Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Preface

Before using this information and the product it supports, please read the following general information.

1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.

2. Please note WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reason, if a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Specification

Features

NOTE: This product line has both UMA and Discrete SKU. The Discrete SKU has thermal module and the UMA SKU has no thermal module.

Platform

- AMD Turion™ 64 X2 dual-core TL-50/TL-52/TL-56/TL-60/TL-62 processor or higher with 1MB L2 cache, supporting AMD PowerNow!™ Technology and AMD HyperTransport™ Technology
- Mobile AMD Sempron™ 3200+/3400+/3500+ or higher with 512KB L2 cache, supporting AMD PowerNow!™ Technology and AMD HyperTransport™ Technology, 64bit OS compatible
- ATI Radeon® Xpress 1100 or Xpress 1200 chipset

System Memory

- Up to 2GB of DDR2 533/667MHz memory, upgradeable to 4GB using two soDIMM modules (dual-channel support)

Display

- 15.4" WXGA Acer CrystalBrite™ TFT LCD, 1280 x 800 pixel resolution, 16 ms response time, supporting simultaneous multi-window viewing on dual displays via Acer GridVista™
- 15" XGA colour TFT LCD, 1024 x 768 pixel resolution

Graphics

- ATI Radeon® Xpress 1100 chipset with integrated 3D graphics, up to 256MB of shared system memory
- ATI Mobility™ Radeon® X1300/X1600 with up to 512MB of HyperMemory™ (64MB of dedicated GDDR2 VRAM; up to 448MB of shared system memory), supporting ATI PowerPlay™ 5.0, Microsoft® DirectX® 9.0, PCI Express®, DualView™ support
- 16.7 million colours
- MPEG-2/DVD hardware-assisted capability
- S-video/TV-out (NTSC/PAL) support **(for selected models)**
- Acer Arcade™, featuring Acer CinemaVision™ and Acer ClearVision™ technology

TV-Tuner

- Acer TV-tuner options **(for selected models)**:
    - Analog TV-tuner supporting hardware MPEG-2 stream encoding
    - Digital and analog hybrid TV-tuner supporting hardware MPEG-2 stream encoding
    - Digital and analog hybrid TV-tuner supporting software MPEG-2 stream encoding
- Analog TV-tuner supporting international analog TV standards (NTSC/PAL/SECAM)

- Digital TV-tuner supporting DVB-T (Digital Video Broadcasting Terrestrial) standard (6MHz to 8MHz) TV-tuner I/O:
    - RF jack for digital/analog TV antenna cable input
    - AV-in port for composite/S-video/line-in audio/video input
- TV-tuner cables:
    - NTSC/PAL cable for digital/analog TV input, NTSC converter to convert port from PAL/SECAM to NTSC
    - Mini DIN cable: RCA jack and S-video port for audio/video input
- Acer DVB-T antenna (UHF/VHF reception) supports Acer SignalUp^{TM} wireless technology

Audio

- High Definition audio support
- S/PDIF (Sony/Philips Digital Interface) support for digital speakers **(for selected models)**
- Audio system with two built-in speakers
- Sound Blaster Pro^{TM} and MS Sound compatible
- Built-in microphone

Storage Subsystem

- 40/60/80/100/120GB or higher ATA/100 hard disk drive
- Optical drive options:
    - DVD-Super Multi double-layer drive
    - DVD/CD-RW combo drive
- 5-in-1 card reader, supporting Secure Digital (SD), MultiMediaCard (MMC), Memory Stick® (MS), Memory Stick PRO^{TM} (MS PRO), xD-Picture Card^{TM} (xD) **(for selected models)**

Communication

- Acer Video Conference featuring Voice and Video over Internet Protocol (VVoIP) support via Acer OrbiCam^{TM} and optional Acer Bluetooth® VoIP phone **(for selected models)**
- Acer OrbiCam^{TM} integrated 310,000 pixel CMOS camera **(for selected model)** featuring:
    - 225 degree ergonomic rotation
    - Acer PrimaLite^{TM} technology
- Modem: 56K ITU V.92 with PTT approval; Wake-on-Ring ready
- LAN: gigabit or Fast Ethernet; Wake-on-LAN ready
- WPAN: Bluetooth® 2.0 + EDR (Enhanced Data Rate)
- WLAN: Acer InviLink^{TM} 802.11b/g or 802.11a/b/g Wi-Fi CERTIFIED^{TM} solution, supporting Acer SignalUp^{TM} wireless technology

Special Keys and Controls

- 88/89-key keyboard, with inverted "T" cursor layout; 2.5 mm (minimum) key travel, international language support
- Touch pad with 4-way scroll button
- 12 function keys, four cursor keys, two Windows® keys, hotkey controls, embedded numeric keypad

- Four easy-launch buttons: Empowering Key, email, Internet and user-programmable button
- Six/Seven media keys: TV, volume up, volume down, play/pause, stop, previous, next **(for selected models)**
- Two communication switches: WLAN, Bluetooth®
- Acer remote controls **(for selected models)**:
    - Acer Arcade™ (48 keys)
    - Windows® Media Center Edition (Uses an external USB CIR receiver)

I/O Interface

- ExpressCard™ /34 slot **(for selected models)**
- PC Card slot (one Type II)
- 5-in-1 card reader (SD/MMC/MS/MS PRO/xD) **(for selected models)**
- Four USB 2.0 ports **(three for selected models)**
- DVI-D port **(for selected models)**
- IEEE 1394 port **(for selected models)**
- Consumer infrared (CIR) port **(for selected models)**
- External display (VGA) port
- AV-in port **(for selected models)**
- RF-in jack **(for selected models)**
- S-video/TV-out (NTSC/PAL) port **(for selected models)**
- Headphones/speaker/line-out jack with S/PDIF support **(for selected models)**
- Microphone-in jack
- Line-in jack
- Ethernet (RJ-45) port
- Modem (RJ-11) port
- DC-in jack for AC adapter

Power Subsystem

- ACPI 2.0 CPU power management standards: Stand-by and Hibernation power-saving modes support
- 71W 4800mAh (8-cell) Li-ion battery pack
- 44W 4000mAh (6-cell) Li-Ion battery
- 29.6W 2000mAh (4-cell) Li-ion battery
- Acer QuicCharge™ technology: 80% charge in 1 hour; 2-hour rapid charge system-off; 2.5-hour charge-in-use

NOTE: Only support for SKU with 90W adapter.

- 3-pin 65/90W AC adapter

Dimensions and Weight

Aspire 5110

- 358 (W) x 269 (D) x 29.8/33.8 (H) mm (14.1 x 10.6 x 1.17/1.33 inches)
- 3.0 kg (6.61 lbs.) for 15.4" LCD model with TV module
- 2.92 kg (6.44 lbs.) for 15.4" LCD model without TV module

Aspire 5100/3100 Series

- 358 (W) x 269 (D) x 29.8/33.8 (H) mm (14.1 x 10.6 x 1.17/1.33 inches)
- 2.82 kg (6.22 lbs.) for 15.4" LCD model
- 2.78 kg (6.13 lbs.) for 15" LCD model

Environment

- Temperature:
    - Operating: 5 ºC to 35 ºC
    - Non-operating: -20 ºC to 65 ºC
- Humidity (non-condensing):
    - Operating: 20% to 80%
    - Non-operating: 20% to 80%

