKA	<tab>23:MARCH	<tab>
24:BAROQUE	<tab>25:BOSSANOVA	<tab>26:RHUMBA	<tab>
27:CHA CHA	<tab>28:SALSA	<tab>29:TANGO	<tab>
30:SAMBA	<tab>31:FUSION	<tab>	

This "MESSAGE" is divided into some "STRING EXCLUSIVE", by reason of too long for Roland Exclusive format.

●STYLE

STYLE has a selected style number and style name.

A style number and a style name is connected ":".

Example 9 STYLE==0:ROCK 1 :

●CARD

When MEMORY CARD is inserted, a value of a CARD is "INSERTED". And when MEMORY CARD is not inserted, a value of a CARD is "REMOVED".

RA－50 sends voluntarily "notify of a value" of CARD without "ask about a value" When you design a communication program, you may observe these rules.
- When it receives "notify of a value", you may send "ask about a value" of STYLE TABLE or STYLE.

Example 10 CARD==INSERTED

Example 11 CARD==REMOVED

●LENGTH OF INTRO

LENGTH OF INTRO has a MIDI beat intro length of selected style.
The length is notified in decimal system.

Example 12 LENGTH OF INTRO==96

●LENGTH OF MEASURE

LENGTH OF MEASURE has a MIDI beat measure length of selected style.
The length is notified in decimal system.

Example 13 LENGTH OF MEASURE==72

●TONE TABLE

TONE TABLE has a table of tone number and tone name.
Usable tone numbers and tone names are connected " : ".
A tone number has three characters. And the <tab> means 09H.

Example 14 TONE TABLE

```
  0:ELEC PIANO1 <tab>  1:ELEC PIANO2 <tab>  2:ELEC PIANO3 <tab>  3:HONKYTONK   <tab>

MUSIC STYLE: 32 (INTERNAL)
ARRANGER CONTROL: START/STOP, ARRANGER SELECT, INTRO/ENDING, FILL IN, BREAK, CHORD INTELLIGENCE, MELODY INTELLIGENCE, CHORD HOLD, SPLIT POINT, BYPASS, VARIATION
FOOTSWITCH : MULTI FUNCTION TYPE×3

●COMPOSER Section

Number of Tracks : 2
Number of Songs to be recorded : 3

●Sound Module Section

LA System (Linear Arithemetic Synthesis)
Maximum Voices : 32
Preset Tones : 128
Preset Rhythm Tones : 30
Digital Reverberation : 8 type

●Front Panel

Number of Buttons : 74
Master Volume Knob
Tempo Knob

●Display

2 lines, 16 letter (back-lit)
LCD (Liquid Crystal Display)

●Indicators

Button Indicators : 19
BEAT Indicators : 4
MIDI Message Indicator

●Rear Panel

External Pedal Jack × 3
MIDI Connectors : 4 (KBD) IN, (KBD) OUT
(SEQ) IN, (SEQ) OUT
Output Jack : L (mono) and R
Input Jack : L (mono) and R
Headphones Jack
DC-IN Jack
Power Switch
Card Slot

●Power Supply

ACL-120 (120V)
ACI-220 (220V)
ACB-240A, ACB-240E (240V)

●Consumption

800mA/9V

●Dimentions

360(W) × 241(D) × 69(H) mm
$14\,^{1}/_{8}$" × $9\,^{3}/_{4}$" × $2\,^{3}/_{4}$"
*Except for the protruding sections.

●Weight

2.0kg
4 lb 7oz
*Except for the AC Adaptor

●Accessories

Stereo Audio Cord
MIDI Cable × 2
AC Adaptor
Owner's Manual
*The supplied MIDI cable is specifically for MIDI connection. Do not use it for any other connection such as DIN Sync or audio setup.

●Options

Memory Card (M-256E)
Music Style Card (TN-SC1-XX)
Foot Switch (DP-2/6, FS-5U)

*Specifications are subject to change without notice.

Information

- Please use this AC adaptor only with the specified device.
- Please use the AC Adaptor of an appropriate voltage (120, 220 or 240) depending on the voltage system in your country.
- When the device is not used for a long period, be sure to disconnect the AC adaptor (Power Supply Unit) from the wall outlet.
- When you need repair service, call your local Roland Service Station as shown below or the authorized Roland distributer in your country.

For the U.K.

IMPORTANT: THE WIRES IN THIS MAINS LEAD ARE COLOURED IN ACCORDANCE WITH THE FOLLOWING CODE.

BLUE : NEUTRAL
BROWN : LIVE

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured BLUE must be connected to the terminal which is marked with the letter N or coloured BLACK.

The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.
