

DC++ : Abusing : What is Tag Faking?

Question:

Answer:

A tag is the DC++ tag, i.e. <++ V:0.305,M:A,H:0/1/0,S:2 (*meaning of the <++ tag*) A faker can simply be defined as, having a false or misleading appearance; fraudulent. That being said, a tag faker is someone who either **hides** or fraudulently **modifies** their DC++ tag. OPs permban any user on sight who are doing this.