Block Diagram
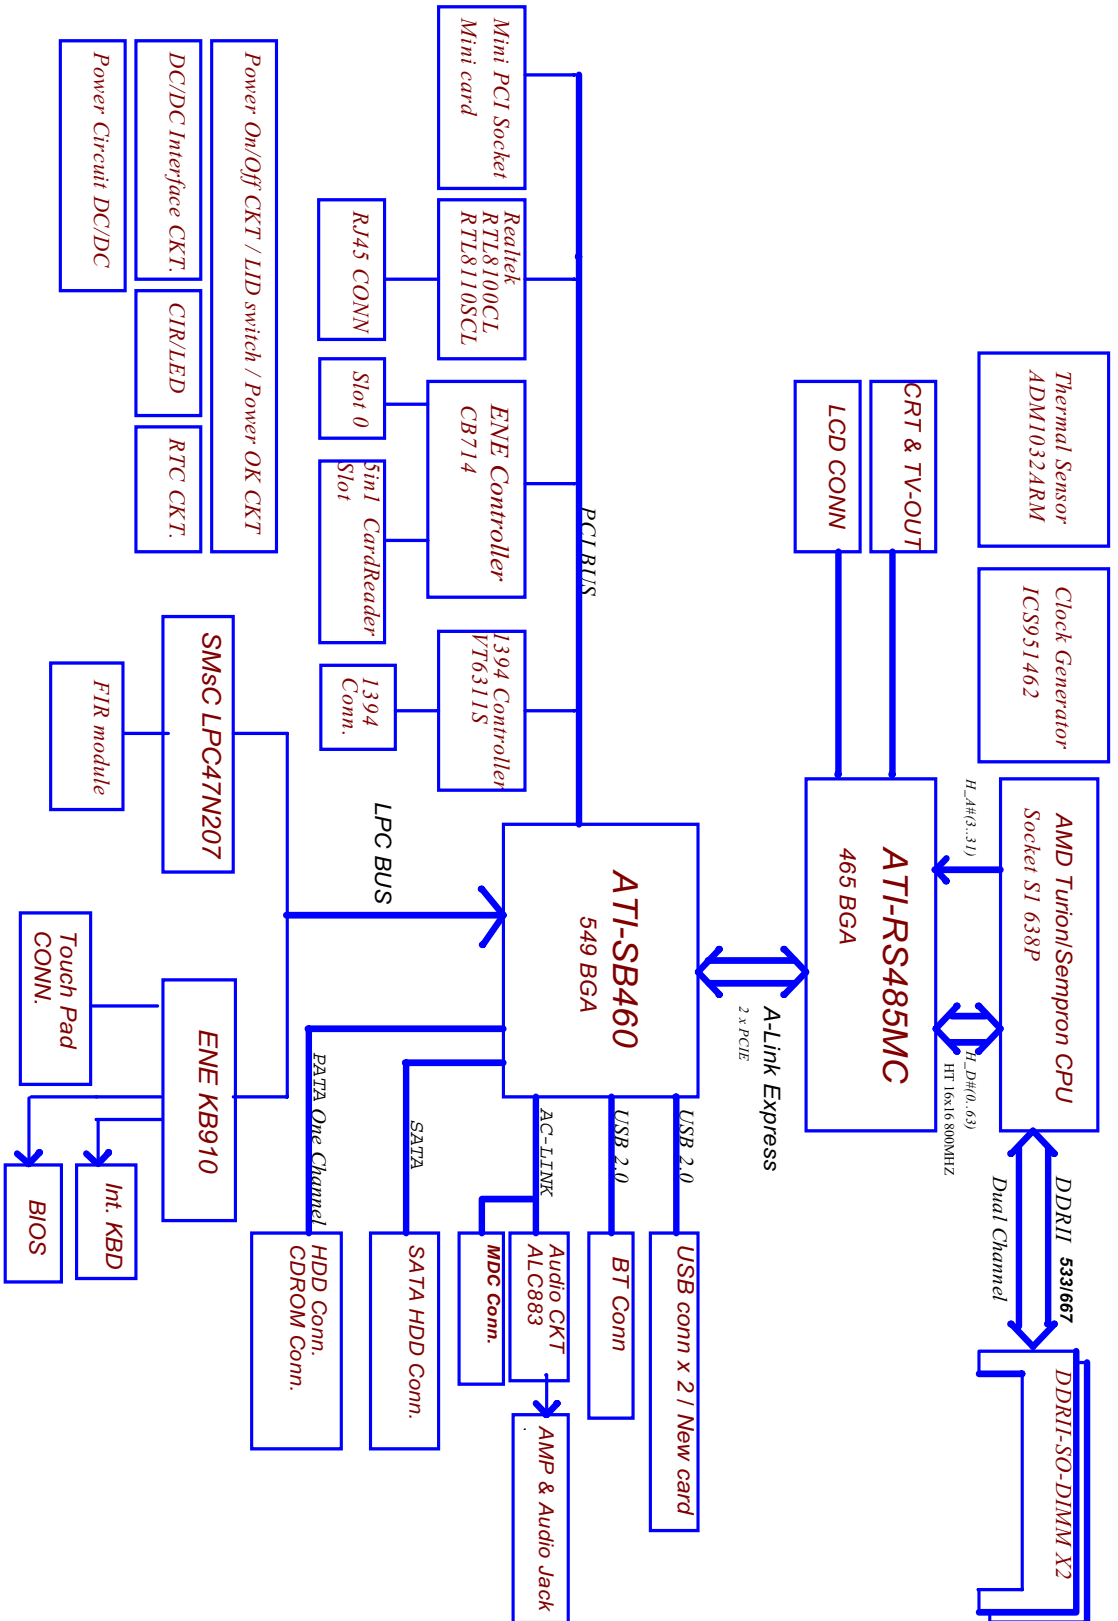

Outlook Tour

Front View
#	Item	Description
1	Display screen	Also called Liquid-Crystal Display (LCD), displays computer output.
2	Keyboard	Serves for entering data into your computer.
3	Touchpad	Touch-sensitive pointing device which functions like a computer mouse
4	Click buttons (left, center and right)	The left and right buttons function like the left and right mouse buttons; the center button serves as a four-way scroll button.
5	Palmrest	Comfortable support area for your hands when you use the computer.
6	Microphone	Internal microphone for sound recording.
7	TV/media/volume buttons	For use with Acer Arcade and other media playing programs **(for selected models)**.
8	Easy-launch buttons	Buttons for launching frequently used programs.
9	Status indicators	Light-Emitting Diodes (LEDs) that light up to show the status of the computer's functions and components.
10	Power button	Turns the computer on and off.

Closed Front View
#	Icon	Item	Description
1	N/A	Speakers	Left and right speakers deliver stereo audio output.
2		Bluetooth communication button/indicator	Enables/disables the Bluetooth communication. Indicates the status of Bluetooth communication **(for selected models)**.
3		Wireless communication button/indicator	Enables/disables the wireless function. Indicates the status of wireless LAN communication.
4		Power indicator	Indicates the computer's power status.
5		Battery indicator	Indicates the computer's battery status.
6		CIR receiver	Receives signals from a remote control **(for selected models)**.
7		Microphone-in jack	Accepts input from external microphones.
8		Line-in jack	Accepts audio line-in devices (e.g., audio CD player, stereo walkman).
9		Headphones/speaker/ line-out jack with S/PDIF support	Connects to audio line-out devices (e.g., speakers, headphones).
10	N/A	Latch	Locks and releases the lid.

Left View

#	Icon	Item	Description
1	(K)	Kensington lock slot	Connects to a Kensington-compatible computers security lock.
2	N/A	Ventilation slots	Enable the computer to stay cool, even after prolonged use.
3	⛐	Three USB 2.0 ports	Connect to USB 2.0 devices (e.g., USB mouse, USB camera).
4	📶	Ethernet (RJ-45) port	Connects to an Ethernet 10/100-based or 10/100/1000-based networks.
5	_..∠	Infrared port	Interfaces with infrared devices (e.g., infrared printer and IR-aware computer) **(optional)**.
6	MS / PRO / M MULTIMEDIACARD / SD / xD	5-in-1 card reader	Accepts Memory Stick (MS), Memory Stick Pro (MS PRO), MultiMediaCard (MMC), Secure Digital (SD) and xD-Picture Card (xD) **(optional)**.
7	1394	4-pin IEEE 1394 port	Connects to IEEE 1394 devices **(optional)**.
8	▯	PC Card slot	Accepts one Type II PC Card.
9	ExpressCard/34	ExpressCard/34 slot	Accepts one ExpressCard/34 module **(optional)**.
10	N/A	PC Card slot eject button	Ejects the PC Card from the slot.
Right View

#	Item	Description
1	Optical disk drive	Internal optical drive; accepts CDs or DVDs.
2	Optical disk access indicator	Lights up when the optical disk drive is active.
3	Optical disk drive eject button	Ejects the drive tray from the drive.
4	Emergency eject hole	Ejects the drive tray when the computer is turned off.

Rear View

#	Icon	Item	Description
Aspire 5110 / 5100 / 3100 Series			
1		Modem (RJ-11) port	Connects to a phone line.
2		Two USB 2.0 ports	Connect to USB 2.0 devices (e.g., USB mouse, USB camera).
3	RF	RF-in jack	Accepts input signals from analog/digital TV-tuner devices **(for selected models)**.
4	AV-IN	AV-in port	Accepts input signals from audio/video (AV) devices **(for selected models)**.
5		Power jack	Connects to an AC adapter.
6		S-video port/TV out port (NTSC/PAL) port	Connects to a television or display device with S-video input **(for selected models)**.
7		External display (VGA) port	Connects to an external display device (e.g., external monitor, LCD projector).
8	DVI-D	DVI-D port	Supports digital video connections **(for selected models)**.
9		USB 2.0 port	Connect to USB 2.0 devices (e.g., USB mouse, USB camera).
10	N/A	Ventilation slots	Enable the computer to stay cool, even after prolonged use.

Base View
#	Item	Description
1	Hard disk bay	Houses the computer's hard disk (secured with screws).
2	Memory compartment	Houses the computer's main memory.
3	Ventilation slots and cooling fan	Helps keep the computer cool. **NOTE:** Do not cover or obstruct the opening of the fan.
4	Battery lock	Locks the battery in position.
5	Battery bay	Houses the computer's battery pack.

Using the Keyboard

The full-sized keyboard includes an embedded numeric keypad, separate cursor, lock, Windows, function and special keys.

Lock keys and Embedded Numeric Keypad

The keyboard has three lock keys which you can toggle on and off.

Lock Key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters are typed in uppercase.
Num Lock **<Fn> + <F11>**	When Num Lock is on, the right hand side numeric keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). When Num Lock is off, the keys assume cursor and other shortcut functions.
Scroll Lock **<Fn> + <F12>**	When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. scroll Lock does not work with some applications.

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

Desired access	Num Lock on	Num Lock off
Number keys on embedded keypad	Type numbers in a normal manner.	N/A
Cursor-control keys on embedded keypad	Hold **<Shift>** while using cursor-control keys.	Hold **<Fn>** while using cursor-control keys.
Main keyboard keys	Hold **<Fn>** while typing letters on embedded keypad.	Type the letters in a normal manner.

Windows keys

The keyboard has two keys that perform Windows-specific functions.

Key	Icon	Description
Windows key	⊞	Press alone. This key has the same effect as clicking on the Windows Start button. It launches the Start menu. It can also be used with other keys to provide a variety of functions: ⊞ **+ <Tab>**: Activates the next Taskbar button. ⊞ **+ <E>**: Opens the My Computer window. ⊞ **+ <F1>**: Opens Help and Support. ⊞ **+ <F>**: Opens the Find (All Files dialog box). ⊞ **+ <R>**: Opens the Run dialog box. ⊞ **+ <M>**: Minimizes all windows. **<Shift> +** ⊞ **+ <M>**: Undoes the minimize all windows action.
Application key	▤	This key has the same effect as clicking the right mouse button. It opens the application's context menu.

Hotkeys

The computer employs hotkeys or key combinations to access most of the computer's controls like screen brightness, volume output and the BIOS utility. To activate hotkeys, press and hold the **<Fn>** key before pressing the other key in the hotkey combination.

Hot Key	Icon	Function	Description
<Fn> + <F1>	?	Hot key help	Displays help on hotkeys.
<Fn> + <F2>	☉	Acer eSettings	Launches the Acer eSettings in Acer Empowering Technology.
<Fn> + <F3>	✔	Acer ePower Management	Launches the Acer ePower Management in Acer Empowering Technology.
<Fn> + <F4>	Z^z	Sleep	Leads the computer to Sleep mode.

Hot Key	Icon	Function	Description
\<Fn\> + \<F5\>		Display toggle	Switches the display output between the display screen, external monitor (if connected) and both.
\<Fn\> + \<F6\>		Screen blank	Turns off the display screen backlight to save power. Press any key to return.
\<Fn\> + \<F7\>		Touchpad toggle	Turns the internal touchpad on and off.
\<Fn\> + \<F8\>		Speaker toggle	Turns the speakers on and off.
\<Fn\> + \<↑\>		Volume up	Increases the sound volume.
\<Fn\> + \<↓\>		Volume down	Decreases the sound volume.
\<Fn\> + \<→\>		Brightness up	Increases the screen brightness.
\<Fn\> + \<←\>		Brightness down	Decreases the screen brightness.

Special keys

You can locate the Euro symbol and the US dollar sign on the upper-center and/or bottom-right side of the keyboard.

The Euro Symbol

1. Open a text editor or word processor.

2. Either directly press the **\<Euro\>** key on the bottom-right side of the keyboard, or hold **\<Alt Gr\>** key then press the number **\<5\>** key on the upper-center side of the keyboard.

 NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/ typography/faq/faq12.htm for more information.

The US Dollar Sign

1. Open a text editor or word processor.

2. Either directly press the **\<$\>** key on the bottom-right side of the keyboard, or hold **\<Shift\>** and then press the US dollar sign on the number **\<4\>** key.

 NOTE: This function varies according to the language settings.

Indicators

The computer has several easy-to-read status indicators. The front panel indicators are visible even when the computer cover is closed up.

Icon	Item	Description
◆	HDD	Indicates when the hard disk drive is active.
🔒A	Caps Lock	Lights up when Caps Lock is activated.
🔒1	Num Lock	Lights up when Num Lock is activated.
☼	Power	Lights when the computer is on.
🔋	Battery	Lights when the battery is being charged.
✴	Bluetooth	Indicates the status of Bluetooth communication
⟟	Wireless LAN	Indicates the status of wireless LAN communication

Easy-launch Buttons

There are several conveniently located easy-launch buttons. They are one user-programmable button, web browser button, mail button, and Acer Empowering Key e. Press e to run the Acer Empowering Technology. Although the mail and web browser buttons are pre-set to E-mail and Internet programs, they can be redefined by users. To set the web browser, mail and programmable buttons, run the Acer Launch Manager.

Easy-launch button	Default application
e	Acer Empowering Technology (user-programmable)
Mail	E-mail application (user-programmable)
Web browser	Internet browser (user-programmable)
P	User-programmable

Touchpad

The built-in touchpad is a pointing device that senses movement on its surface. This means the cursor responds as you move your finger across the surface of the touchpad. The central location on the palmrest provides optimum comfort and support.

Touchpad Basics

Use the touchpad as follows:
- Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right (4) buttons located on the edge of the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad (2) is the same as clicking the left button.
- Use the four-way scroll (3) button to scroll up or down and move left or right a page. This button mimics your cursor pressing on the right scroll bar of windows applications.

Function	Left button (1)	Right button (4)	Main touchpad (2)	Center button (3)
Execute	Quickly click twice.		Tap twice (at the same speed as double-clicking a mouse button).	
Select	Click once		Tap once	
Drag	Click and hold. Then slide your finger across the touchpad to drag the cursor over the selection.		Tap twice (at the same speed as double-clicking a mouse button); rest your finger on the touchpad on the second tap and drag the cursor.	
Access context menu		Click once		
Scroll				Click and hold to move up/down/left/right.

NOTE: Keep your fingers, as well as the surface of the touchpad dry and clean. The touchpad is sensitive to your finger movements: the lighter the touch, the better the response. Tapping hard will not increase

the touchpad's responsiveness.

NOTE: By default, vertical and horizontal scrolling is enabled on your touchpad. It can be disabled under Mouse settings in Windows Control Panel.

Acer Empowering Technology

Acer's innovative Empowering Technology toolbar makes it easy to have access to the frequently used functions and manage the notebook. Displayed by default in the upper-right corner of the screen, it features the following handy utilities:

- **Acer eDataSecurity Management** protects data with passwords and advanced encryption algorithms **(for selected models)**.
- **Acer eLock Management** limits access to external storage media.
- **Acer ePerformance Management** improves system performance by optimizing disk space, memory and registry setting.
- **Acer eRecovery Management** backs up and recovers data flexibly, reliably and completely.
- **Acer eSettings Management** accesses system information and adjusts settings easily.
- **Acer ePower Management** extends battery power via versatile usage profiles.
- **Acer ePresentation Management** connects to a projector and adjusts dispaly settings conveniently.

For more information, right click on the Empowering Technology toolbar, then select the Help or Tutorial function.

Empowering Technology Password

Before using Acer eLock Management and Acer eRecovery Management, You must initialize the Empowering Technology password. Right click on the Empowering Technology toolbar and select **Password Setup** to do so. If you do not initialize the Empowering Technology password, you will be prompted to do so when running Acer eLock Management or Acer eRecovery Management for the first time.

NOTE: If you lose your password, there is no method to reset it except by reformatting your notebook or taking your notebook to an Acer Customer Service Center. Be sure to remember or write down your password.

Acer eDataSecurity Management (for selected models)

Acer eDataSecurity Management is a handy file encryption utility that protects the files from being accessed by unauthorized persons. It is conveniently integrated with Windows Explorer as a shell extension for quick and easy data encryption/decryption and also supports on-the-fly file encryption for MSN Messenger and Microsoft Outlook.

The Acer eDataSecurity Management setup wizard will prompt you for a supervisor password and default encryption. This encryption will be used to encrypt files by default, or you can choose to enter your own file-specific password when encrypting a file.

NOTE: The password used to encrypt a file is the unique key that the system needs to decrypt it. If you lose the password, the supervisor password is the only other key capable of decrypting the file. If you lose both passwords, there will be no way to decrypt your encrypted file! Be sure to safeguard all related passwords!

Initialize Supervisor Password

The Supervisor Password serves two purposes:

(1) To grant accesses to the Personal Secure Disk.
(2) To provide you a "last resort" to decrypt any files encrypted before by eDataSecurity.

Please record and keep it in a secure place, and never disclose it to anyone.

Initialize Supervisor Password
Enter Supervisor Password:

****

Enter it again to confirm:

****

Next

File Encryption

Enter a password (4 to 12 characters):

Enter it again to confirm:

Note: _____

Files already encrypted will not be encrypte

Warning on Desktop Search Tools

OK

File Decryption

File Decryption: _____

Password:

Note: _____
If you forget the password, You can use the Supervisor Password instead.

Warning on Desktop Search Tools

OK   Cancel

Acer eLock Management

Acer eLock Management is a security utility that allow you to lock up your removable data, optical and floppy drives to ensure that data can not be stolen while your notebook is unattended.

- Removable data devices: includes USB disk drives, USB pen drives, USB flash drives, USB MP3 drives, USB memory card readers, IEEE 1394 disk drives and any other removable disk drives that can be mounted as a file system when plugged into the system.

- Optical drive devices: includes any kind of CD-ROM or DVD-ROM drives.

- Floppy disk drives: 3.5-inch disks only.

- Interfaces: includes serial port, parallel port, infrared (IR), and Bluetooth.

To activate Acer eLock Management, a password must be set at first. Once set, you may apply locks to any of the three kinds of devices. Lock(s) will be set without any reboot necessary, and will remain locked after rebooting, until unlocked.

NOTE: If you lose the password, there is no method to reset it except by reformatting the notebook or taking the notebook to an Acer Customer Service Center. Be sure to remember or write down the password.
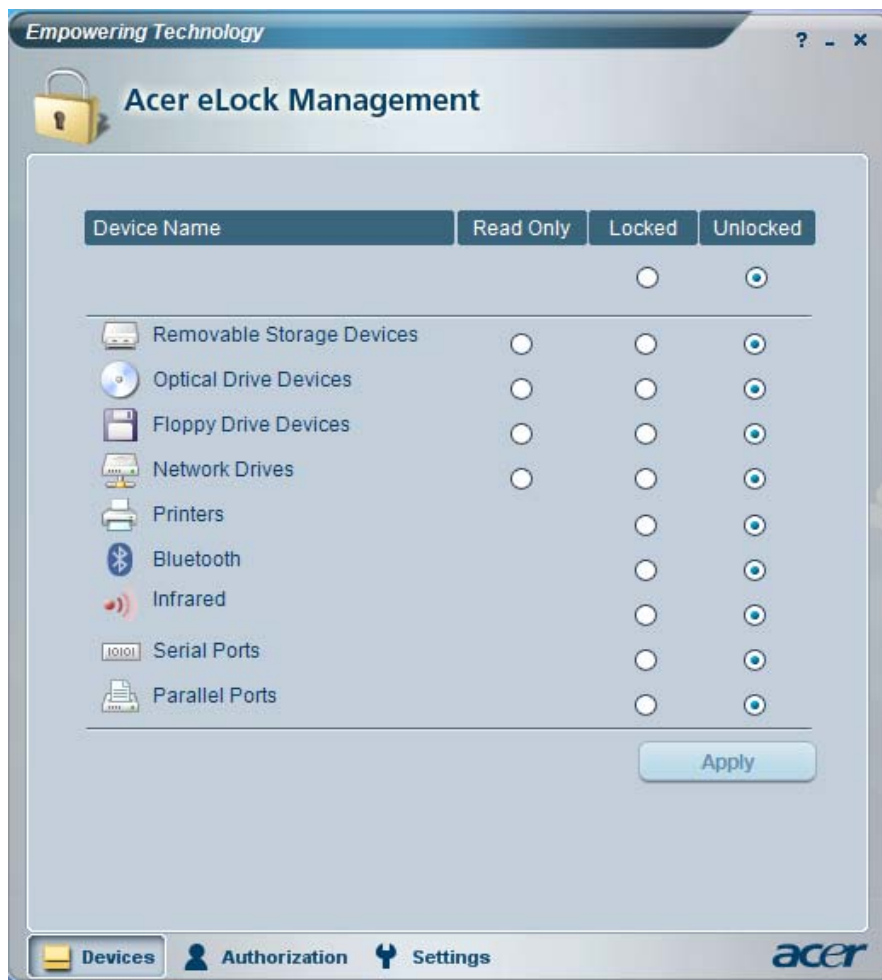

Acer ePerformance Management

Acer ePerformance Management is a system optimization tool that boosts the performance of the Acer notebook. It provides an express optimization method to release unused memory and disk space quickly. The user can also enable advanced options for full control over the following options:

- Disk optimization: removes unneeded items and files.
- Speed optimization: improves the usability and performance of the Windows XP system.
- Memory optimization: releases unused memory and check usage.
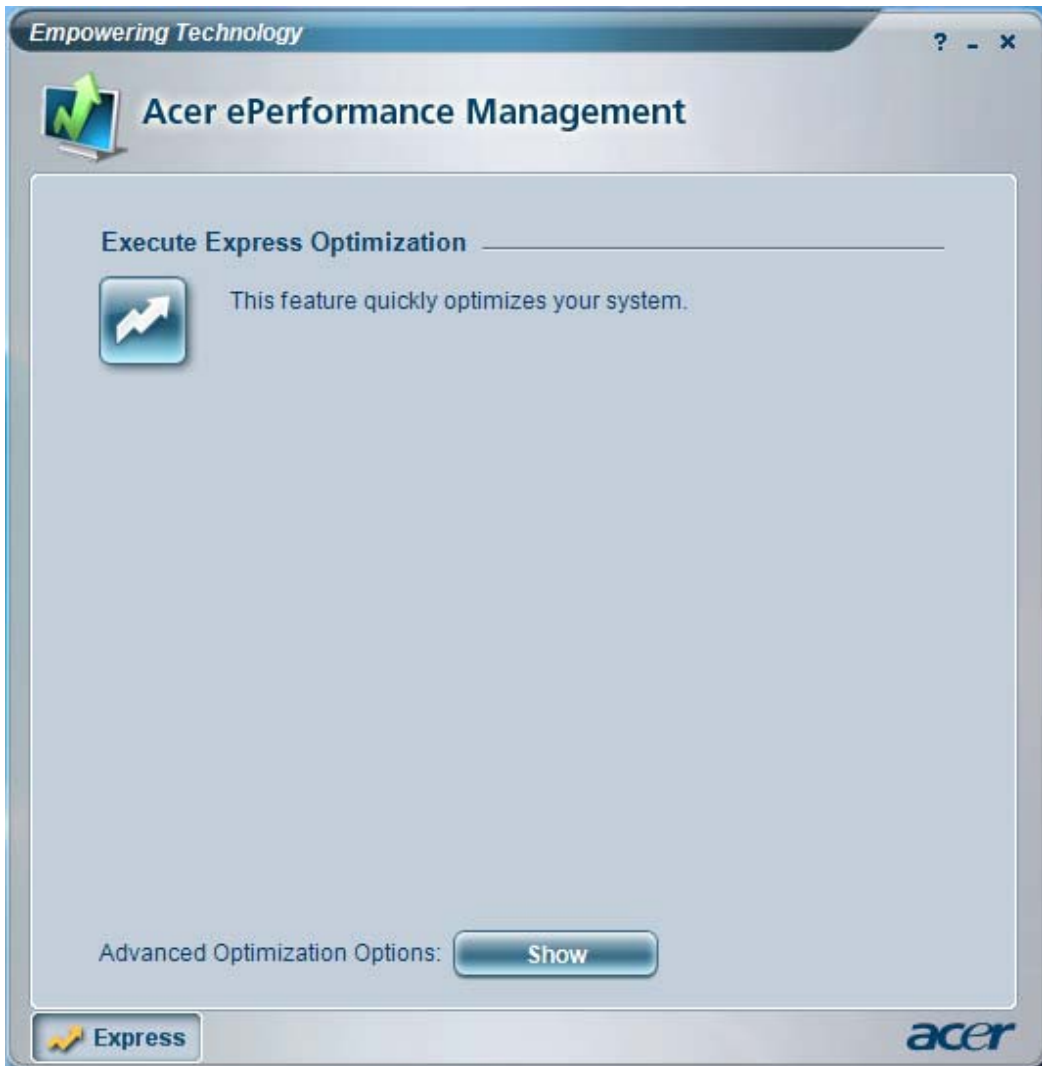

Acer eRecovery Management

Acer eRecovery Management is a powerful utility with the need for recovery disks provided by the manufacturer. The Acer eRecovery Management utility occupies space in a hidden partition on the system's HDD. Be default, user-created backups are stored on D:\ drive. Acer eRecovery Management provides:

- Password protection
- Recovery of applications and drives
- Image or data backup:
    - Backup to HDD (set recovery point)
    - Backup to CD or DVD
- Image/data recovery tools:
    - Recovery from a hidden partition (factory defaults)
    - Recovery from the HDD (most recent user-defined recovery point)
    - Recovery from CD or DVD
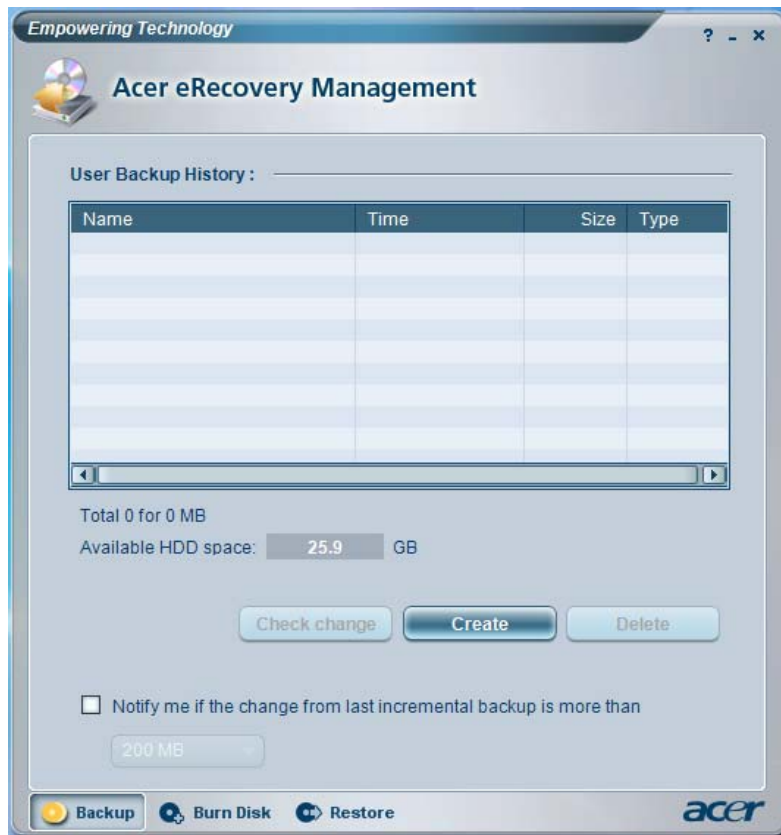

NOTE: If the computer did not come with a Recovery CD or System CD, please use Acer eRecovery Management's "System backup to optical disk" feature to burn a backup image to CD or DVD. To ensure the best results when recovering the system using a CD or Acer eRecovery Management, detach all peripherals (except external Acer ODD, if equipped), including the Acer ezDock.

Acer eSettings Management

Acer eSettings Management allows you to inspect hardware specification, change BIOS passwords or other Windows settings, and to monitor the system health status.

Acer eSettings Management also:

- Provides a simple graphical user interface for navigation.
- Displays general system status and advanced monitoring for power users on Acer computer.
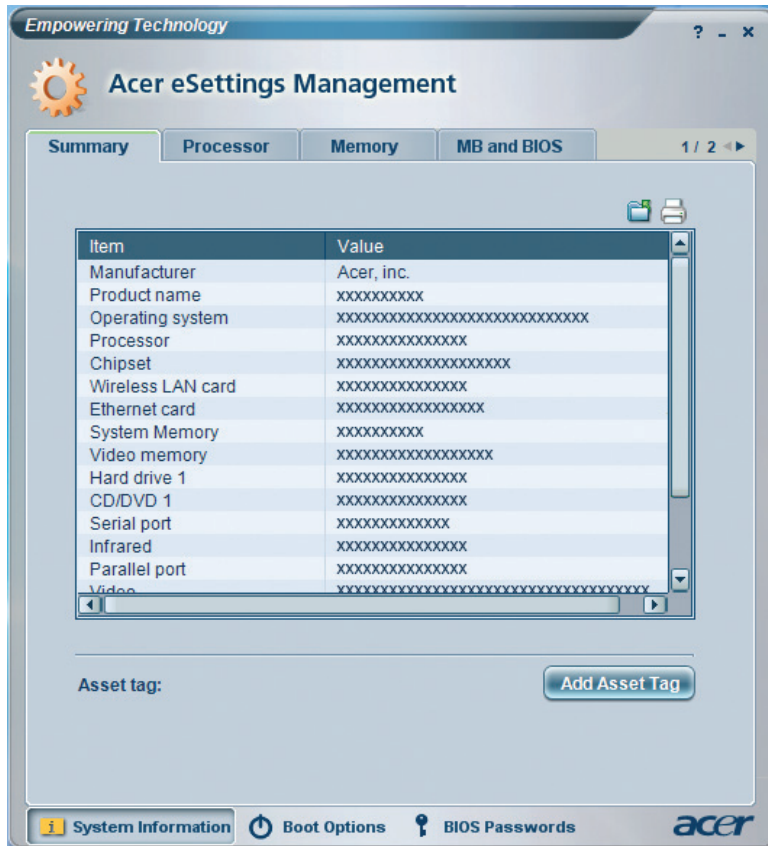

Acer ePower Management

Acer ePower Management features a straightforward user interface. To launch it, select Acer ePower Management from the Empowering Technology interface.

AC Mode (Adapter Mode)

The default setting is "Maximum Performance." You can adjust CPU speed, LCD brightness and other settings, or click on buttons to turn the following functions on/off: wireless LAN, Bluetooth, CardBus, fireware (1394), wired LAN and optical device if supported.

DC Mode (Battery Mode)

There are four pre-defined profiles: Entertainment, Presentation, Word Processing, and Battery Life. You can also define up to three of your own.

To Create a New Power Profile

1. Change power settings as desired.

2. Click **Save as...** to save to a new power profile.

3. Name the newly created profile.

4. Select whether this profile is for Adapter or Battery mode, then click **OK**.

5. The new profile will appear in the profile list.

Battery Status

For real-time battery life estimates based on current usage, refer to the panel on the upper half side of the window.

For additional options, click **Settings** to:

- Set alarms.

- Reload factory defaults.
- Select what actions to be taken when the cover is closed or the power button is pressed.
- Set passwords for accessing the system after Hibernation or Stand-by.
- View information about Acer ePower Management.
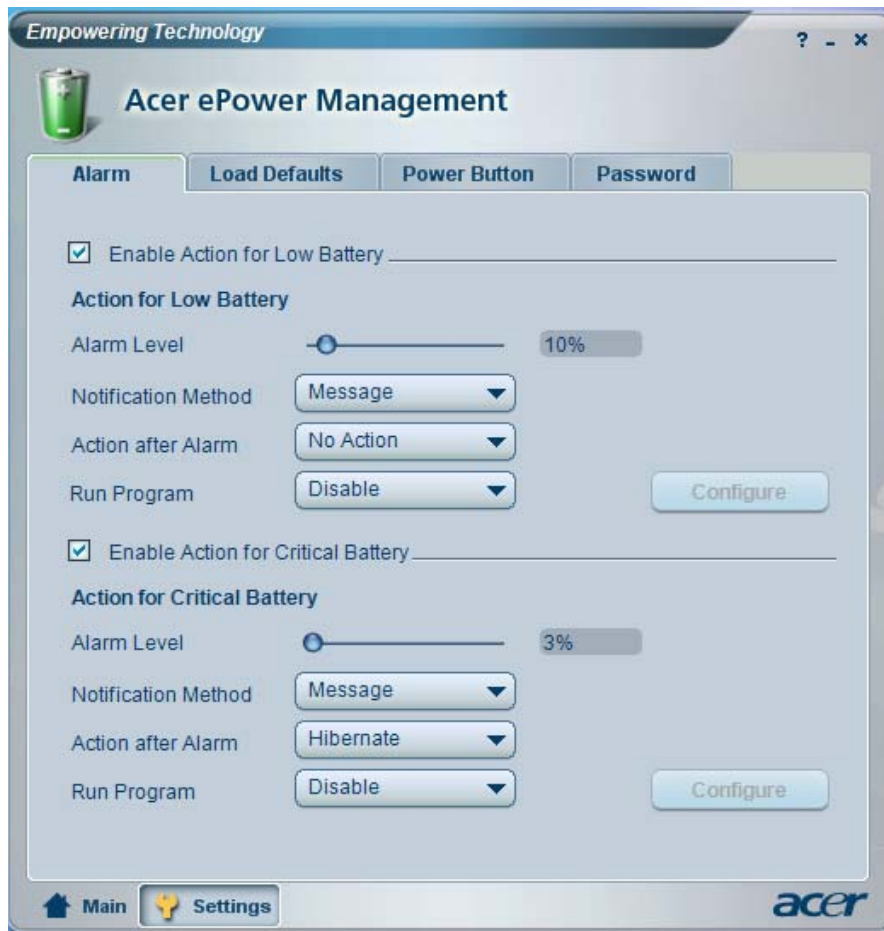

Acer ePresentation Management

Acer ePresentation Management lets you project your computer's display to an external device or projector using the hotkey: **<Fn> + <F5>**. If auto-detection hardware is implemented in the system and the external display supports it, your system display will be automatically switched out when an external display is connected to the system. For projectors and external devices that are not auto-detected, launch Acer ePresentation Management to choose an appropriate display setting.
NOTE: If the restored resolution is not correct after disconnecting a projector, or you need to use an external resolution that is not supported by Acer ePresentation Management, adjust your display settings using Display Properties or the utility provided by the graphics vendor.

Using the System Utilities

NOTE: The system utilities work under Microsoft Windows XP only.

Acer GridVista (dual-display compatible)

NOTE: This feature is only available on certain models.

To enable the dual monitor feature of the notebook, first ensure that the second monitor is connected, then select Start, Control Panel, Display and click on Settings. Select the secondary monitor **(2)** icon in the display box and then click the check box Extend my windows desktop onto this monitor. Finally, click Apply to confirm the new settings and click OK to complete the process.
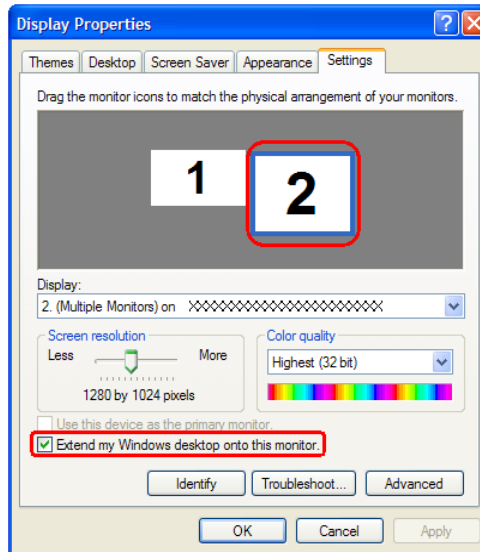

Acer GridVista is a handy utility that offers four pre-defined display settings so you can view multiple windows on the same screen. To access this function, please go to Start > All Programs and click on Acer GridVista. You may choose any one of the four display settings indicated below:

Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently. Acer GridVista is simple to set up:

1. Run Acer GridVista and select your preferred screen configuration for each display from the task bar.

2. Drag and drop each window into the appropriate grid.

3. Enjoy the convenience of a well-organized desktop.
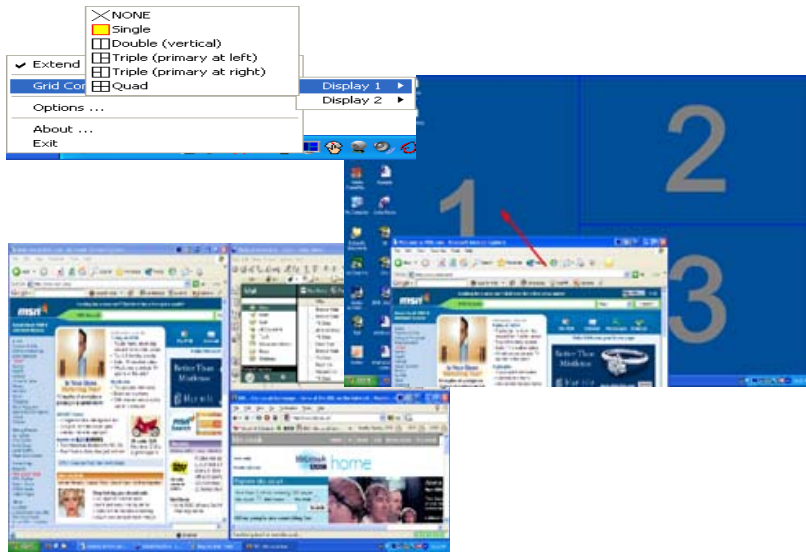

NOTE: Please ensure that the resolution setting of the second monitor is set to the manufacturer's recommended value.

Launch Manager
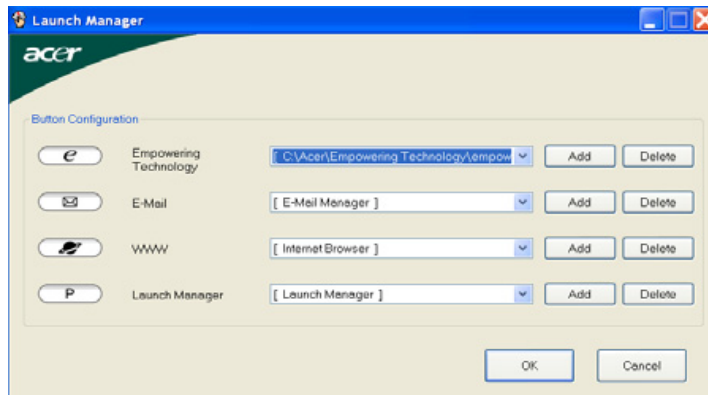

Launch Manager allows you to set the four easy-launch buttons located above the keyboard. You can access the Launch Manager by clicking on Start > All Programs > Launch Manager to start the application.

Norton AntiVirus

Norton AntiVirus is an anti-virus software that finds and repairs infected files, and protects against viruses to keep you computer data safe and secure.

How do I check for viruses?

A Full System Scan scans all files on your computer. To perform a system scan:

1. Start Norton Antivirus: Double click on the **Norton AntiVirus** Icon on the desktop or click on the **Start** menu in the Windows task bar, highlight **Programs**, and select **Norton Antivirus**.

2. In the Norton Antivirus main window, click **Scans**.
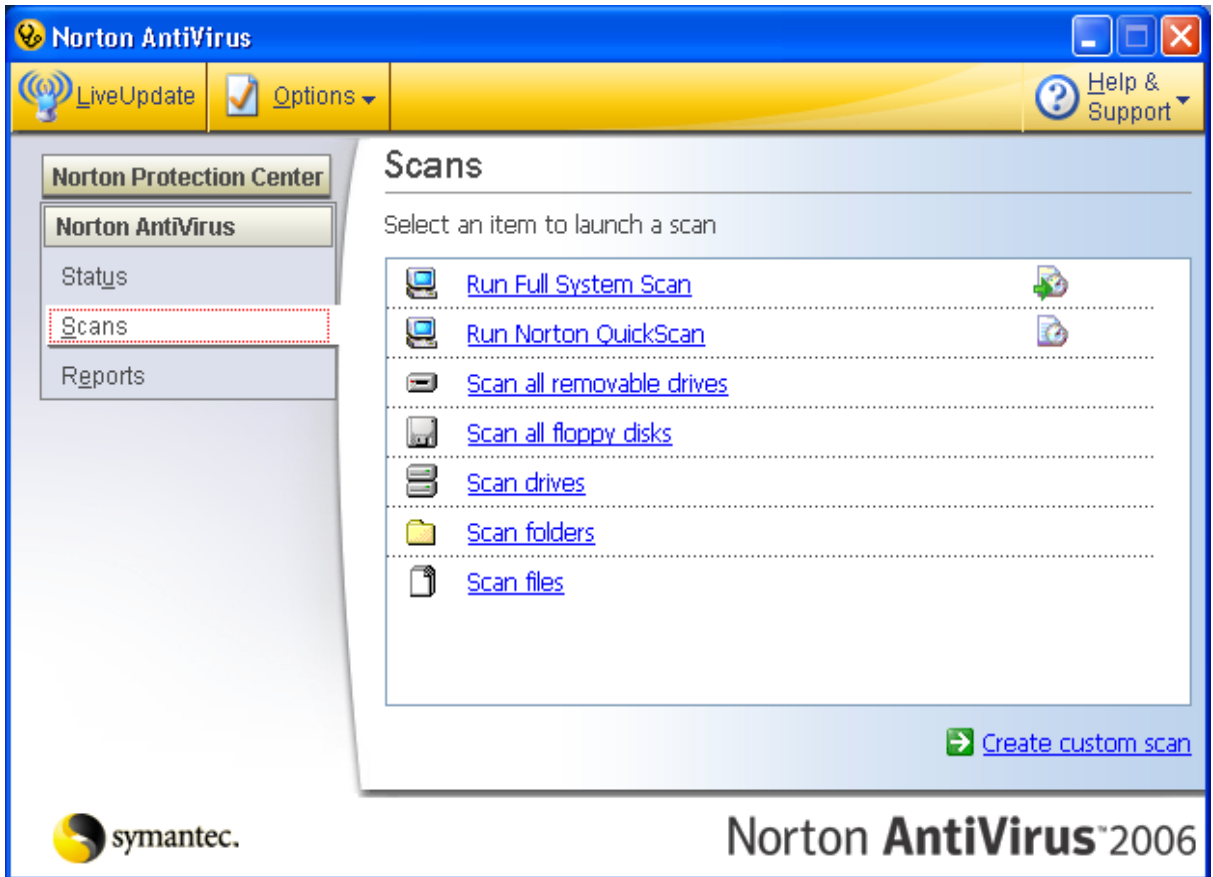

3. In the **Scans** panel, click **Run Full System Scan**.

4. When the scan is complete, a scan summary appears. Click **Finished**.

You can schedule customized virus scans that tun unattended on specific dates and times or at periodic intervals. If you are using the computer when the scheduled scan begins, it runs in the background so that you do not have to stop working.

For more information, please refer to the Norton AntiVirus Help menu.

Hardware Specification and Configuration

Processor

Item	Specification	
Type	AMD Turion™ 64 X2 dual-core TL-50/TL-52/TL-56/TL-60/TL-62 processor or higher	AMD Sempron™ 3200+/3400+/3500+ or higher
Package	939 pin lidded micro PGA	754 pin lidded micro PGA
Feature	• Compatible with Existing 32-bit code base • Integrated memory controller: 128-bit DDR SDRAM at 100/133/166/200MHz • Dual-core architecture: discrete L1 and L2 cache structures for each core • HyperTransport™ Technology to I/O devices: one 16-bit link supporting speed up to 1GHz (2000 MT/s) or 4 GB/s in each direction	• Compatible with Existing 32-bit code base • Integrated memory controller: 64-bit DDR SDRAM at 100/133/166/200MHz • HyperTransport™ Technology to I/O devices: one 16-bit link supporting speed up to 800MHz (1600 MT/s) or 3.2 GB/s in each direction
On-die second (L2) cache	1024KB	512KB

System Board Major Chips

Item	Specification
Core logic	ATi RS485MC + ATi SB460
Super I/O controller	SMSC SIO1036
Audio controller	Codec ALC883
Video controller	Integrated VGA solution for ATi RS485MC
HDD controller	ATi SB460
Keyboard controller and battery management unit	ENE KB910
Card bus PCMCIA controller	ENE CB714 (used ENE 1410 when without Card reader function)
LAN controller	RTL8110SBL
IEEE 1394	VIA VT6311S

BIOS

Item	Description
BIOS vendor	Phoenix
System BIOS version	Phoenix BIOS V0.17A

BIOS

Item	Description
Feature	• Acer UI support • Multi-boot support • 1MB flash RIOM for system BIOS • Suspend to RAM (S3) / Disk (S4) • Various hot keys for system control • Support boot option: HDD/Removable device (media bay device)/all USB ports • Support protocols: SMBIOS 2.3, PCI2.2, WFM2.0 • ACPI 2.0/3.0 compliance with Intel Speedstep support C1, C2, C3, C4, S3 and S4 for mobile CPU • DMI utility for BIOS serial number configurable/asset tag • Y2K solution support • BIOS virus protection • WinFlash support • Wake on LAN from S3 • Wake on LAN from AC mode • D to D support

System Memory

Item	Description
Chip	ATi SB460
Feature	• 256/512/1024MB + two 1.8V JEDEC standard 200-pin DDRII SODIMM memory module connectors • Adjustable 128MB UMA VGA memory share from system memory

VGA

Item	Description
Chip	ATi RS485MC
Features	• VGA memory up to 128MB • Display core frequency of 200MHz • 3D graphics engine • Analog display support • Dedicated 2FP (local flat panel) interface: single or dual channel LVDS panel support up to SWXGA + panel, resolution with frequency range from 25MHz to 115MHz per channel • Discrete: 64/128MB with hyper memory technology up to 512MB (64MB + 448MB or 128MB + 384MB) in OS • UMA: shared 256MB in OS

PCMCIA

Item	Description
PCMCIA controller	ENE CB714
Features	• PC Card 95 supported with one Type II • PCI card bus

ENE CB714 Card Bus Host Adapter

Item	Description
Feature	• 3.3V operation with I/O 5V tolerance
	• LFBGA 169-ball package
	• Pinout compatible with ENE CB1410
	• PCI interface
	1. Compliant with PCI Local Bus Specification Revision 2.3
	2. Compliant with PCI Bus PW Management Interface Specification Revision 1.1
	3. Compliant with PCI Mobile Design Guide Version 1.1
	4. Compliant with Advanced Configuration and Power Interface Specification Revision 1.0
	• CardBus Interface
	1. Compliant with PC Card Standard 8.0
	2. Standardized Zoomed Video Register Model support
	3. SPKOUT CAUDIO and RIOUT#
	• Secure Digital Interface
	1. Compliant with SD Host Controller Standard Specification Version 1.0
	2. SD Suspend/Resume Functionality support
	3. DMA mode to minimize CPU overhead support
	4. High speed with the SD clock frequency up to 50MHz support
	5. Contain two 512-byte buffer to maximize the transfer speed
	6. Traffic LED light support
	7. Over current protection support
	• Memory Stick Interface
	1. Compliant with Memory Stick PRO Format Specification Version 1.0
	2. 4-bit parallel data transfer mode support
	3. Memory stick clock frequency up to 40MHz
	4. DMA mode to minimize CPU to overhead
	5. Traffic LED light support
	• SmartMedia/xD-Picture Interface
	1. Compliant with SmartMedia Standard 2003
	2. Compliant with xD - PictureCard^{TM} Card Specification Version 1.0
	3. Hardware ECC (1-bit correction and 2-bit detection) Generation
	4. DMA mode to minimize CPU overhead
	5. Traffic LED light support
	• Interrupt Configuration
	1. Parallel PCI Interrupts support
	2. Parallel IRQ and Parallel PCI interrupts
	3. Serialized IRQ and PCI interrupts
	• Power Management Control Logic
	1. CLKRUN# protocol support
	2. SUSPEND# support
	3. PCI PME# from D3, D2, D1 and D0 support
	4. PCI PME# from D3 cold support
	• Zoomed Video port
	• Parallel 4-wire power switch interface

Audio

Item	Description
Audio controller	Realtek ALC833 Azadia Codec

Feature	• HD Audio
	• SNR > 85
	• Codec specification requires:
	  1. HD Audio interface
	  2. 10 DAC (7.1ch + 2CH); 2 ADC
	  3. DAC SNR >/= 95dB, ADC SNR >/= 85dB
	  4. 2 pins with DTS logo codec
	  5. S/PDIF out support
	  6. All DACs support 44.1K/48/K/96K/192K sample rate
	  7. All ADCs support 44.1K/48K/96/192K sample rate
	  8. At least 2 GPIOs for customized applications
	• One internal array analog microphone
	• Two speakers, at least 1W/9cc for each

LAN

Item	Description
LAN controller	Realtek RTL8100CL
Feature	• 10/100Mbps operation • 10/100Mbps • WOL from S5 support • File deployment support
Connector type	RJ-45

Wireless LAN

Item	Description
Card type	Mini-PCI
Features	• 802.11b/g • Built-in two antenna • Wi-Fi, WPA2, WMM CCX V3 and above support • To be placed on the top of LCD on the sides of LCD latches

Modem

Item	Description
Controller	ATi SB460
Features	• 56K, V.90/V.92, WWDAA • Wake-on-Ring support • CISPR22 application • MDC 1.5 card
Connector type	RJ-11

Keyboard

Item	Description
Model name	New Acer Ergo Keyboard

Keyboard

Item	Description
Features	• Touch pad with 4-way integrated scroll button • Windows keys and application keys support • Standard pitch, 2.5 mm travel length • Hotkey controls • Embedded numeric keypad • Multi-language support • Spill-proof • Four easy-launch buttons: Internet browser, E-mail with LED, Acer Empowering, one user-programmable button

Battery

Item	Specification
Vendor & model name	Panasonic/Sanyo/Sony
Features	• Li-Ion • 8-cell of 18650 Li-Ion battery pack (2200mAh cell) • 6-cell of 18650 Li-Ion battery pack (2000mAh cell) • 4-cell of 18650 Li-Ion battery pack (2000mAh cell)

TV Tuner (for selected models)

Item	Description
Features	• Mini PCI type • 3 TV tuner modules at least: 　1. Analog with HW MPEG2 　2. Analog + Digital with HW MPEG2 (Hybrid) 　3. Analog + Digital without HW MPEG2 (Hybrid)

LCD 15.4" WXGA

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built in the BIOS (Basic Input / Output System) of computer. Generally speaking, the computer is already properly configured and optimized, and you do not need to run this utility.

However, if you encounter configuration problems, you may need to run Setup. Otherwise, you can also refer to Chapter 4 Troubleshooting when problem arises.

Invoking BIOS Setup

To activate the BIOS Utility, press **m** during POST (when "Press <F2> to enter Setup" message is prompted on the left-bottom side of the screen).

There are six prime items in the BIOS Setup Utility. They are Information, Main, Advanced, Security, Boot and Exit. In the coming pages, we will explain the BIOS Setup Utility by item.

Part	Description
Information	Display the system informations.
Main	Allows the user to specify standard IBM PC AT system parameters.
Security	Provides security setting of the system.
Boot	Allows the user to specify the boot options.
Exit	Allows the user to save CMOS setting and exit Setup.

NOTE: During setup, all Fn function keys and power saving function are disabled.

Information

Info.	Main	Advanced	Security	Boot	Exit

CPU Type:	AMD Turion (tm) 64 X2 Mobile Technology
CPU Speed	1600 MHz

- CPU type: This item will show the CPU information of the system.
- CPU speed: This item will show the COU clock speed.
- HDD model name: The hard disk model name is automatically detected by the system. If there is no hard disk present or unknown type, "None" should be shown on this field.
- HDD serial number: If no hard disk or other devices are installed on primary IDE master, it will display a blank line.
- System BIOS version: This field reports BIOS version of the system.
- VGA BIOS version: This field reports VGA BIOS version of the system.
- Serial Number: This item is the serial number of the system.
- Asset Tag Number: This item is the asset tag number of the system.
- UUID: It shows only when an internal LAN device is available.

	Item Specific Help
System Time: [14:13:43]	
System Date: [05/12/2006]	<Tab>, <Shift-Tab>, or <Enter> selects field.
System Memory: 633 KB	
Extended Memory: 1046528 KB	
Video Memory 128 MB	
Quiet Boot: [Enabled]	
Power on Display: [Auto]	
Network Boot [Enabled]	
F12 Boot Menu: [Disabled]	
D2D Recovery: [Enabled]	

F1 Help	↑↓ Select Item	F5/F6 Change Values	F9 Setup Defaults
Esc Exit	←→ Select Menu	Enter Select ▶ Sub-Menu	F10 Save and Exit

- System Time and System Date: The hours are displayed with 24-hour format. The changes in these two items take effect immediately.
- System Memory: This item reports the memory size of system base memory. The size is fixed to 640KB.
- Extended Memory: It reports the memory size of the extended memory in the system. The extended memory size is equal to total memory size (one MB).
- Video Memory: It indicates the video memory size.
- Quiet Boot:
  - Enabled: Customer Logo is displayed, and Summary Screen is disabled.
  - Disabled: Customer Logo is displayed, and Summary Screen is enabled.
- Power on Display:
  - Auto: During power on process, the system will detect if any display device is connected on external video port. If any external display device is connected, the power on display will be only in CRT (or projector) mode. Otherwise, it will be in LCD mode.
  - Both: Both the integrated LCD and the external video port (for an external CRT or projector) will be enabled simultaneously.
- Network Boot: It permits the users to boot from network.

- F12 Boot Menu:
  - Enabled: When it is enabled, the users can modify device boot priority by pressing <F12> during POST.
  - Disabled: When it is not enabled, device boot priority will not be adjustable during POST.

The boot device change is only for one-time change. In other words, when the system is rebooted, the boot device sequence will be the same as the one defined in the BIOS setup (Boot option).

- D2D Recovery: It allows the users to enable or disable the disk-to-disk recovery.

PhoenixBIOS Setup Utility					
Info.	Main	Advanced	**Security**	Boot	Exit

	Item Specific Help
Supervisor Password Is:	Clear
User Password Is:	Clear
HDD Password Is:	Clear
	Supervisor Password controls accesses of the setup utility. It can be used to boot up when Password on boot is enabled.
Set Supervisor Password	[Enter]
Set User Password	[Enter]
Set HDD Password	[Enter]
Password on Boot:	[Disabled]

F1 Help	↑↓ Select Item	F5/F6 Change Values	F9 Setup Defaults
Esc Exit	←→ Select Menu	Enter Select ▶ Sub-Menu	F10 Save and Exit

The system supports three levels of password protection. The password support consists of a Supervisor Password, User Password, and Hard Disk Password. All the passwords are stored in a non-volatile storage device (EEPROM).

- Password Policy:

All the passwords will obey the following rules:

- All the passwords can be set or cleared in BIOS Setup Security screen.
- The password entry consists of eight alphanumeric characters. At least one character must be assigned.
- The valid keys are listed in the table below:

Symbol Character	Symbol Name
A-Z	letters A to Z (not case sensitive)
0-9	numerical characters
-	dash
=	equal sign
[	left bracket

Symbol Character	Symbol Name
]	right bracket
.	period
,	comma
;	semi-colon
/	slash
\	back slash

- The users can not change or remove password during resuming from S4.
- The max. number of times to retry the password is limited to three.

- Supervisor Password:

Supervisor Password controls the access of the whole BIOS Setup Utility. If the Supervisor Password is set, the system will pop up the password dialog box to ask for the password when the users press <F2> for entering BIOS Setup Utility.

If the Supervisor Password is set and Password on boot is enabled, the system will pop up the password dialog box to ask for the password when the system is powered on or resumes for S4 state.

If the users fail three times consecutively in password verification, the system will be hung up and the users need to manually power off the system.

- User Password:

If the User Password is set, the system will pop up the password dialog box to ask for the password when the users press <F2> for entering BIOS Setup Utility.

If the Supervisor Password is not set at first, the User Password can not be set. If the Supervisor Password is cleared, the User Password will be cleared, too.

If the User Password is set and Password on boot is enabled, the system will pop up the password dialog box to ask for the password when the system is powered on or resumes for S4 state.

If the users fail three times consecutively in password verification, the system will be hung up and the users need to manually power off the system.

- Set Supervisor Password / User Password:
    - Highlight the item and press "Enter", a dialog box will be shown to ask the users to enter new password and confirm new password.
    - If the users want to reset password, a current password will be required to be tapped in at first. If the current password is correct, the users are permitted to enter new password and confirm new password for verification. If the verification is OK, the password setting will be complete after the users press "Enter".
    - If the password entered does not match the current password, a dialog box will be shown to ask to re-enter the password.
- Set HDD Password: When shown as "Locked", the hard drive password currently can not be changed or disabled. To change or disable it, turn off the system and enter Setup immediately after turning it back on. Press "Enter" to input change, or disable hard drive password.
- Password on Boot: It allows the user to specify whether or not a password is required to boot.

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook for maintenance and troubleshooting. Here, we take an Aspire 5110 as sample for disassembly.

To disassemble the computer, you need the tools below:

- Wrist ground strap and conductive mat for preventing electrostatic discharge
- Small Philips screw driver
- Flat head screw driver
- Hexagonal driver
- Tweezers

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components. When you remove the stripe cover, please be careful not to scrape the cover.

General Information

Before You Begin

Before proceeding with the disassembly procedure, you have to make sure that:

1. The system and all peripherals are powered off.
2. The AC adaptor and all power and signal cables from the system are unplugged.
3. The battery pack is removed.

NOTE: There are several types of screws used to secure the main unit. The screws vary in length. Please refer to the screws table after the flowchart. Group the same type of screws together during service disassembling. Please also remember the screw location for each screw type. If you fasten the screws on the wrong location, the long screws may cause irrecoverable damage to the main board.

Disassembly Procedure Flowchart

The flowchart gives you a graphic representation on the entire disassembly and reassembly and instructs you how to remove the components.

Start → Battery Pack

Battery Pack →
- C*2 → HDD Module Cover → HDD Module → I*4 → HDD Bracket → HDD
- Middle Cover
  - C*4 D*2 → LCD Module → B*4 → LCD Bezel → F*2 → Inverter Board → B*2 → LCD panel and brackets → F*8 → R & L Brackets → LCD Cable
  - G*2 → Keyboard → C*12, B*1, J*4, G*1 → Upper Case → Power Board / Modem Card / Main Board / Touch Pad Bracket
    - Main Board: G*2 → Modem Card, G*1 → Main Board → Bluetooth Module, A*2 → Speakers
    - G*1 → Touch Pad Bracket → Touch Pad Board
  - G*1 → ODD Module
- Thermal Cover (C*4)
  - RAM
  - Mini PCI Card
  - C*2 → System Fan → G*4 → CPU Heatsink → CPU

Screws List

No.	Description	Part No.

b	SCREW M2.5*6(NL)	86.ADWV5.002
c	SCREW M2.5*10(NL)	86.ADWV5.003
d	SCREW M2.5*15(NL)	86.ADWV5.004
e	SCREW M2*2.2	86.ADWV5.005
f	SCREW M2*3-B (NL)	86.ADWV5.006
g	SCREW M2*3-S (NL)	86.ADWV5.007
h	SCREW M2*4	86.ADWV5.008
i	SCREW M3*4 (NL)	86.ADWV5.009

Screws List

| No.	Description	Part No.
j	SCREW D-SUB 4#X40*1/5-NI (NL)	86.ADWV5.010

Disassembly Procedure

Removing the Battery Pack

1. Slide the battery lock to the end as the arrow indicates.
2. The battery pack will pop up then remove it.

Removing the HDD Module

1. Release the two screws fastening the HDD module cover.
2. Detach the HDD module cover.
3. Pull the HDD module then lift the HDD module as the arrow indicates then detach the HDD module.
Removing the RAM Module/Mini PCI Card/Thermal Module/CPU

1. Release the four screws holding the thermal module cover.

2. Remove the thermal module cover.

3. Pull the RAM module locks at the same time as the arrows indicate.

4. The RAM module will pop up then detach it. Repeat the anterior step to remove another RAM module.

5. Pull the Mini PCI card locks at the same time as the arrows indicate.

6. The Mini PCI card will pop up then detach it.

7. Disconnect the auxiliary antenna cable (gray) and the main antenna cable (black).
8. Release the two screws securing the system fan.

9. Disconnect the system fan cable carefully the remove the system fan.

10. Release the four screws securing the CPU heatsink.

11. Remove the CPU heatsink as the arrow indicates.

12. Counter clockwise release the screw securing the CPU using a flat head screw driver.

13. Carefully detach the CPU.
Removing the ODD Module

If you just want to replace the ODD module, you do not have to remove the anterior components. Please skip the anterior steps of disassembly. After you remove the battery pack and the thermal module cover, follow the steps below.

1. Release the screw securing the ODD module.

2. Push the ODD module using a screwdriver as shown.

3. Remove the ODD module from the main unit.
Removing the LCD Module from the Main Unit

If you just want to replace or check the LCD module, you can skip all the main unit disassembly procedures. After removing the battery pack, please follow the steps below.

1. Open the notebook as shown.
2. Remove the middle cover from the edge of the middle cover.
3. Carefully detach the middle cover.
4. Carefully disconnect the LCD cable.
5. Slightly pull out the wireless antenna cables.

6. Release the two screws holding the LCD module on the bottom side of the main unit.

7. Release the four screws securing the LCD hinges on the main unit.

8. Then detach the LCD module from the main unit.
Removing the Keyboard

If you just want to replace the keyboard, skip the LCD module disassembly. After you remove the middle cover, follow the steps below.

1. Release the two screws securing the keyboard plate.

2. Carefully detach the keyboard plate from the edge of the keyboard plate and place the keyboard plate as shown.

3. Release the keyboard FFC lock carefully because it is fragile. Then remove the keyboard plate.
Disassembling the Main Unit

Separating the Upper Case and the Lower Case

1. Carefully release the media board FFC lock because it is fragile. Then disconnect the media board FFC.

2. Release the 12 screws securing the upper case and the lower case on the bottom side.

3. Release the four hexagonal screws securing the external VGA port and the DVI-D port.

4. Release the two screws securing the upper case and the lower case on the upper side.

5. Then detach the upper case from the main unit.
Removing the Power Board and the Modem Board

1. Detach the power board slightly.

1. Release the two screws securing the modem board.

2. Detach the modem board then disconnect the modem board cable.
Removing the Main Board

1. Disconnect the speakers cable and the microphone cable.

2. Release the screw securing the main board.

3. Slightly pull the edge of the lower case from the left side and at the same time push the main board on the bottom side to pop up the main board.

4. Repeat Step 3 from the rear side.

5. Then detach the main board. If your system is equipped with Bluetooth module, please place the main board on the lower case as shown. Do not abruptly remove the main board from the lower case.
Removing the Bluetooth Module

1. Place the main board as shown.

2. Tear off the tinsel.

3. Disconnect the Bluetooth module cable and remove the main board.

4. Remove the Bluetooth module.
Removing the Speakers

1. Release the two screws securing the speakers.

2. Then detach the speakers.
Removing the Touch Pad Board

1. Slightly unlock the touch pad FFC lock by nail and disconnect the touch pad FFC.

2. Release the screw holding the touch pad board bracket then remove the touch pad board bracket.

3. Detach the touch pad board.
Removing the VGA Heatsink

1. Release the two screws securing the VGA heatsink.

2. Then detach the VGA heatsink.
Disassembling the LCD Module

1. Remove the four screw cushions on the LCD bezel then release the four screws holding the LCD bezel.

2. Carefully detach the LCD bezel from the LCD module.

3. Tear off the tapes holding the LVDS cable and the LCD cable then release the two screws securing the inverter board.

4. Carefully disconnect the LVDS cable.

5. Carefully disconnect the LCD cable then remove the inverter board.

6. Release the two screws securing the LCD panel.

7. Then detach the LCD panel.

8. Release the eight screws holding the left and right LCD brackets and remove the LCD brackets.
9. Tear off the tape holding the LCD cable.

10. Carefully pull and disconnect the LCD cable.

Troubleshooting

Please use the following procedures as a guide for computer problems.

NOTE: The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options may occur errors or invalid responses.

1. Obtain the detailed fail symptoms as many as possible.

2. Verify the symptoms by attempting to recreate, running the diagnostic tests or repeating the same operation.

System Check Procedures

External Diskette Drive Check

Do the following procedures to isolate the possible effects from a controller, driver, or diskette. A writable, diagnostic diskette is required.

NOTE: Make sure that the diskette does not have more than one label attached. Multiple labels may cause damage to the drive or make the drive fail.

1. Boot from the diagnostic diskette and start the diagnostic programs.
2. See if FDD test is passed as the programs run the FDD test.
3. Follow the instructions in the message window.

If errors occur with the internal diskette driver, reconnect the diskette connector on the system board. If the errors still remain:

1. Reconnect the external diskette drive.
2. Replace the external diskette driver.
3. Replace the main board.

External CD-ROM Drive Check

Do the following procedures to isolate the possible effects from a controller, driver, or CD-ROM.

NOTE: Make sure that the CD-ROM does not have any label attached. The label may cause damage to the drive or make the drive fail.

1. Boot from the diagnostic diskette and start the diagnostic programs.
2. See if CD-ROM test is passed when the programs run the CD-ROM test.
3. Follow the instructions in the message window.

If errors occur, reconnect the connector on the system board. If the errors still remain:

1. Reconnect the external CD-ROM drive.
2. Replace the external CD-ROM drive.
3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is under test. If the internal keyboard does not work or an unexpected error appears, make sure that the flexible cable extending from the internal keyboard is correctly connected on the system board. If the keyboard is correctly connected, run the Keyboard test.

If errors occur, do the following procedures in sequence to correct the problems. Do not replace a non-defective FRU.

1. Reconnect the keyboard cable.
2. Replace the keyboard.
3. Replace the main board.

The following auxiliary input devices are supported by this computer.

- Numeric keypad
- External keyboard

If any of these devices do not function, reconnect the cable and repeat the anterior procedures.

Memory Check

Follow the procedures below to correct the memory errors.

1. Boot from the diagnostic diskette and start the diagnostic programs.
2. Go to the diagnostic memory in the test items.
3. Press F2 in the test items.
4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is correctly inserted into the connector. A wrong connection will cause errors.

Power System Check

To verify the symptoms, power on the computer by using the following power sources separately.

1. Remove the battery pack.
2. Connect the power adaptor and check the power supply.
3. Disconnect the power adaptor and install the battery pack, then check the power supply.

If you think there is a power supply problem, please go to "Check the Power Adaptor" and "Check the Battery Pack" in this chapter.

Check the Power Adaptor

Unplug the power adaptor cable from the computer and measure the output voltage at the plug of the power adaptor cable. See the illustration and follow the procedures below.
pin 1: +19V to +20.5V
pin 2: 0V, ground

1. If the voltage is not correct, replace the power adaptor.
2. If the voltage is within the range:
   (1) Replace the system board.
   (2) If the problem is still not resolved, see "Undetermined Problems".
   (3) If the voltage is not correct, go to the next step.

NOTE: An audible noise from the power adaptor does not always indicate a defect.

3. If the power-on indicator does not light up, check the power cord of the power adaptor for continuity and correct installation.
4. If the operational charge does not work, see "Check the Battery Pack".

Check the Battery Pack

Follow the procedures below to check the battery pack.

From software, this helps to identify the problem is on recharging or discharging.

1.   Check the Power Management in Control Panel.

2.   Then confirm that the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.

3.   Repeat the step 1 and step 2 for both battery and adaptor.

From hardware, this helps to identify whether you should replace the battery pack or not.

1.   Power off the system.

2.   Remove the battery pack and measure the voltage between terminals one (+) and seven (-). There are seven terminals totally. See the illustration below.
3.   If the voltage is still less than 7.5V after recharging, replace the battery.

If the battery status indicator does not light up, remove the battery pack. After the battery pack returns to room temperature, reinstall it to the system.

If the charge indicator does not light up, replace the battery pack. If the charge indicator still does not light up, replace the AC/DC charger board.

Touchpad Check

If the touchpad does not work, follow the procedures one at a time to correct the problem. Do not replace a non-defective FRU.

1.   Reconnect the touchpad cables.

2.   Replace the touchpad.

3. Replace the system board.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement will occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes.

NOTE: Perform the FRU replacement or actions in the sequence shown in Error Message List, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

The error messages are listed in the coming pages to indicate the BIOS signals on the screen and the error symptoms classified by functions. If the symptom is not included on the list, please refer to **Undetermined Problems**.

NOTE: Most of the error messages occur during POST. Some of them show information about a hardware device, for example, the size of memory installed. Others may indicate problems with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, please reset the computer. Enter Setup and install Setup defaults to correct the errors.

Index of Error Messages

Error Code List

Error Code	Error Message
006	Equipment Configuration Error Causes: 1. CPU BIOS Update Code Mismatch 2. IDE Primary Channel Master Drive Error The causes will be shown before **Equipment Configuration Error**.
010	Memory Error at xxxx:xxxx:xxxxh (R: xxxxh, W: xxxxh)
070	Real Time Clock Error
071	CMOS Battery Bad
072	CMOS Checksum Error
110	System disabled. Incorrect password is specified.
No error code	Battery critical low: In this situation BIOS will issue four short beeps then shut down system, no message will be shown.
No error code	Thermal critical high: In this situation BIOS will shut down the system, no message will be shown.

Error Message List

Error Message	FRU/Action in Sequence
Failure Fixed Disk	Reconnect hard disk drive connector. Run **Load Default Settings** in BIOS Setup Utility. Hard disk drive System board
Stuck Key	see **Keyboard or Auxiliary Input Device Check**.
Keyboard error	see **Keyboard or Auxiliary Input Device Check**.
Keyboard Controller Failed	see **Keyboard or Auxiliary Input Device Check**.
Keyboard locked - Unlock key switch	Unlock external keyboard

Error Message List

Error Message	FRU/Action in Sequence
Monitor type does not match CMOS - Run Setup	Run **Load Default Settings** in BIOS Setup Utility.
Shadow RAM Failed at offset: nnnn	BIOS ROM System board
System RAM Failed at offset: nnnn	DIMM System board
Extended RAM Failed at offset: nnnn	DIMM System board
System battery is dead - Replace and run Setup	Replace RTC battery and Run BIOS Setup Utility to reconfigure system time, then reboot system.
System CMOS checksum bad - Default configuration used	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system.
System timer error	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system. System board
Real time clock error	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system. System board
Previous boot incomplete - Default configuration used	Run **Load Default Settings** in BIOS Setup Utility. RTC battery System board
Memory size found by POST differed from CMOS	Run **Load Default Settings** in BIOS Setup Utility. DIMM System board
Diskette drive A error	Check the drive is defined with the proper diskette type in BIOS Setup Utility. See **External Diskette Drive Check**.
Incorrect Drive A type - run Setup	Check the drive is defined with the proper diskette type in BIOS Setup Utility.
System cache error - Cache disabled	System board
CPU ID:	System board
DMA Test Failed	DIMM System board
Software NMI Failed	DIMM System board
Fail-Safe Timer NMI Failed	DIMM System board
Device Address Conflict	Run **Load Default Settings** in BIOS Setup Utility. RTC battery System board
Allocation Error for device	Run **Load Default Settings** in BIOS Setup Utility. RTC battery System board

Error Message List

Error Message	FRU/Action in Sequence
Failing Bits: nnnn	DIMM BIOS ROM System board
Fixed Disk n	None
Invalid System Configuration Data	BIOS ROM System board
I/O device IRQ conflict	Run **Load Default Settings** in BIOS Setup Utility. RTC battery System board
Operating system not found	Enter Setup and see if fixed disk and drive A: are properly identified. Diskette drive Hard disk drive System board
No beep, power-on indicator turns off and LCD is blank.	Power source (battery pack and power adapter). See **Power System Check**. Ensure every connector is connected correctly. Reconnect the DIMM. LED board System board
No beep, power-on indicator turns on and LCD is blank.	Power source (battery pack and power adapter). See **Power System Check**. Reconnect the LCD connector. Hard disk drive LCD inverter ID LCD cable LCD Inverter LCD System board
No beep, power-on indicator turns on and LCD is blank. But you can see POST on an external CRT.	Reconnect the LCD connectors. LCD inverter ID LCD cable LCD inverter LCD System board
No beep, power-on indicator turns on and a blinking cursor shown on LCD during POST.	Ensure every connector is connected tightly and correctly. System board
No beep during POST but system runs correctly.	Speaker System board

POST Code

Code	Beeps	For Boot Block in Flash ROM
E0h		Initialize the chipset.
E1h		Initialize the bridge.
E2h		Initialize the CPU.
E3h		Initialize the system timer.
E4h		Initialize system I/O.
E5h		Check force recovery boot.
E6h		Checksum BIOS ROM.
E7h		Go to BIOS.
E8h		Set Huge Segment.
E9h		Initialize Multi Processor.
EAh		Initialize OEM special code.
EBh		Initialize PIC and DMA.
ECh		Initialize Memory type.
EDh		Initialize Memory size.
EEh		Shadow Boot Block.
EFh		System memory test.
F0h		Initialize interrupt vectors.
F1h		Initialize Run Time Clock.
F2h		Initialize video.
F3h		Initialize System Management Mode.
F4h	1	Output one beep before boot.
F5h		Boot to Mini DOS.
F6h		Clear Huge Segment.
F7h		Boot to Full DOS.

Index of Symptom-to-FRU Error Message

LCD-Related Symptoms

Symptom/Error	Action in Sequence
LCD backlight doesn't work. LCD is too dark. LCD brightness cannot be adjusted. LCD contrast cannot be adjusted.	Enter BIOS Utility to execute **Load Setup Default Settings**, then reboot system. Reconnect the LCD connectors. Keyboard (if contrast and brightness function key do not work). LCD inverter ID LCD cable LCD inverter LCD System board
Unreadable LCD screen Missing pels in characters Abnormal screen Wrong color displayed	Reconnect the LCD connector. LCD inverter ID LCD cable LCD inverter LCD System board
LCD has extra horizontal or vertical lines displayed.	LCD inverter ID LCD inverter LCD cable LCD System board

Indicator-Related Symptoms

Symptom/Error	Action in Sequence
Indicator incorrectly remains off or on, but system runs correctly.	Reconnect the inverter board Inverter board System board

Power-Related Symptoms

Symptom/Error	Action in Sequence
Power shuts down during operation.	Power source (battery pack and power adapter). See **Power System Check**. Battery pack Power adapter Hard drive & battery connection board System board
The system doesn't power on.	Power source (battery pack and power adapter). See **Power System Check**. Battery pack Power adapter Hard drive & battery connection board System board

Power-Related Symptoms

Symptom/Error	Action in Sequence
The system doesn't power-off.	Power source (battery pack and power adapter). See **Power System Check**. Hold and press the power switch for more than 4 seconds. System board
Battery can't be charged.	See **Check the Battery Pack**. Battery pack System board

PCMCIA-Related Symptoms

Symptom/Error	Action in Sequence
System cannot detect the PC Card (PCMCIA).	PCMCIA slot assembly System board
PCMCIA slot pin is damaged.	PCMCIA slot assembly

Memory-Related Symptoms

Symptom / Error	Action in Sequence
Memory count (size) appears different from actual size.	Enter BIOS Setup Utility to execute **Load Default Settings**, then reboot system. DIMM System board

Speaker-Related Symptoms

Symptom/Error	Action in Sequence
In Windows, multimedia programs, no sound comes from the computer.	Audio driver Speaker System board
Internal speakers make noise or emit no sound.	Speaker System board

Power Management-Related Symptoms

Symptom/Error	Action in Sequence
The system will not enter hibernation.	Keyboard (if control is from the keyboard) Hard disk drive System board
The system does not enter hibernation mode and four short beeps every minute.	Press Fn + F4 and see if the computer enters hibernation mode. Touchpad Keyboard Hard disk connection board Hard disk drive System board

Power Management-Related Symptoms

Symptom/Error	Action in Sequence
The system does not enter standby mode after closing the LCD.	LCD cover switch System board
The system does not resume from hibernation mode.	Hard disk connection board Hard disk drive System board
The system does not resume from standby mode after opening the LCD.	LCD cover switch System board
Battery fuel gauge in Windows does not go higher than 90%.	Remove battery pack and let it cool for two hours. Refresh battery (continue to use battery until power off, then charge battery). Battery pack System board
System hangs intermittently.	Reconnect hard disk/CD-ROM drives. Hard disk connection board System board

Peripheral-Related Symptoms

Symptom/Error	Action in Sequence
System configuration does not match the installed devices.	Enter BIOS Setup Utility to execute **Load Default Settings**, then reboot system. Reconnect hard disk/CD-ROM/diskette drives.
External display does not work correctly.	Press Fn + F5, LCD/CRT/Both display switching System board
USB does not work correctly.	System board
Print problems	Ensure the **Parallel Port** in the "Onboard Devices Configuration" of BIOS Setup Utility is set to Enabled. Onboard Devices Configuration Run printer self-test. Printer driver Printer cable Printer System Board
Serial or parallel port device problems.	Ensure the **Serial Port** in the Devices Configuration" of BIOS Setup Utility is set to Enabled. Device driver Device cable Device System board

Keyboard/Touchpad-Related Symptoms

Symptom/Error	Action in Sequence
Keyboard (one or more keys) does not work.	Reconnect the keyboard cable. Keyboard System board

Keyboard/Touchpad-Related Symptoms

Symptom/Error	Action in Sequence
Touchpad does not work.	Reconnect touchpad cable. Touchpad board System board

Modem-Related Symptoms

Symptom/Error	Action in Sequence
Internal modem does not work correctly.	Modem phone port modem combo board System board

NOTE: If you can not correct the problems according to the anterior tables, see **Undetermined Problems**.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problems, follow the procedures below:

1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
2. If no error is detected, do not replace any FRU.
3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which devices fail, which devices are incorrectly installed, whether a short circuit happens, or whether the system is inoperative.

NOTE: Verify if all devices attached are supported by the computer.

NOTE: Verify if the power supply used at the time of failure is operating correctly. You can refer to "Power System Check".

Follow the procedures below to isolate the failing FRU. Do not isolate non-defective FRU.

1. Power off the computer.

2. Visually check the devices. If any problems are found, replace the FRU.

3. Remove or disconnect all of the following devices:
   - Non-Acer devices
   - Printer, mouse, and other external devices
   - Battery Pack
   - Hard disk drive
   - DIMM
   - CD-ROM / Diskette drive module
   - PC cards

4. Power on the computer.

5. Determine if the problem has been resolved.

6. If the problem does not recur, reconnect the removed devices one at a time until you find the failed FRU.

7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU.
   - System board
   - LCD assembly

FRU (Field Replacement Unit) List

This chapter offers the FRU (Field Replacement Unit) list in global configuration of Aspire 5110/ 5100/3100 series. Refer to this chapter whenever you order the parts to repair or for RMA (Return Merchandise Authorization).

Please note that when ordering FRU parts, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number is changed, it will NOT be noted on the printed service guide. For Acer authorized service providers, your Acer office may have a different part number code from those given in the FRU list of this printed service guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for service.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose them properly, or follow the rules set by your regional Acer office on how to return it.
